Setup

1. Locate the USB Nano Receiver: The receiver is stored in a compartment on the underside of the mouse. Gently slide open the compartment cover to retrieve it.
2. Plug the Receiver into your Computer: Insert the USB Nano Receiver into an available USB port on your desktop, laptop, PC, or Macbook.
3. Turn on the Mouse: On the underside of the mouse, locate the power switch. Slide it to the "ON" position. For RGB lighting, slide it to the "ON/Lights On" position.
4. Automatic Connection: The mouse should automatically connect to your computer. No additional drivers are required for basic functionality.

Operating Instructions

Basic Functions:

- **Left Click:** Primary selection and activation.
- **Right Click:** Opens contextual menus.
- **Scroll Wheel:** Scrolls up and down documents or web pages. Can also be clicked for middle-click functionality.

Advanced Functions:

- **DPI Adjustment:** The DPI button (located behind the scroll wheel) allows you to adjust the mouse sensitivity. Press it to cycle through different DPI settings (800, 1200, 1600 DPI) to match your preference for precision or speed.
- **LED Backlight Control:** The power switch on the underside of the mouse has three positions: OFF, ON (mouse on, lights off), and ON/Lights On (mouse on, lights on). Use this to control the RGB lighting.
- **Side Buttons:** The two side buttons typically function as "Forward" and "Backward" for web browsing or file navigation.

Maintenance

Charging the Mouse:

When the mouse battery is low, the LED lights may dim or the mouse may become unresponsive. Connect the included USB charging cable to the charging port on the front of the mouse and the other end to a USB power source (e.g., computer USB port, USB wall adapter). The mouse features a built-in durable rechargeable battery.

Cleaning:

To clean the mouse, use a soft, dry cloth. For stubborn dirt, a slightly damp cloth can be used, but ensure no moisture enters the internal components. Avoid using harsh chemicals or abrasive materials.

Energy Saving:

The mouse is designed with an energy-saving feature. It will automatically enter sleep mode after 5 minutes of inactivity to conserve battery life. To wake the mouse, simply move it or click any button.

Troubleshooting

Problem	Solution
Mouse not responding.	• Ensure the USB Nano Receiver is securely plugged into a working USB port. • Check if the mouse is turned on (power switch on the underside). • Recharge the mouse if the battery is low. • Try plugging the receiver into a different USB port. • Restart your computer.
LED lights are off.	• Ensure the power switch on the underside is set to the "ON/Lights On" position. • The mouse may be in sleep mode; move or click to wake it. • Recharge the mouse.
Mouse movement is erratic or slow.	• Clean the optical sensor on the underside of the mouse. • Adjust the DPI setting using the DPI button. • Ensure you are using the mouse on a suitable surface (non-reflective, opaque).
