MAINTENANCE AND CLEANING

Regular cleaning and maintenance will ensure the longevity and optimal performance of your microwave oven.

Cleaning the Oven Interior:

- Always unplug the oven before cleaning.
- Wipe the interior cavity after each use with a damp cloth to prevent food splatters from drying and sticking.
- For stubborn stains, place a bowl of water with a few lemon slices inside and heat on high for 2-3 minutes. The steam will loosen the grime, making it easier to wipe away.
- The glass turntable and turntable support can be removed and washed in warm soapy water or in a dishwasher. Ensure they are completely dry before placing them back in the oven.
- Do not use abrasive cleaners, steel wool, or harsh chemicals on any part of the microwave.

Cleaning the Exterior:

- Wipe the exterior surfaces with a soft, damp cloth.
- Clean the door and door seals regularly to ensure proper closure and efficient operation.

TROUBLESHOOTING

If you encounter issues with your microwave oven, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Oven does not start.	Power cord not securely plugged in. Door not closed properly. Time not set.	Ensure the power cord is firmly plugged into the outlet. Close the door completely. Set the cooking time using the lower dial.
Food is not heating.	Incorrect power level selected. Cooking time too short.	Increase the power level or cooking time. Ensure the correct function (e.g., Microwave, not Defrost) is selected.
Turntable is noisy or not rotating.	Turntable or support ring not correctly positioned. Debris under the turntable.	Remove the turntable and support ring, clean them, and reposition them correctly. Ensure no food particles are obstructing movement.
Steam accumulating on the door.	Normal during cooking, especially with high-moisture foods.	Wipe the door with a soft cloth after use. This is not a malfunction.

If the problem persists after attempting these solutions, please contact customer support.
