

Keurig K-Cafe Special Edition

Keurig K-Cafe Special Edition Single Serve Coffee, Latte and Cappuccino Maker Instruction Manual

Model: K-Cafe Special Edition

INTRODUCTION

The Keurig K-Cafe Special Edition brewer offers a versatile brewing experience, allowing you to prepare rich coffee, creamy lattes, and frothy cappuccinos using any K-Cup pod. This manual provides detailed instructions for setting up, operating, and maintaining your brewer to ensure optimal performance and enjoyment.

SETUP

Unpacking and Initial Rinse

1. Remove all packaging materials from the brewer.
2. Place the brewer upright on a stable, level surface.
3. Remove the water reservoir and wash it with warm, soapy water. Rinse thoroughly.
4. Fill the water reservoir with fresh water up to the MAX fill line.
5. Place the water reservoir back onto the brewer.
6. Plug the brewer into a grounded outlet.

First Brew Cycle (Cleansing Brew)

Before brewing your first beverage, perform a cleansing brew to prepare the brewer for use.

1. Place a large mug (at least 10 oz) on the drip tray.
2. Lift and lower the brewer handle to close the K-Cup pod holder. Do not insert a K-Cup pod.
3. Press the POWER button to turn on the brewer.
4. Select the 10 oz brew size. The brew button will flash.
5. Press the flashing brew button to start the cleansing brew.
6. Once complete, discard the hot water. The brewer is now ready for use.

OPERATING INSTRUCTIONS

Brewing Coffee

1. Ensure the water reservoir is filled.
2. Place a mug on the drip tray.
3. Lift the brewer handle and insert a K-Cup pod into the K-Cup pod holder.
4. Lower the handle completely to close the lid.
5. Select your desired brew size (6, 8, 10, or 12 oz).
6. (Optional) Press the **STRONG** button for a bolder cup of coffee.
7. Press the flashing brew button to start brewing.

Making Lattes and Cappuccinos

The K-Cafe allows you to brew a concentrated coffee shot and froth milk for specialty beverages.

1. Fill the frother with fresh milk (skim, soy, almond, etc.) to the appropriate fill line for latte or cappuccino.
2. Place the frother lid on securely.
3. Place the frother onto the frother base.
4. Insert a K-Cup pod into the brewer and lower the handle.
5. Place your mug on the drip tray.
6. Press the **SHOT** button to brew a concentrated coffee shot directly into your mug.
7. While the shot is brewing, select either **LATTE** or **CAPP** on the frother base. For iced beverages, select **COLD**.
8. Once the frother cycle is complete, pour the frothed milk over your coffee shot.

Using the Frother

- The frother can be used with various types of fresh milk, including skim, soy, and almond.
- Choose between **LATTE** (hot frothed milk), **CAPP** (hot extra frothy milk), or **COLD** (cold frothed milk) settings.
- The frother is dishwasher safe for easy cleaning.

Water Reservoir

- The large 60 oz water reservoir allows for multiple brews before refilling.
- It is removable for easy refilling and cleaning.

MAINTENANCE

Cleaning the Frother

- The frother cup and lid are dishwasher safe (top rack recommended).
- For manual cleaning, wash with warm, soapy water and rinse thoroughly.

HOW THE K-CUP® POD WORKS

Image: The frother components are shown in a dishwasher, emphasizing their ease of cleaning.

Cleaning the Drip Tray

- The drip tray is removable and can be washed with warm, soapy water.
- Regularly empty and clean the drip tray to prevent overflow and maintain hygiene.

Descaling

- The **DESCALE** indicator light will illuminate when it's time to descale your brewer.

- Follow the descaling instructions provided in the full user manual or on the Keurig website to remove mineral buildup.

TROUBLESHOOTING

- **"ADD WATER" Light On:** Refill the water reservoir. Ensure it is properly seated.
- **"DESCALE" Light On:** Perform a descaling cycle as per the full manual.
- **No Power:** Ensure the brewer is securely plugged into a grounded outlet. Try a different outlet.
- **Coffee Not Brewing:** Check if the water reservoir is filled and properly seated. Ensure the K-Cup pod is correctly inserted and the handle is fully lowered.
- **Frother Not Working:** Ensure the frother is correctly placed on its base and the lid is secure. Check that the milk level is between the MIN and MAX fill lines.

SPECIFICATIONS

Brand	Keurig
