2. Setup and Installation

2.1 Unpacking

Carefully remove all packaging materials, including tape and protective films. Inspect the refrigerator for any shipping damage. Report any damage to your retailer immediately.

2.2 Placement

- Place the refrigerator on a flat, stable surface away from direct sunlight or heat sources (e.g., oven, radiator).
- Ensure adequate ventilation around the unit. Allow at least 10 cm (4 inches) of space at the back and sides for proper air circulation.
- The dimensions of the product are approximately 65.1 x 55.5 x 166.8 cm (Depth x Width x Height). Ensure sufficient space for door opening.

2.3 Leveling

Use the adjustable leveling feet at the bottom of the refrigerator to ensure it is perfectly level. A level refrigerator operates more efficiently and prevents door alignment issues.

2.4 Electrical Connection

Connect the refrigerator to a dedicated 120 Volt electrical outlet. Do not use extension cords or adapters. Allow the refrigerator to stand upright for at least 2-4 hours before plugging it in to allow refrigerants to settle.

3. Operating Instructions

3.1 Initial Operation

After plugging in the refrigerator, allow it to run for several hours (at least 4-6 hours) before placing food inside. This allows the interior to reach the optimal cooling temperature.

3.2 Temperature Control

The refrigerator features a temperature control system to adjust the cooling level. Locate the "control temp" dial or slider inside the fresh food compartment. Adjust it according to your needs. A colder setting is typically indicated by a higher number or a "Max" position.

3.3 Interior Organization

- **Tempered Glass Shelves:** Two adjustable tempered glass shelves provide flexible storage options for various food items.
- **Vegetable Drawer:** A dedicated drawer with a glass lid is provided for storing fruits and vegetables, helping to maintain their freshness.
- **Door Shelves:** Three full door shelves and one specific bottle shelf offer convenient storage for beverages and condiments, including large bottles up to 3 liters.
- **Egg Holder:** A dedicated egg holder is included for safe storage of eggs.
- **Freezer Compartment:** The freezer includes a wire shelf, a full door shelf, a half door shelf, and an ice tray for organized frozen food storage.

4. Maintenance and Care

4.1 Cleaning

- **Interior:** Clean the interior regularly with a solution of mild soap and warm water. Wipe dry with a soft cloth. Remove shelves and drawers for thorough cleaning.
- **Exterior:** Wipe the exterior surfaces with a soft, damp cloth. For graphite finish, use a non-abrasive cleaner specifically designed for stainless steel or similar finishes if needed.
- **Door Gaskets:** Clean door gaskets regularly to ensure a tight seal. A dirty or sticky gasket can prevent the door from closing properly, leading to energy loss.
- **Condenser Coils:** For optimal efficiency, clean the condenser coils located at the back or bottom of the refrigerator at least once a year. Unplug the unit before cleaning.

4.2 Defrosting

This Mabe refrigerator features an automatic defrost system, eliminating the need for manual defrosting of the freezer compartment. If ice buildup occurs, ensure the door is closing properly and the temperature setting is appropriate.

4.3 Power Outages

In case of a power outage, keep the refrigerator and freezer doors closed to maintain internal temperatures for as long as possible. Food will remain frozen for approximately 24 hours if the doors are kept closed.

5. Troubleshooting

Before contacting service, please check the following common issues and solutions:

Problem	Possible Cause	Solution
Refrigerator not cooling	Not plugged in; power outage; temperature control set too warm; door left open; condenser coils dirty.	Check power connection; verify power supply; adjust temperature setting; ensure door is fully closed; clean condenser coils.
Unusual noises	Refrigerator not level; items vibrating inside; normal operating sounds (e.g., refrigerant flow, defrost cycle).	Level the refrigerator; rearrange items; these sounds are normal.
Water on floor or inside	Drain tube clogged; door not sealing properly; high humidity.	Clear drain tube; check door gasket for proper seal; this can be normal in humid environments.
Door not closing completely	Items blocking door; refrigerator not level; dirty door gasket.	Rearrange items; level the refrigerator; clean door gasket.
