Amazon Basics Metal Bed Frame Instruction Manual

Model: 07FWTB01-K | Size: King

1. INTRODUCTION

This instruction manual provides detailed guidance for the assembly, operation, maintenance, and troubleshooting of your Amazon Basics Metal Bed Frame. Designed for durability and ease of use, this frame offers robust support for your box spring and mattress.

2. SAFETY INFORMATION

- **Weight Capacity:** The King size bed frame supports up to 700 lbs total (350 lbs per person maximum). Do not exceed this weight limit to prevent damage or injury.
- **Box Spring Required:** This bed frame is designed to be used with a box spring and mattress. A box spring is required for proper support and is sold separately. Using a mattress directly on the frame without a box spring may lead to mattress damage and inadequate support.
- **Pinch Points:** Exercise caution during assembly and when folding/unfolding the frame to avoid pinching fingers or hands.
- **Leg Placement:** Be aware of the placement of the support legs, especially the middle legs, to avoid accidental toe stubbing.
- **Stable Surface:** Assemble and place the bed frame on a flat, stable surface.

3. PACKAGE CONTENTS

Verify that all components are present before beginning assembly:

- Metal Bed Frame sections (pre-assembled and folded)
- Instruction Manual

No additional tools or hardware are required for assembly.

4. SETUP & ASSEMBLY

The Amazon Basics Metal Bed Frame features a simple lock-together system for tool-free assembly. Follow these steps for quick setup:

4.1. Unpacking and Initial Setup

Carefully remove the folded bed frame sections from the packaging. Lay them out on a clean, flat surface where you intend to assemble the bed.

Image: The main components of the Amazon Basics Metal Bed Frame laid out.

4.2. Expanding the Frame

The frame comes in pre-assembled, folded sections. Gently unfold each section until it locks into place. Ensure all locking mechanisms are securely engaged. The side rails will extend, and the support legs will drop down.

4.3. Connecting Sections

Connect the expanded sections by aligning the designated slots and pushing them together until they click and lock. This creates the full perimeter of the bed frame. Ensure all connections are firm and stable.

4.4. Attaching Headboard/Footboard Brackets (Optional)

If you plan to attach a headboard or footboard, ensure the integrated brackets at the ends of the frame are in the upright position. These brackets are designed for easy attachment of most standard headboards/footboards.

Video: A detailed assembly guide for the Amazon Basics Metal Bed Frame, showing each step of the tool-free setup.

5. OPERATING THE BED FRAME

Once assembled, the bed frame is ready to support your box spring and mattress. Simply place your box spring directly onto the frame, followed by your mattress.

Box Spring and Mattress Required (sold separately)

Image: This image clarifies that a box spring and mattress are necessary for the bed frame, both sold separately.

The integrated rubber grippers on the frame's surface help prevent the box spring from sliding, ensuring a stable sleeping surface.

6. MAINTENANCE

To maintain the quality and appearance of your metal bed frame, follow these simple care instructions:

- **Cleaning:** Wipe the frame with a dry cloth to remove dust and debris. Avoid using harsh chemicals or abrasive cleaners, as they may damage the powder-coated finish.
- **Regular Checks:** Periodically check all connections and locking mechanisms to ensure they remain secure. Tighten if necessary.

7. TROUBLESHOOTING

- **Frame Instability:** If the frame feels unstable, ensure all sections are fully unfolded and all lock-together

mechanisms are securely engaged. Check that the legs are fully extended and firmly on the floor.

- **Mattress Sagging/Buckling:** This bed frame requires a box spring for proper mattress support. If your mattress is sagging or buckling, ensure you are using a box spring with the frame.
- **Toe Stubbing:** The support legs are positioned for optimal stability. To avoid stubbing toes, be mindful of the frame's perimeter, especially the middle support legs.

8. SPECIFICATIONS

| Feature | Detail |
|----------------------------|--|
| Size | King |
| Product Dimensions (LxWxH) | 79.5" x 75.5" x 7" |
| Weight Capacity | 700 lbs (350 lbs per person max) |
