Rubbermaid RMRT180051

Rubbermaid Roughneck 18 Gallon Storage Tote (6-Pack) Instruction Manual

Model: RMRT180051

INTRODUCTION

The Rubbermaid Roughneck 18 Gallon Storage Tote is designed for durable and versatile storage. This 6-pack provides robust solutions for organizing various items in diverse environments. Constructed from tough, impact-resistant polyethylene, these totes are built to withstand harsh temperature changes and offer secure, stackable storage.

KEY FEATURES

- **Durable Construction:** Made in the USA from tough polyethylene material for reliable long-term use.
- **Extreme Temperature Resistance:** Withstands temperatures from 0°F to 115°F without cracking or buckling, suitable for various climates.
- **Secure Stacking:** Recessed lids allow multiple totes to be securely stacked, maximizing storage space.
- **Snap-Tight Lids:** Lids are designed to protect contents from moisture and pests.
- **Easy to Carry:** Integrated handles facilitate transport.
- **Washable and Reusable:** Totes and lids are easy to clean for repeated use.

SETUP AND ASSEMBLY

The Rubbermaid Roughneck 18 Gallon Storage Totes require no assembly. They are ready for immediate use upon unboxing. Simply remove the lids and begin organizing your items.

OPERATING INSTRUCTIONS

General Storage

Place desired items inside the tote. Ensure items are distributed evenly to maintain balance, especially if the tote will be moved or stacked. The 18-gallon capacity can hold up to 72 pounds of items.

Securing the Lid

Align the lid with the top rim of the tote. Press down firmly around the edges until the lid snaps securely into place. The snap-tight design helps protect contents from moisture, dust, and pests.

Stacking Totes

The recessed design of the lids allows for stable and secure stacking of multiple totes. Place a filled and lidded

tote on a flat, stable surface. Carefully place another lidded tote directly on top, ensuring it aligns with the recessed area of the lower lid. This maximizes vertical storage space without cracking or buckling.

MAINTENANCE

To clean your Rubbermaid Roughneck totes, simply wash them with soap and water. The polyethylene material is easy to wipe down and maintain. Ensure the totes are completely dry before storing items, especially if storing moisture-sensitive materials.

TROUBLESHOOTING

Lid Not Sealing Properly

- **Check for Obstructions:** Ensure no items are protruding above the rim of the tote, preventing the lid from seating correctly.

- **Even Pressure:** Apply firm, even pressure around all four sides of the lid until you hear or feel it snap into place.
- **Inspect Lid and Rim:** Check the lid and the tote's rim for any damage or deformities that might prevent a tight seal.

Tote Appears Less Sturdy When Full

- **Weight Distribution:** Distribute the weight of contents evenly within the tote. Avoid concentrating heavy items in one area.
- **Weight Limit:** Do not exceed the recommended capacity of 72 pounds per tote. Overloading can compromise structural integrity.

SPECIFICATIONS
