

## Tangent TUNER II

# Tangent TUNER II Digital Audio Tuner User Manual

Model: TUNER II

## 1. INTRODUCTION

The Tangent Tuner II is a sophisticated digital audio tuner designed to seamlessly integrate with your existing Hi-Fi system. Combining elegant Danish design with practical functionality, it provides access to a vast array of radio stations through both DAB (Digital Audio Broadcasting) and traditional FM frequencies. Its compact form factor ensures it fits neatly into any audio setup, while the included remote control offers convenient system-wide operation. Equipped with an optical digital output, the Tuner II is ready for connection to modern digital-to-analog converters (DACs) or digital amplifiers, ensuring high-quality audio reproduction.

## 2. KEY FEATURES

- **DAB and FM Radio:** Access a wide selection of digital and analog radio stations.
- **Compact Size:** Designed to fit into smaller spaces, complementing other Hi-Fi components.
- **Remote Control System:** Comprehensive remote control for the tuner and compatible Tangent Hi-Fi components.
- **Six Presets:** Easily save and recall your favorite radio stations.
- **Optical Digital Output:** For high-fidelity connection to external DACs or digital amplifiers.

## 3. SETUP GUIDE

### 3.1 Unpacking

Carefully remove the Tangent Tuner II and all accessories from its packaging. Retain the packaging for future transport or storage.

### 3.2 Rear Panel Overview

Figure 3.1: Rear Panel Connections

The rear panel of the Tuner II features all necessary connection points for integration into your audio system.

### 3.3 Connections

1. **Antenna Connection:** Connect a suitable DAB/FM antenna to the coaxial antenna input on the rear panel. A good quality antenna is crucial for optimal reception.
2. **Audio Output (Analog):** Use RCA cables to connect the 'LINE OUT' (L/R) ports on the Tuner II to an available analog input (e.g., 'AUX', 'TUNER') on your amplifier or receiver.
3. **Audio Output (Digital):** For digital audio transmission, connect an optical cable from the 'OPTICAL OUT' port on the Tuner II to a digital optical input on your DAC or digital amplifier.
4. **Power Connection:** Ensure the voltage selector switch (100-120V or 220-240V) is set correctly for your region's power supply. Connect the power cable to the AC input on the rear panel and then to a wall outlet.
5. **USB (UPGRADES):** This USB port is intended for future firmware upgrades only. Do not connect other devices to this port.

### 3.4 Initial Power On

After making all connections, locate the main power switch on the rear panel and set it to the 'ON' position. The unit will power on and the front display will illuminate.

Figure 3.2: Tuner II integrated into a Hi-Fi system

## 4. OPERATING INSTRUCTIONS

### 4.1 Front Panel Controls

Figure 4.1: Front Panel Controls

- **Power Button** ( ): Press to toggle the unit between standby and operational mode.
- **DAB-FM Button**: Switches between DAB and FM radio modes.
- **INFO Button**: Cycles through various information displays (e.g., station name, program type, signal strength).

- **MENU Button:** Accesses the system menu for settings and options.
- **SCAN Button:** Initiates an automatic scan for available radio stations in the current mode (DAB or FM).
- **BACK Button:** Returns to the previous menu or display.
- **NAVIGATE / SELECTOR Knob:** Rotate to navigate through menus or station lists. Press the knob to confirm a selection (ENTER).

## 4.2 Remote Control Functions

Figure 4.2: Remote Control

The remote control provides full functionality for the Tuner II and can also control other compatible Tangent Hi-Fi components, such as amplifiers and CD players.

- **Power ( )**: Turns the unit on or off.
- **VOL+ / VOL-**: Adjusts the volume of a connected Tangent amplifier (does not control tuner volume directly).
- **Navigation Arrows (◀ ▶ ▲ ▼) & ENTER**: Navigate menus and confirm selections.
- **DAB / FM**: Directly select DAB or FM radio mode.
- **INFO / MENU**: Access information display or system menu.
- **SCAN**: Initiates station scan.
- **BACK**: Returns to the previous screen.
- **Number Buttons (1-6)**: Directly select saved presets.
- **Source Selection Buttons (CD, OPT, TUNE, LINE IN, AUX, BT)**: These buttons are for controlling compatible Tangent amplifiers or other source components. The 'BT' button is for Bluetooth input selection on a compatible amplifier, not for the Tuner II itself.

