Sengled W11-N11

Sengled Smart Wi-Fi LED Bulb A19 (Soft White 2700K) User Manual

Model: W11-N11

Introduction

The Sengled Smart Wi-Fi LED Bulb offers convenient lighting control for your home. This bulb connects directly to your 2.4 GHz Wi-Fi network, eliminating the need for a separate hub. It is compatible with voice assistants like Alexa and Google Home, allowing for voice commands to control lighting. Through the Sengled Home app, you can manage brightness, set schedules, and create custom scenes.

Setup Instructions

Follow these steps to set up your Sengled Smart Wi-Fi LED Bulb:

1. **Download the Sengled Home App:** Search for "Sengled Home" in your smartphone's app store (iOS/Android) and download it. Register for an account if you are a new user.
2. **Install the Bulb:** Screw the Sengled Smart Wi-Fi LED Bulb into a standard E26 light socket. Ensure the power is on.
3. **Connect to Wi-Fi:** Open the Sengled Home app and follow the in-app guided setup instructions to connect your bulb to your home's 2.4 GHz Wi-Fi network.
4. **Personalize Settings:** Once connected, you can personalize scenes, set schedules, and explore other features within the app.

Operating Instructions

Voice Control

Control your smart bulb using voice commands with compatible devices like Amazon Alexa or Google Home. Simply link your Sengled account to your voice assistant app and use commands such as:

- "Alexa, dim the [room name] light to 80%."
- "Hey Google, turn on the [light name]."
- "Alexa, set [light name] to soft white."

Image: Example of using voice commands to control lighting.

App Control

The Sengled Home app allows you to control your smart bulbs remotely from anywhere. You can turn lights on/off, adjust brightness, and manage groups of bulbs.

- **Remote Control:** Turn lights on or off even when you are away from home.
- **Group Control:** Control multiple bulbs simultaneously by grouping them within the app.

Scheduling and Routines

Set timers and light schedules to automate your lighting. Create custom routines for waking up, sleeping, or other daily activities.

- **Wake Up Mode:** Gradually increase light intensity in the morning.
- **Sleep Mode:** Slowly dim lights in the evening.
- **Custom Routines:** For example, set a "reading time" routine that adjusts lights and plays a message.

Maintenance

The Sengled Smart Wi-Fi LED Bulb is designed for long-term use with a service life of approximately 22.8 years, based on typical usage. No specific user maintenance is required beyond ensuring the bulb is clean and free from obstructions. Always ensure the power is off before cleaning or handling the bulb.
For optimal performance, ensure your Wi-Fi network is stable and within range of the bulb.

Troubleshooting

If you encounter issues with your Sengled Smart Wi-Fi LED Bulb, consider the following:

- **Bulb Not Responding:** Check if the bulb is securely screwed into the socket and the power switch is on. Ensure your Wi-Fi network is active and the bulb is within range.
- **Connection Issues:** Verify that your smartphone is connected to a 2.4 GHz Wi-Fi network during setup. If the bulb disconnects, try restarting your Wi-Fi router and the bulb. You may need to re-pair the bulb through the Sengled Home app.
- **Voice Control Not Working:** Confirm that your Sengled account is correctly linked to your Alexa or Google Home app. Check the device names in both apps for consistency.
- **App Functionality:** Ensure your Sengled Home app is updated to the latest version.

For persistent issues, refer to the in-app help section or contact Sengled customer support.

Specifications
