Pica 55010 Master-Set Carpenter's Marking Tools Instruction Manual

Model: 55010 | Brand: Pica

INTRODUCTION

This instruction manual provides essential information for the proper use, maintenance, and care of your Pica 55010 Master-Set Carpenter's Marking Tools. Please read this manual thoroughly before using the product to ensure optimal performance and longevity.

PRODUCT OVERVIEW

The Pica 55010 Master-Set is a comprehensive collection of professional marking tools designed for carpenters and craftsmen. It includes various pencils and markers suitable for precise marking on a wide range of materials such as wood, metal, ceramic, glass, and plastic.

INCLUDED COMPONENTS

Your Pica 55010 Master-Set includes the following items:

- **1 x Storage Bag:** A durable bag for organizing and protecting your marking tools.
- **2 x Pica-Dry Longlife Automatic Pencils (Model 3030):** Versatile mechanical pencils for various surfaces.
- **1 x Pica-Dry Graphite Refills H (Model 4050):** Hard graphite leads for fine and precise marking, ideal for woodworking.
- **1 x Pica-Dry Multi-Use Refills (Model 4020):** Water-soluble leads suitable for smooth surfaces, easily wipeable.
- **1 x Pica-Ink Deep Hole Marker (Model 150/46):** Designed for marking in deep or hard-to-reach areas.
- **1 x Pica Classic Permanent Marker (Model 532/52):** For permanent marking on most surfaces.
- **1 x Product Flyer:** Additional informational leaflet.

Pica-Dry Longlife Automatic Pencil (Model 3030)

1. Loading Leads:

- Unscrew the cap at the top of the pencil.
- Insert a Pica-Dry refill lead (Graphite 4050 or Multi-Use 4020) into the opening.
- Screw the cap back on securely.

2. Using the Integrated Sharpener:

- The cap of the Pica-Dry pencil features an integrated sharpener.
- To sharpen the lead, remove the cap, insert the lead into the sharpening hole, and gently twist the pencil.
- Ensure the lead is extended slightly before sharpening for best results.

Pica-Ink Deep Hole Marker (Model 150/46) & Pica Classic Permanent Marker (Model 532/52)

These markers are ready for use. Simply remove the cap to begin marking. Always replace the cap securely after use to prevent drying out.

OPERATING INSTRUCTIONS

Pica-Dry Longlife Automatic Pencil (Model 3030)

- **Lead Extension:** Press the button at the top of the pencil to extend the lead. Release to lock the lead in place.
- **Marking Surfaces:**
 - **Graphite Leads (4050):** Ideal for dry surfaces like wood, concrete, stone, and paper. Provides clear, precise lines.
 - **Multi-Use Leads (4020):** Suitable for smooth, glossy surfaces such as metal, ceramic, glass, and plastic. Marks can be wiped clean with a damp cloth from non-porous surfaces.
- **Precision Marking:** Use the extended, sharpened lead for accurate marking in tight spaces or for fine lines.

Pica-Ink Deep Hole Marker (Model 150/46)

- **Deep Hole Access:** The extended, fine tip allows marking through drill holes or in recessed areas where standard markers cannot reach.
- **Application:** Press the tip firmly onto the surface to initiate ink flow. Suitable for various materials.

Pica Classic Permanent Marker (Model 532/52)

- **Permanent Marking:** Provides durable, permanent marks on most surfaces.
- **Quick Drying:** The ink is designed to dry quickly to prevent smudging.

MAINTENANCE

- **Refill Replacement (Pica-Dry):** When the lead is too short or depleted, follow the "Loading Leads" steps in the Setup section to replace it.
- **Cleaning:**

- For Pica-Dry Multi-Use leads, marks on non-porous surfaces can be wiped clean with a damp cloth.
- For Pica-Ink and Pica Classic markers, avoid cleaning the tips with solvents as this may damage them. If the tip becomes clogged, gently press it on a scrap piece of material to encourage ink flow.
- **Storage:**
 - Always replace caps securely on all markers and pencils after use to prevent drying out and lead breakage.
 - Store the entire set in the provided storage bag to protect the tools from dust, dirt, and damage.
 - Avoid storing in direct sunlight or extreme temperatures, which can affect lead and ink performance.

TROUBLESHOOTING

- **Lead Breaks Frequently (Pica-Dry):**
 - Ensure the lead is not extended too far when marking.
 - Apply gentle pressure.
 - Check if the lead is properly seated in the mechanism.
- **Faint Marks or No Ink Flow (Markers):**
 - Ensure the cap was securely replaced after previous use.
 - Gently press the tip onto a scrap surface for a few seconds to re-prime the ink flow.
 - If the marker is old or has been left uncapped, it may have dried out and require replacement.
- **Marks Not Wiping Clean (Pica-Dry Multi-Use):**
 - Ensure the surface is non-porous. Multi-Use leads are not designed to be easily removed from porous materials like unfinished wood.
 - Use a damp cloth, not a dry one.

SPECIFICATIONS

| Feature | Detail |
|------------------------|--|
| Brand | Pica |
| Model Number | 55010 (Item model number: Schreiner) |
| Item Weight | 14.3 ounces |
