- **Heat and Moisture:** Protect the surface from direct heat and excessive moisture. Use coasters under drinks and hot pads under warm items.
- **Sunlight:** Avoid prolonged exposure to direct sunlight, which can cause fading or discoloration over time.
- **Drawer Slides:** Periodically check drawer slides for smooth operation. If a drawer sticks, ensure it is properly aligned and free of obstructions.

6. TROUBLESHOOTING

This section addresses common issues you might encounter with your nightstand.

Drawer Sticking or Misalignment:

- **Check for Obstructions:** Ensure no items inside the drawer or along the slides are blocking its movement.
- **Verify Assembly:** If the issue occurs shortly after assembly, re-check the assembly steps for the drawer and its slides. Ensure all screws are tightened appropriately and the drawer is correctly seated on its runners.
- **Leveling:** Ensure the nightstand is placed on a level surface. Uneven flooring can sometimes cause slight misalignment of drawers.

Loose Hardware:
