## SCHLAGE BE489WBCEN622

# Schlage Encode Smart WiFi Deadbolt Lock Instruction Manual

Brand: SCHLAGE | Model: BE489WBCEN622

## PRODUCT OVERVIEW

---

The Schlage Encode Smart WiFi Deadbolt offers advanced security and convenient remote management for your home. It connects directly to your home's Wi-Fi network, eliminating the need for an additional hub. This manual provides essential information for setup, operation, and maintenance of your smart lock.

Figure 1: Front and back view of the Schlage Encode Smart WiFi Deadbolt in Matte Black. The front features a touchscreen keypad and keyhole, while the back shows the thumbturn and battery compartment.

Figure 2: Key features of the Schlage Encode Smart WiFi Deadbolt, including built-in WiFi, remote access, app control, 100 schedule codes, smart home readiness, voice control, built-in alarm, and battery operation without hardwiring.

## SETUP AND INSTALLATION

Proper installation is crucial for the optimal performance and security of your Schlage Encode deadbolt. Please refer to the detailed installation manual for step-by-step instructions. Ensure your door's backset, cross bore, and thickness are measured correctly for proper fit.

History

WORKS WITH **SCHLAGE HOME**

The image shows a hand holding a smartphone displaying the Schlage Home app. The app interface is white with a blue header. The main screen shows a large green padlock icon with a keyhole, indicating the door is unlocked. Below the icon, it says "Status as of just now". At the bottom, there is a blue button labeled "History" and a small user profile icon. The background is a blurred indoor setting. To the right of the phone, there is a list of features. At the bottom right, there is a logo that says "WORKS WITH SCHLAGE HOME".

Figure 5: A smartphone displaying the Schlage Home app interface, showing the lock/unlock status and options to view history or manage settings.

## Voice Control

The Schlage Encode works with popular voice assistants like Amazon Alexa and Hey Google, allowing for convenient voice-activated control of your lock.

The image is a promotional graphic for the Schlage Encode lock, titled "Works with". It features the Schlage logo in the top left corner. The main heading "Works with" is in a large, bold, black font. Below this, there are six horizontal sections, each separated by a thin grey line. Each section has a feature name on the left and a description or logo on the right. The features are: 1. APP CONTROL: A button labeled "WORKS WITH SCHLAGE HOME" with a lock icon. 2. SMART DEVICE CONTROL: "iOS and Android smartphones" with the subtext "Manage and control from app screen". 3. PROPERTY ACCESS MANAGEMENT: "Works with Airbnb" logo. 4. ACCESS CODES: "100 codes" with the subtext "Always on | Reoccurring | Temporary". 5. VOICE CONTROL: "works with alexa" and "works with Hey Google" logos. 6. REMOTE ACCESS: "Remote access out of the box" with the subtext "when connected to your home WiFi network, no hub required". At the bottom of the graphic, there is a grey box with white text: "The Schlage Home App for Apple iOS and Android lets you control and monitor your compatible Schlage Encode Deadbolt from anywhere using your smartphone. Peace of mind in the palm of your hand."

## MAINTENANCE

### Battery Replacement

The lock is powered by 4 AA batteries (included). The Schlage Home app displays the current battery strength, allowing you to monitor and replace batteries before they run out. To change the batteries, simply slide out the battery compartment located on the interior side of the lock.

### General Care

Regularly clean the exterior of the lock with a soft, damp cloth. Avoid abrasive cleaners or solvents that could damage the finish. Ensure the deadbolt travels smoothly into the strike plate to prevent unnecessary wear and battery drain.

## TROUBLESHOOTING

For detailed troubleshooting steps, refer to the User Guide (PDF) provided. Below are some common considerations:

- **Auto-Relock Feature:** While convenient, the auto-relock feature can cause the deadbolt to extend before the door is fully closed, potentially damaging the door frame. Ensure the door is properly aligned or disable this feature if it causes issues.
- **Tamper Alarm:** The lock features a built-in tamper alarm that sounds at 90 decibels if the lock is hit or damaged, or if forced entry is attempted.
- **Invalid Codes:** Repeated entry of invalid codes may temporarily disable the keypad. Refer to the app history for logs of invalid attempts.
