## 2. PACKAGE CONTENTS

Ensure all components are present before beginning assembly:

- Tree Sections (typically 3 sections for a 6ft tree)
- Metal Stand
- Assembly Guide

## 3. ASSEMBLY INSTRUCTIONS

Follow these steps for quick and easy assembly:

### 1. Step 1: Assemble the Base

Unfold the metal stand and ensure it is stable. Insert the bottom section of the tree into the stand and tighten the screws to secure it firmly.

### 2. Step 2: Attach Remaining Sections

Carefully insert the middle section of the tree into the bottom section, aligning the poles. Then, insert the top section into the middle section. Ensure all sections are securely connected.

### 3. Step 3: Fluff the Branches

Starting from the bottom, gently pull apart and spread out each branch and individual tip. Work your way up the tree, shaping the branches to fill any gaps and create a lush, full appearance. This process may take some time but is crucial for the tree's final look.

# EASY ASSEMBLY & FLUFFING

## 6. CARE AND MAINTENANCE

To ensure the longevity of your artificial Christmas tree, follow these care guidelines:

- **Cleaning:** Dust the tree regularly with a soft cloth or duster. For deeper cleaning, use a damp cloth with mild soap and water, then allow it to air dry completely.
- **Branch Adjustment:** Periodically re-fluff branches to maintain a full appearance.
- **Safety:** Keep the tree away from open flames, heat sources, and direct sunlight to prevent damage and discoloration.

## 7. STORAGE

When the holiday season concludes, disassemble your tree and store it properly to protect it for future use:

- **Disassembly:** Reverse the assembly steps. Carefully remove decorations, then detach the tree sections.
- **Compacting:** Gently compress the branches of each section to reduce their volume.
- **Packaging:** Store the tree sections and stand in their original packaging or a dedicated tree storage bag in a cool, dry place.

## 8. TROUBLESHOOTING

If you encounter any issues with your tree, refer to the following common solutions:

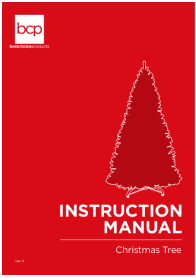

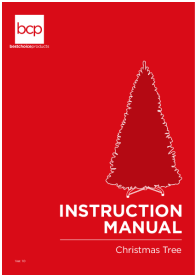

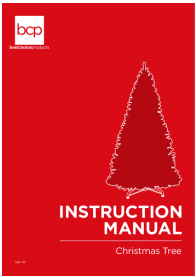

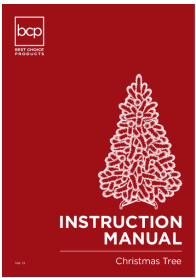

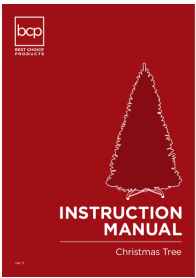

- **Tree Appears Sparse:** This is typically resolved by thorough fluffing of all branches and individual tips. Ensure each tip is spread out to maximize fullness.
- **Instability:** Verify that the metal stand is fully extended and the screws securing the bottom tree section are tightened.
- **Damaged Branches:** While the tree is designed with durable hinges, excessive force during fluffing or storage can cause damage. Handle branches gently.
