New Direction Tackle S9pro 3+1 Set

New Direction Tackle S9pro Bite Alarm System

User Manual for Model: S9pro 3+1 Set

INTRODUCTION

Welcome to the New Direction Tackle S9pro Bite Alarm System. This comprehensive manual provides detailed instructions for setting up, operating, and maintaining your S9pro bite alarms and receiver. Designed for modern anglers, the S9pro system offers advanced features such as remote control, smartphone app integration, Smart Link connectivity, and a convenient nightlight function. Please read this manual thoroughly to ensure optimal performance and longevity of your equipment.

PACKAGE CONTENTS

Upon opening your New Direction Tackle S9pro Bite Alarm System, please verify that all the following components are included:

- 3x S9pro Bite Alarms
- 1x S9r Receiver with Display and Antenna
- 1x EVA Hard Case
- 3x USB-C Charging Cables
- 1x User Manual (this document)

Image: The S9pro Bite Alarm set neatly packed in its durable EVA hard case, showing the three bite alarms, receiver, and charging cables.

PRODUCT OVERVIEW

The S9pro system consists of individual bite alarms and a central receiver, designed for seamless communication and ease of use during fishing. Each component is built with durability and functionality in mind.

Image: The S9pro bite alarms (red, green, blue LEDs) and the S9r receiver with its display and antenna.

Image: Detailed front and side views of the S9r receiver, highlighting its compact design and extendable antenna.

Key Components:

- **S9pro Bite Alarms:** Compact units with adjustable sensitivity, volume, and tone. Features a bright LED indicator and a nightlight function.
- **S9r Receiver:** The central unit that receives signals from the bite alarms. It features a clear display for monitoring alarm status, battery levels, and settings. Allows remote control of alarm functions.
- **USB-C Charging:** Both alarms and receiver are rechargeable via USB-C, offering convenience and environmental benefits.

SETUP

1. **Initial Charge:** Before first use, fully charge all S9pro bite alarms and the S9r receiver using the provided USB-C cables. The 500 mAh battery in each unit provides several weeks of use on a single charge.
2. **Power On:**
 - a. For S9pro Bite Alarms: Press and hold the power button located on the front of the alarm until the LED illuminates.
 - b. For S9r Receiver: Press and hold the power button on the side until the display activates.
3. **Pairing Alarms with Receiver:**

The alarms and receiver are typically pre-paired. If re-pairing is necessary or for adding new alarms:

 - a. Put the S9r receiver into pairing mode (refer to the receiver's on-screen menu for specific instructions).
 - b. Activate the bite alarm you wish to pair. The receiver will detect and link with the alarm.
4. **Installation:** Securely attach the S9pro bite alarms to your rod pod or bank sticks. Ensure they are stable and provide a clear path for the fishing line.

OPERATING INSTRUCTIONS

Adjusting Settings:

The S9pro system allows for comprehensive adjustment of volume, tone, and sensitivity directly from the S9r receiver or via the smartphone app.

- **Volume:** Adjustable from 0 (silent) to 7 levels (0-100dB).
- **Tone:** Multiple sound colours are available for a personalized sound experience.
- **Sensitivity:** Adjustable in 10 levels, from 4mm line pull-off to 88mm, allowing precise detection for various fishing conditions.

To adjust settings via the S9r Receiver:

1. Navigate the receiver's menu using the directional buttons.
2. Select the specific alarm you wish to adjust.
3. Choose the setting (Volume, Tone, Sensitivity) and modify its value. The receiver's display provides clear, text-based menu navigation.

SMART LINK & APP CONTROL

The S9pro system features advanced connectivity options, enhancing your fishing experience.

Smartphone App Control:

Download the official New Direction Tackle app from your device's app store. The app provides an intuitive interface to change all bite alarm settings with ease. This is particularly useful for quick adjustments without needing to interact directly with the receiver's smaller screen.

Smart Link Connectivity:

Smart Link allows your S9pro bite alarms to connect with other New Direction Tackle devices, creating a synchronized fishing ecosystem. Compatible devices include:

- ND Head Torches
- Bivvy Light
- Air Light Sounder
- Smart Watch
- And many other compatible devices.

This integration provides enhanced alerts and convenience, such as your head torch illuminating when a bite occurs.

NIGHTLIGHT FEATURE

The S9pro bite alarms include a nightlight function, providing a constant orientation light during low-light conditions. This feature is available in the Pro version and can be activated via the S9r receiver.

- **Activation:** Access the nightlight setting through the S9r receiver's menu.
- **Functionality:** Once activated, the LED on the bite alarm will light up permanently in its set color, offering visibility to your rod setup in the dark.

Smart Link System allows our devices to interact with each other. You won't find a system like this anywhere else. Our devices can be linked together, which offers incredible and unique features, such as the headtorches switching on when there is a bite indication, or you can switch on your headtorch via the Smart Bite Watch or Smart Band. There are so many ways our devices can interact. This all has been done to enhance your personal fishing experience.

CHARGING

Both the S9pro bite alarms and the S9r receiver are equipped with internal rechargeable Lithium Ion batteries, offering long-lasting performance and convenient charging.

- **Charging Port:** Each unit features a USB-C port for charging.
- **Battery Life:** The 500 mAh battery in each unit is designed to last for several weeks on a single charge, depending on usage.
- **Charging Process:** Connect the provided USB-C cable to the charging port on the device and to a standard USB power source (e.g., wall adapter, power bank, computer USB port). An indicator light will typically show charging status.

TROUBLESHOOTING

If you encounter any issues with your S9pro Bite Alarm System, please refer to the following common solutions:

Problem	Possible Cause / Solution
Alarms not connecting to receiver.	<ul style="list-style-type: none"> • Ensure both alarm and receiver are powered on and fully charged. • Perform the pairing process again as described in the "Setup" section. • Check for obstructions or excessive range (maximum range is 150 meters).
App connectivity issues (e.g., app not connecting to receiver).	<ul style="list-style-type: none"> • Ensure Bluetooth is enabled on your smartphone. • Verify the S9r receiver is powered on and within range. • Update the New Direction Tackle app to the latest version from your app store. • Restart both the app and the receiver.
Receiver display is difficult to read or navigate.	<ul style="list-style-type: none"> • Consider using the smartphone app for easier and more visual control of settings. • Ensure the display is clean and free from glare.
Short battery life.	<ul style="list-style-type: none"> • Ensure units are fully charged before use. • Reduce usage of power-intensive features like continuous nightlight if not needed. • Battery performance can degrade over time; consider contacting support if issues persist after several years of use.
Receiver antenna seems flimsy or gets in the way.	<ul style="list-style-type: none"> • Handle the receiver with care, especially the antenna. • When not in use, retract the antenna if possible or store the receiver in its protective case.
