NeuType Full Length Floor Mirror Instruction Manual

Model: JJ00362ZZE-JP006

INTRODUCTION

This manual provides comprehensive instructions for the setup, operation, and maintenance of your NeuType Full Length Floor Mirror. Designed for versatility, this mirror can be used free-standing, leaning against a wall, or wall-mounted to suit your space and preferences. Please read these instructions carefully before installation and use to ensure safe and optimal performance.

SAFETY INFORMATION

- The mirror is constructed with a scatter prevention and explosion-proof membrane. In the event of impact, shattered glass will not spill out, enhancing safety.
- Ensure the mirror is placed on a stable, level surface if used free-standing or leaning.
- If wall-mounting, use appropriate hardware and ensure the wall can support the mirror's weight (approximately 22 pounds / 10 kilograms).
- Keep out of reach of small children if not securely mounted.

PRODUCT FEATURES

- **Dimensions:** 65"L x 22"W, providing a full view.
- **Frame:** Durable aluminum alloy frame with a gold finish, featuring a thin 0.16" front width and wire drawing treatment for a textured look. Resistant to discoloration and environmentally friendly.
- **Glass:** High-definition, copper-free silver mirror with anti-rust treatment. Multi-layered for enhanced protection and durability.
- **Versatile Placement:** Can be used free-standing with its integrated stand, leaned against a wall, or wall-mounted both vertically and horizontally using the pre-installed gourd hooks.

SETUP AND INSTALLATION

Your NeuType Full Length Floor Mirror offers multiple installation options. Choose the method that best suits your needs and space.

Option 1: Free-Standing

The mirror comes with a pre-attached U-shaped bracket stand. Simply unfold the stand to the desired angle and place the mirror on a flat, stable surface. Ensure the stand is fully extended and locked into position for maximum stability.

Option 2: Leaning Against Wall

For a simple and elegant setup, the mirror can be leaned directly against a wall. Ensure the mirror is stable and positioned in a way that prevents it from slipping or falling. The integrated stand can be folded flat against the back of the mirror for this option.

Option 3: Wall-Mounted

The mirror can be wall-mounted either vertically or horizontally. It features pre-installed gourd hooks on the back (one hook on each side of the frame). Use appropriate wall anchors and screws (included) for secure installation. It is recommended to measure and mark the desired positions on the wall before drilling.

OPERATING INSTRUCTIONS

The NeuType Full Length Floor Mirror is designed for immediate use upon proper setup. No complex operation is required.

- Ensure the mirror is securely positioned according to your chosen setup method (free-standing, leaning, or wall-mounted).
- Utilize the full-length reflection for dressing, checking appearance, or enhancing the perception of space in a room.

MAINTENANCE

To maintain the clarity and longevity of your NeuType Full Length Floor Mirror, follow these simple cleaning instructions:

- Use a soft, lint-free cloth and a non-abrasive glass cleaner.
- Spray the cleaner onto the cloth, not directly onto the mirror surface, to avoid streaks and drips.
- Wipe the mirror gently in a consistent direction (e.g., top to bottom) until clean and streak-free.
- Avoid using harsh chemicals or abrasive materials that could damage the mirror's surface or frame.

Figure 6: The mirror's surface is designed for easy cleaning, resisting water spots.

TROUBLESHOOTING

Most issues with a mirror are related to placement or cleaning. Here are some common points:

- **Mirror Appears Unstable:**
 - If free-standing, ensure the U-shaped bracket is fully extended and locked.
 - If leaning, verify the mirror is securely angled against a solid wall and not prone to slipping.
 - If wall-mounted, re-check the installation of hooks and anchors to ensure they are firmly in place and can support the mirror's weight.
- **Streaks or Smudges on Mirror:**
 - Use a clean, lint-free microfiber cloth.
 - Apply glass cleaner to the cloth, not directly to the mirror.

- Wipe in a single direction to avoid re-depositing residue.

- **Distorted Reflection:**

- Ensure the mirror is placed on a flat, even surface or mounted flush against the wall. Uneven surfaces can cause slight distortions.
- The mirror is high-definition, but extreme angles or distances can affect perception.

SPECIFICATIONS

| | |
|----------------------------|---|
| Brand | NeuType |
| Model Number | JJ00362ZZE-JP006 |
