Hotpoint HC5070, HC6525, HC6550

Hotpoint Replacement #3 (9mm) 3/8" Hair Clipper Guide Comb User Manual

For Remington HC5070, HC6525, HC6550 Models

1. PRODUCT OVERVIEW

This document provides instructions for the Hotpoint Replacement #3 (9mm) 3/8" Hair Clipper Guide Comb. This guide comb is designed to assist in achieving consistent hair lengths when used with compatible Remington hair clippers. It is a precision accessory intended for personal grooming and hair cutting applications.

Image 1.1: A bright green #3 (9mm) 3/8 inch hair clipper guide comb. The comb features multiple teeth for guiding hair and has the size markings '3/8"' and '9mm' visible on its base, indicating its cutting length.

2. COMPATIBILITY

This replacement guide comb is specifically engineered for use with the following Remington hair clipper models:

- Remington HC5070
- Remington HC6525
- Remington HC6550

Ensure your clipper model matches one of those listed above for proper fit and function. Using this guide comb with incompatible models may result in improper attachment or unsatisfactory cutting results.

3. SETUP

Follow these steps to correctly attach the guide comb to your Remington hair clipper:

1. **Ensure Clipper is Off:** Before attaching or detaching any accessories, always ensure your hair clipper is turned off and unplugged from its power source for safety.
2. **Align the Comb:** Hold the guide comb with the teeth facing away from the clipper body. Align the attachment clips on the base of the guide comb with the corresponding slots on the clipper blade assembly.
3. **Secure Attachment:** Gently push the guide comb onto the clipper blade until it clicks securely into place. A firm click indicates proper attachment. Do not force the comb, as this may cause damage.
4. **Verify Attachment:** Lightly tug on the comb to ensure it is firmly attached and does not wobble. If it feels loose, remove and reattach it.

4. OPERATING INSTRUCTIONS

Once the guide comb is securely attached, you can begin using your hair clipper. The #3 (9mm) 3/8" guide comb is designed to leave hair approximately 9mm (3/8 inch) in length.

- **Hair Preparation:** Ensure hair is clean, dry, and free of tangles before cutting.
- **Cutting Technique:** Hold the clipper with the guide comb flat against the head. Move the clipper slowly and steadily against the direction of hair growth. Overlapping strokes will help ensure an even cut.
- **Check Progress:** Periodically stop and brush away loose hair to check the length and evenness of the cut.
- **Safety:** Always operate the clipper with care. Avoid pressing too hard against the scalp.

5. MAINTENANCE

Proper maintenance of your guide comb will ensure its longevity and optimal performance:

- **Cleaning After Each Use:** After each use, remove the guide comb from the clipper. Use a small brush (often supplied with clippers) to remove any trapped hair from the comb's teeth.
- **Washing:** The guide comb can be rinsed under cool running water. Ensure it is completely dry before reattaching it to the clipper or storing it. Do not use harsh chemicals or abrasive cleaners.
- **Storage:** Store the guide comb in a clean, dry place, away from direct sunlight and extreme temperatures.

6. TROUBLESHOOTING

If you encounter issues with your guide comb, consider the following:

- **Comb Not Attaching Securely:**
Solution: Ensure the clipper is compatible with this guide comb. Check for any debris or damage in the attachment slots on both the comb and the clipper. Realign and push firmly until a click is heard.
- **Uneven Cut:**

Solution: Verify the comb is fully seated. Ensure hair is clean, dry, and combed through before cutting. Move the clipper slowly and consistently, overlapping strokes.

- **Comb Damage:**

Solution: If the comb's teeth are bent or broken, it should be replaced to prevent uneven cuts or potential injury.

7. SPECIFICATIONS

- **Product Type:** Hair Clipper Guide Comb
- **Size:** #3 (9mm / 3/8 inch)
- **Color:** Green
- **Compatibility:** Remington HC5070, HC6525, HC6550
