## Key Features:

- **High Efficiency:** Removes up to 25oz (750ml) of moisture per day in optimal conditions (86°F, 80% RH).
- **Large Water Tank:** Equipped with a 2000ml (70 oz) capacity water tank.
- **Auto Shut-Off:** Automatically turns off when the water tank is full to prevent overflow.
- **Ultra-Quiet Operation:** Utilizes Peltier technology for noise levels below 35dB, suitable for bedrooms and offices.
- **Energy Efficient:** Low power consumption of 40W/H.
- **Portable Design:** Compact and lightweight with an integrated handle for easy movement.
- **Easy Clean Filter:** Includes a washable filter to capture large particles.

### 3. SETUP

1. **Unpacking:** Carefully remove the dehumidifier from its packaging. Retain packaging for future storage or transport.
2. **Placement:** Place the unit on a firm, level surface in the desired area. Ensure there is at least 4 inches (10 cm) of space around the air inlets and outlets for proper airflow. Avoid placing it directly against walls or furniture.
3. **Power Connection:** Connect the power adapter to the dehumidifier's power port, then plug the adapter into a suitable electrical outlet. For safety, ensure the outlet is grounded and, if used in a bathroom, a GFCI outlet is recommended.
4. **Initial Check:** Ensure the water tank is correctly inserted and empty before first use.

### 4. OPERATING INSTRUCTIONS

#### Power On/Off:

- To turn the dehumidifier **ON**, press the power button located on the top of the unit. The indicator light will illuminate green.

- To turn the dehumidifier **OFF**, press the power button again. The indicator light will turn off.

## 5. MAINTENANCE

### Emptying the Water Tank:

1. When the indicator light turns yellow, the water tank is full.
2. Turn off the dehumidifier and unplug it from the power outlet.
3. Carefully slide out the water tank from the back of the unit.
4. Pour out the collected water.

5. Slide the empty water tank back into the unit until it clicks into place.
6. Plug in the dehumidifier and press the power button to resume operation.

### **Cleaning the Air Filter:**

The dehumidifier is equipped with an easy-clean filter to maintain optimal performance. Regular cleaning is recommended.

1. Turn off and unplug the dehumidifier.
2. Locate the air filter, typically behind the front grille.
3. Remove the filter.
4. Clean the filter using a soft brush or vacuum cleaner to remove dust and debris. For stubborn dirt, wash it gently with warm, soapy water.
5. Ensure the filter is completely dry before reinserting it into the unit.
6. Reattach the front grille and plug in the dehumidifier to resume operation.

## **6. TROUBLESHOOTING**

Problem	Possible Cause	Solution
Dehumidifier not turning on.	No power, power button not pressed, water tank not properly inserted.	Check power connection, press power button, ensure water tank is securely in place.
Dehumidifier not collecting water.	Humidity level too low, ambient temperature too low, air inlets/outlets blocked, filter dirty.	Ensure room humidity is above 40% and temperature is above 59°F (15°C). Clear any obstructions. Clean the air filter.
Unit is noisy.	Unit not on a level surface, internal component vibration.	Place the unit on a flat, stable surface. If noise persists, contact customer support.
Indicator light is yellow.	Water tank is full.	Empty the water tank and reinsert it.
