WHAT'S IN THE BOX

- Twelve South Compass Pro Stand
- Travel Sleeve

SETUP INSTRUCTIONS

- 1. Unfolding the Stand:** Gently pull the two main legs of the Compass Pro apart until they form a stable A-frame structure. The stand is designed to open smoothly.
- 2. Positioning for Viewing (Easel Mode):** For hands-free viewing, extend the main legs to their full width. Place your iPad or tablet onto the silicone-padded ledges at the bottom of the main legs. This mode is ideal for watching videos, viewing photos, or following recipes. The stand supports both portrait and landscape orientations.
- 3. Positioning for Desktop Use (Active Mode):** For a more comfortable angle suitable for use with an external keyboard, ensure the main legs are open. Locate the secondary leg on the back of the stand and flip it down. This provides a shallower angle, elevating your device slightly for improved ergonomics during typing or interaction.

4. **Positioning for Typing or Sketching:** To achieve a low, angled workstation, similar to an artist's easel, fully extend the main legs and deploy the secondary leg. This position is optimized for typing emails, sketching with a stylus, or other touch-based interactions.
5. **Folding for Portability:** To fold the Compass Pro, collapse the secondary leg back into its housing, then bring the two main legs together until they are flush. Insert the folded stand into the included travel sleeve for protection and easy transport.

MAINTENANCE

To ensure the longevity and optimal performance of your Twelve South Compass Pro, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the metal and silicone surfaces with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can damage the finish and silicone.
- **Storage:** When not in use, fold the stand and store it in the provided travel sleeve to protect it from dust and scratches.
- **Handling:** Avoid applying excessive force when unfolding or folding the stand. The hinges are designed for smooth operation.

TROUBLESHOOTING

If you encounter any issues with your Compass Pro stand, consider the following common solutions:

- **Stand feels unstable:** Ensure all legs are fully extended and locked into their intended positions. Check

that the tablet is centered on the silicone ledges.

- **Difficulty folding/unfolding:** The hinges are designed to be firm for stability. Apply gentle, even pressure. If resistance is unusual, check for any obstructions.
- **Tablet slipping:** Verify that the silicone pads on the ledges are clean and free of debris. The silicone provides grip for your device.
