Goodyear GOD8020

Goodyear Snow & Road Textile Snow Chains Size L - Instruction Manual

Model: GOD8020

1. PRODUCT OVERVIEW

The Goodyear Snow & Road Textile Snow Chains are designed to provide enhanced traction for vehicles on snowy and icy roads. This set includes two 100% textile snow chains for two drive wheels, ensuring a safe and quiet driving experience without causing damage to your tires. They are compatible with ABS and ESP systems, as well as 4x4 vehicles, vans, and utility vehicles.

These chains are patented and conform to Önorm V 5121 GEPRÜFT and B26 standards, with DOT Washington Approval.

2. SAFETY INFORMATION

- Always install snow chains on the drive wheels of your vehicle.
- Do not exceed a maximum speed of 40 km/h (25 mph) when snow chains are installed.
- Avoid sudden acceleration, braking, or sharp turns.
- Remove snow chains immediately when driving on clear, snow-free roads for extended periods to prevent wear and damage to the chains and tires. The chains can be used on roads without snow for a distance of up to 50 km (31 miles) at a maximum speed of 40 km/h.
- Ensure the chains are correctly tensioned after installation and re-check after driving a short distance (approx. 100 meters).
- Consult your vehicle's owner's manual for any specific recommendations or restrictions regarding snow chain use.

3. PACKAGE CONTENTS

Your Goodyear Snow & Road Textile Snow Chains package includes:

- 2 x Goodyear Snow & Road Textile Snow Chains (Size L)
- 1 x Pair of Installation Gloves
- 1 x Storage Bag

Image: Front view of the Goodyear Snow & Road Textile Snow Chains packaging, showing the product and brand.

4. INSTALLATION INSTRUCTIONS

Installation of the Goodyear Snow & Road Textile Snow Chains is designed to be quick and easy, typically completed in 4 steps. It is recommended to practice installation before encountering adverse weather conditions.

Step-by-Step Guide:

1. **Position the Chain:** Place the textile snow chain over the top of the tire, ensuring the elastic band is centered around the tire's circumference. Pull the chain down as far as possible.

Image: A person completing the installation by pulling the snow chain over the lower part of the tire.

- Adjust and Center:** Once fully installed, gently adjust the chain to ensure it is centered and fits snugly around the tire. The elastic band will help it self-center as you begin driving.

Image: The textile snow chain fully installed and adjusted on a car tire.

After installation, drive slowly for a short distance (approximately 100 meters) to allow the chains to self-tension and settle. Then, stop and re-check their fit and tension before continuing your journey.

5. OPERATING GUIDELINES

- **Speed Limit:** Do not exceed 40 km/h (25 mph) when driving with the snow chains installed.
- **Road Conditions:** These textile snow chains are designed for use on roads covered with snow and/or ice.
- **Dry Road Use:** The chains can be driven on clear, snow-free roads for a maximum distance of 50 km (31 miles) at a speed not exceeding 40 km/h. Prolonged use on dry asphalt will significantly reduce their lifespan.
- **Vehicle Compatibility:** Compatible with vehicles equipped with ABS and ESP systems. Suitable for 4x4 vehicles, vans, and utility vehicles.
- **Driving Style:** Drive smoothly. Avoid sudden braking, rapid acceleration, and aggressive steering to prevent damage to the chains and maintain control of the vehicle.

6. MAINTENANCE

- **Cleaning:** After each use, remove the snow chains and rinse them thoroughly with cold water to remove any salt,

dirt, or debris.

- **Drying:** Allow the chains to air dry completely before storing them. Do not expose them to direct sunlight for extended periods during drying.
- **Storage:** Store the clean, dry chains in their original storage bag in a cool, dry place, away from direct sunlight and chemicals.
- **Inspection:** Before each installation, inspect the chains for any signs of wear, cuts, tears, or damage. Do not use damaged chains.

7. TROUBLESHOOTING

Reduced Traction:

If you experience reduced traction despite having the chains installed, ensure they are correctly fitted and centered on the tires. Verify that you are driving within the recommended speed limit and on appropriate road conditions (snow/ice).

Unusual Noise or Vibration:

Textile snow chains are designed to be quiet and vibration-free. If you notice unusual noise or vibration, stop immediately and inspect the chains. This could indicate improper installation, damage to the chain, or an obstruction. Re-adjust or remove and re-install if necessary.

Chain Slippage:

If the chain appears to be slipping off the tire, it may not be properly centered or fully installed. Stop the vehicle, re-center the chain, and ensure it covers the entire tire tread. Drive a short distance and re-check the fit.

8. SPECIFICATIONS

- **Product Type:** Textile Snow Chains
- **Brand:** Goodyear
- **Model:** Snow & Road (Size L)
- **Model Number:** GOD8020
- **Material:** 100% Textile
- **Weight:** Approximately 1.7 Kilograms (per set)
- **Dimensions (L x W x H):** 8 x 22 x 38 cm (packaging)
- **Maximum Speed with Chains:** 40 km/h (25 mph)
- **Maximum Distance on Snow-Free Road:** 50 km (31 miles) at max 40 km/h
- **Certifications:** Önorm V 5121 GEPRÜFT, CONFORME B26, DOT Washington Approval
- **EAN/UPC:** 8430046134650