## 4.3 Tuning and Presets

**DAB Tuning:** In DAB mode, press SCAN to perform a full scan of available digital stations. Use the NAVIGATE knob or remote arrows to browse the station list. Press ENTER to select a station.

**FM Tuning:** In FM mode, press SCAN to auto-tune to the next strong station. Alternatively, use the NAVIGATE knob to manually tune frequencies. Press ENTER to confirm.

**Saving Presets:** Once a station is tuned, press and hold one of the number buttons (1-6) on the remote control until the display confirms the preset has been saved. To recall a preset, simply press the corresponding number button.

## 5. MAINTENANCE

To ensure the longevity and optimal performance of your Tangent Tuner II, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the exterior surfaces of the unit. Do not use liquid cleaners, abrasive cloths, or chemical solvents, as these may damage the finish.
- **Ventilation:** Ensure the unit has adequate ventilation. Do not block any ventilation openings. Avoid placing the unit in enclosed spaces or on soft surfaces that may impede airflow.
- **Placement:** Place the unit on a stable, level surface away from direct sunlight, heat sources, excessive dust, moisture, or

vibrations.

- **Power:** Disconnect the power cable from the wall outlet if the unit will not be used for an extended period.

## 6. TROUBLESHOOTING

If you experience issues with your Tangent Tuner II, consult the following troubleshooting guide:

| Problem                              | Possible Cause                                                                              | Solution                                                                                                                                                                   |
|--------------------------------------|---------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| No power                             | Power cable disconnected; Rear power switch off; Incorrect voltage selector setting.        | Ensure power cable is securely connected. Turn the rear power switch to 'ON'. Verify the voltage selector is set correctly for your region.                                |
| No signal or poor reception (DAB/FM) | Antenna not connected or faulty; Weak signal area; Interference.                            | Check antenna connection. Try repositioning the antenna or using a higher-gain antenna. Perform a new station scan. Move unit away from other electronic devices.          |
| No sound output                      | Audio cables disconnected; Incorrect input selected on amplifier; Amplifier volume too low. | Verify RCA or optical cables are securely connected to both the Tuner II and your amplifier. Select the correct input source on your amplifier. Increase amplifier volume. |
| Remote control not working           | Batteries depleted; Obstruction between remote and unit; Remote not pointed correctly.      | Replace remote control batteries. Ensure there is a clear line of sight between the remote and the Tuner II's front panel sensor. Point the remote directly at the unit.   |
| Cannot save more than 6 presets      | Unit design limitation.                                                                     | The Tangent Tuner II is designed with a maximum of six programmable presets. This is not a fault.                                                                          |

## 7. SPECIFICATIONS

| Feature                | Specification                                      |

**TANGENT CD II**

Stop and take a look around. No matter how you slice it, most of us should agree that life is good. But can you make a good thing better? Sure, because even the improvements that seem small add up over time in a positive way.

Take the new Tangent HiFi II, for example. It consists of three audio components, yet provides a number of connection and playback possibilities that indeed all add up to a lifetime of positive experiences. The AMPSTER BT II amplifier, TUNER II DAB+/FM tuner and CD II CD player work together in perfect harmony.

The CD II Player is a multi-format digital disc player, capable of providing a wealth of opportunities for the listener. The CD II is an outstanding companion for the AMPSTER BT II amplifier.

**FEATURES**

- RCA LINE OUT
- DANISH DESIGN
- SYSTEM REMOTE

## TANGENT CD II

Stop and take a look around. No matter how you slice it, most of us should agree that life is good. But can you make it good a little better? Sure, because even the improvements that seem small add up over time in a positive way.

Take the new Tangent HF II, for example. It consists of two new audio components, yet provides a number of corrections and playback possibilities that indeed add up to a lifetime of positive experiences. The AMPTSTER II is Tangent's LKOR II (Laser II) Laser and CD II II CD player with system to better perform harmony.

The CD II Player is a multi-format digital disc player, capable of providing a wealth of opportunities for the listener. The CD II is an outstanding companion for the AMPTSTER II II Amplifier.

## FEATURES

- OPTICAL OUT
- RCA LINE OUT
- DASH DESIGN
