OPERATING INSTRUCTIONS

The Delta Woodhurst faucet features a two-handle design for precise control over water temperature and flow.

- **Water Flow:** The faucet delivers a maximum flow rate of 1.2 gallons per minute (GPM), meeting WaterSense standards for water efficiency.
- **Temperature Control:** Use the left handle for hot water and the right handle for cold water. Rotate the handles to adjust the flow and mix water to achieve your desired temperature.
- **Handle Type:** The handles are of a push-button type, providing smooth and reliable operation.

MAINTENANCE

Proper maintenance will ensure the long-lasting beauty and functionality of your Delta Woodhurst faucet.

- **Cleaning:** Clean the chrome finish regularly with a soft, damp cloth. Avoid abrasive cleaners, harsh chemicals, or polishes that could damage the finish. Mild soap and water are generally sufficient.
- **Aerator:** Periodically unscrew and clean the aerator at the end of the spout to remove any mineral buildup that might restrict water flow.
- **General Care:** The faucet is designed for long-lasting performance. If you notice any drips or reduced flow, consult the troubleshooting section or contact customer support.
