5. OPERATING (ASSEMBLY TIPS)

Follow these tips to enhance your puzzle-solving experience:

1. **Build the Frame First:** Assemble all the edge pieces to create the outer border of the puzzle. This provides a clear boundary and helps define the puzzle's dimensions.
2. **Work in Sections:** Focus on distinct areas of the image, such as the sky, water, or specific buildings. Use your sorted piles to find pieces that match these sections.
3. **Refer to the Box Image:** Keep the puzzle box lid or the included poster (if any) visible for constant reference to the complete image.
4. **Look for Unique Shapes and Patterns:** Pay attention to the unique cuts of the puzzle pieces and any repeating patterns or color gradients that can help you connect them.
5. **Take Breaks:** If you feel stuck or frustrated, step away from the puzzle for a while. A fresh perspective can often

help you spot connections you missed.

6. MAINTENANCE AND CARE

- **Storage:** Store unassembled puzzle pieces in the original box or a dedicated puzzle storage container to prevent loss or damage.
- **Cleaning:** If pieces become dusty, gently wipe them with a dry, soft cloth. Avoid using water or cleaning solutions, as this may damage the paper and image.
- **Preservation:** Once completed, you can glue the puzzle onto a piece of cardboard and display it. Special puzzle glue (such as Trefl puzzle glue) is available for purchase separately.

7. TROUBLESHOOTING

- **Missing Pieces:** While Trefl puzzles are manufactured with high quality control, if you believe a piece is genuinely missing, please contact Trefl customer support.
- **Pieces Don't Fit:** Ensure you are trying to connect pieces correctly. Sometimes, similar colors or shapes can be misleading. Rotate pieces and try different orientations.
- **Puzzle Not Lying Flat:** This can sometimes occur due to humidity or storage. Once fully assembled, the puzzle should flatten out. If preserving, gluing it to a rigid backing will resolve this.
