

## Best Choice Products SKY5090

# Best Choice Products 7.5ft Pre-Lit Snow Flocked Artificial Christmas Tree

INSTRUCTION MANUAL - MODEL: SKY5090

## 1. Safety Instructions

- **Indoor Use Only:** This artificial Christmas tree is designed for indoor use. Do not use outdoors.
- **Electrical Safety:** Ensure all light connections are secure. Do not overload electrical outlets. Unplug the tree when not in use or before performing any maintenance.
- **Flocking Material:** The snow flocking may shed during initial setup and handling. It is recommended to assemble the tree in an area that can be easily cleaned. Avoid inhaling dust.
- **Stability:** Always ensure the tree is placed on a flat, stable surface and the metal stand is fully extended and locked to prevent tipping.
- **Children and Pets:** Keep small children and pets away from the tree during assembly and disassembly. Small parts or shedding flocking could pose a hazard.
- **Heat Sources:** Keep the tree away from direct heat sources, open flames, or heaters to prevent fire hazards.

## 2. Package Contents

Verify that all components are present before beginning assembly:

- Christmas Tree Sections (typically 3 sections for 7.5ft tree)
- Foldable Metal Stand
- Pre-attached Warm White Incandescent Lights

## 3. Setup Instructions

Follow these steps for easy assembly:

1. **Prepare the Area:** Choose a clear, flat space for your tree. Lay down a sheet or tarp to catch any shedding flocking during assembly.
2. **Assemble the Stand:** Open the foldable metal stand and ensure it is fully extended and stable.

Tighten any screws if necessary.

3. **Insert Bottom Section:** Carefully insert the largest tree section (bottom section) into the stand. Ensure it is firmly seated.
4. **Insert Middle Section:** Place the middle tree section onto the bottom section, aligning the poles.
5. **Insert Top Section:** Place the top tree section onto the middle section.
6. **Connect Lights:** Connect the light cords between each section. Ensure all connections are secure.
7. **Fluff the Branches:** Starting from the bottom, gently pull apart and shape each branch tip to create a full, natural appearance. This process may take 30-60 minutes for optimal results.
8. **Plug In:** Once fully assembled and fluffed, plug the tree into a standard electrical outlet.

**7.5ft**

**52in**

## 4. Operating Instructions (Lights)

Your tree comes pre-lit with warm white incandescent lights. A foot pedal switch controls the light functions:

- **Steady On:** Provides a constant, warm white glow.
- **Twinkle:** Lights will gently twinkle, creating a dynamic effect.
- **Slow Glow:** Lights will slowly fade in and out.

Press the foot pedal repeatedly to cycle through these three light functions.

# Twinkling Lights

WARM  
WHITE  
LIGHTS

# 3 Light Functions

LED lights switch between 3 different modes to provide variety for your tree's beautiful glow

1		STEADY ON - WARM WHITE LIGHTS
2		TWINKLE - WARM WHITE LIGHTS
3		SLOW GLOW - WARM WHITE LIGHTS

*Image: The foot pedal switch used to select between three distinct light functions.*

## 5. Maintenance

- **Cleaning:** To clean the tree, gently dust the branches with a soft cloth or use a vacuum cleaner with a brush attachment on a low setting. Avoid using liquid cleaners, which can damage the flocking or electrical components.
- **Light Replacement:** The incandescent lights are replaceable. If a section of lights goes out, check for loose bulbs or fuses. Refer to the light string's specific instructions for bulb and fuse replacement.
- **Flocking Care:** While durable, excessive handling can cause flocking to shed. Handle branches gently during decoration and disassembly.

## 6. Storage

Proper storage ensures the longevity of your Christmas tree:

1. **Unplug and Disconnect:** Unplug the tree from the power outlet and disconnect all light connections between sections.
2. **Remove Decorations:** Carefully remove all ornaments and decorations.
3. **Compress Branches:** Gently compress the branches of each section back towards the center pole.

4. **Disassemble:** Separate the tree sections and remove the bottom section from the stand. Fold the stand for storage.
5. **Store in Original Box:** Store the tree sections and stand in the original packaging or a dedicated Christmas tree storage bag in a cool, dry place.

## 7. Troubleshooting

- **Lights Not Working:**
  - Check if the tree is properly plugged into a working outlet.
  - Ensure all light connections between tree sections are securely fastened.
  - Inspect individual bulbs for looseness or breakage. Replace any faulty bulbs.
  - Check the fuses in the light string plug. Replace if blown (refer to light string instructions).
- **Excessive Flocking Shedding:**
  - Some shedding is normal, especially during initial setup and handling.
  - Minimize excessive handling of flocked branches.
  - Clean up shed flocking with a vacuum cleaner.
- **Tree Not Stable:**
  - Ensure the metal stand is fully opened and all legs are on a flat surface.
  - Verify that the tree sections are securely inserted into each other and the stand.

## 8. Specifications

Feature	Detail
Brand	Best Choice Products
Model Number	SKY5090
Height	7.5 feet (90 inches)
Diameter	52 inches
Material	Polyvinyl Chloride (PVC)
Color	Green (Snow Flocked)
Light Type	Pre-Lit Warm White Incandescent
Number of Lights	550
Number of Tips	1346
Assembly	Easy 3-section assembly
Base Type	Metal Stand
Item Weight	30.5 Pounds
