4. Setup and Assembly

The ZINUS Suzanne bed frame is designed for simple assembly, typically taking under an hour. Follow the included step-by-step instructions for best results.

Assembly Steps:

1. **Unpack and Identify Parts:** Lay out all components on a clean, soft surface to prevent scratches. Verify all parts against the included parts list.
2. **Assemble Frame:** Connect the metal frame pieces using the provided hardware and tool. Ensure all connections are snug but do not overtighten until all pieces are aligned.
3. **Install Wooden Slats:** Place the wooden slats across the frame. The slats are designed to provide direct mattress support, eliminating the need for a box spring. Some slats may have Velcro strips to secure them to the frame and prevent shifting.

5. Operating Instructions

The ZINUS Suzanne Platform Bed Frame is designed for straightforward use. Once assembled, simply place your mattress directly onto the wooden slats. No box spring is needed.

- Ensure the mattress is centered and evenly distributed on the slats.
- The low-profile design provides a modern aesthetic and can be beneficial for ease of access, especially for children or pets.

6. Maintenance

Proper maintenance will extend the life and appearance of your bed frame.

- **Cleaning:** For the metal frame, wipe with a soft, damp cloth. For the bamboo footboard, dry clean only as per manufacturer's recommendation. Avoid harsh chemicals or abrasive cleaners.
- **Dusting:** Regularly dust the frame, especially the black metal components, as dust may be more visible on darker surfaces.
- **Tightening:** Periodically check all bolts and connections to ensure they remain tight. Re-tighten if any

looseness is detected to maintain stability and prevent squeaking.

7. Troubleshooting

If you encounter any issues with your bed frame, consider the following common solutions:

- **Squeaking Noises:**
  - Ensure all bolts are securely tightened. Loose connections are a common cause of squeaking.
  - Check if the mattress is properly seated on the slats and not shifting excessively. The Velcro on the slats helps prevent this.
- **Instability/Wobbling:**
  - Verify that the frame is assembled on a flat, even surface.
  - Re-check all connections and ensure they are fully tightened.
