Best Choice Products 9ft Pre-Lit Snow Flocked Artificial Christmas Tree Instruction Manual

Model: SKY5092

IMPORTANT SAFETY INSTRUCTIONS

- Read all instructions before assembly and use.
- Keep this manual for future reference.
- For indoor use only.
- Do not overload electrical outlets.
- Ensure all light connections are secure before plugging in.
- Keep away from heat sources and open flames.
- Supervise children and pets around the tree.
- Unplug the tree when not in use or before leaving the house.

PACKAGE CONTENTS

Verify that all components are present before beginning assembly:

- Tree Sections (A, B, C - quantity may vary by height)
- Metal Tree Stand
- Power Adapter for Lights

ASSEMBLY INSTRUCTIONS

Follow these steps to assemble your artificial Christmas tree:

1. **Assemble the Tree Stand:** Open the metal tree stand and ensure it is stable on a flat surface. Tighten the eye bolt to secure the base.
2. **Insert the Bottom Section:** Carefully insert the largest tree section (Section A) into the tree stand. Tighten the eye bolt on the stand to secure the section.
3. **Connect Middle Sections:** Insert the next tree section (Section B) into the top of Section A. Ensure

the electrical connections between sections are properly aligned and connected.

4. **Attach the Top Section:** Insert the smallest tree section (Section C) into the top of Section B. Connect the electrical wires.
5. **Fluff the Branches:** Starting from the bottom, gently pull apart and shape each branch to create a full and natural appearance. Work your way up to the top section. This process may release some flocking material, which is normal.
6. **Connect to Power:** Plug the power adapter into a wall outlet. Ensure all lights illuminate.

MAINTENANCE

- Cleaning:** Use a soft, dry cloth to gently dust the branches. Do not use liquid cleaners, as they may damage the flocking or electrical components.
- Light Replacement:** If a light bulb burns out, replace it with a bulb of the same type and wattage to ensure proper operation of the entire strand. Spare bulbs are typically included with the tree.
- Storage:** Before storing, ensure the tree is completely unplugged. Gently compress the branches and disassemble the tree into its original sections. Store in a cool, dry place, preferably in its original box or a dedicated tree storage bag, to protect the flocking and branches.

TROUBLESHOOTING

Problem	Solution
Lights are not working.	Check if the power adapter is securely plugged into the wall outlet and all tree section connections are firm. Inspect for any loose or burnt-out bulbs and replace as necessary.
Tree appears sparse after assembly.	Thoroughly 'fluff' and shape each branch, starting from the innermost tips and working outwards. This process helps fill in gaps and achieve a full appearance.
Flocking material is shedding.	Some shedding of flocking is normal during initial setup and handling. Use a vacuum cleaner to clean up any fallen material. Minimize excessive handling of flocked branches.
Tree is unstable.	Ensure the tree stand is fully opened and placed on a level surface. Verify that the eye bolt on the stand is tightened securely around the bottom tree section.

SPECIFICATIONS

- Brand:** Best Choice Products
- Model Number:** SKY5092
- Product Dimensions:** 59"D x 59"W x 108"H (9ft Height)
- Color:** Green (with Snow Flocking)
- Material:** Metal, Polyvinyl Chloride (PVC)
- Item Weight:** 50.5 Pounds
- Tree Type:** Pine

- **Special Feature:** Flocked, Pre-lit
- **Built-in Light:** Yes
- **Light Color:** Warm White
- **Number of Lights:** 900 (for 9ft tree)
- **Tip Count:** 1346
- **Base Type:** Stand
- **UPC:** 842957115525
