Insignia NS-PNKNUM19

Insignia NS-PNKNUM19 Wired Numeric Keypad User Manual

INTRODUCTION

This manual provides instructions for the Insignia NS-PNKNUM19 Wired Numeric Keypad. This device is designed to enhance data entry for accounting functions and spreadsheet applications on both Mac and PC computers. It features a standard numeral arrangement and responsive keys for efficient operation.

SAFETY INFORMATION

Please read these safety instructions carefully before using your new numeric keypad to prevent damage to the device or injury to yourself.

- Do not expose the keypad to water or excessive moisture.
- Avoid extreme temperatures.
- Do not attempt to disassemble or repair the keypad yourself. Refer all servicing to qualified personnel.
- Keep the keypad away from strong magnetic fields.
- Use only with compatible devices as specified in this manual.

FEATURES

- **19 Keys:** Offers a comfortable and complete numeric typing experience.
- **USB Interface:** Enables a simple wired connection to your computer.
- **PC and Mac Compatible:** Designed for use with both Windows and macOS operating systems.
- **Plug-and-Play:** No driver installation required for most operating systems.
- **LED Indicator:** An LED light indicates when the keypad is connected and active.

SETUP

Setting up your Insignia NS-PNKNUM19 Wired Numeric Keypad is a straightforward process.

1. **Connect the Keypad:** Locate an available USB port on your computer (PC or Mac). Plug the USB connector of the numeric keypad into the USB port.
2. **System Recognition:** Your computer should automatically detect and install the necessary drivers. This is a plug-and-play device, so no manual driver installation is typically required.
3. **Verify Connection:** An LED indicator on the keypad will illuminate, confirming that the device is connected and ready for use.

OPERATING INSTRUCTIONS

Once connected, the numeric keypad functions similarly to the numeric section of a full-sized keyboard.

- **Numeric Input:** Press the number keys (0-9) to input numerical data.
- **Arithmetic Operators:** Use the +, -, *, and / keys for basic arithmetic operations.
- **Decimal Point:** The '.' key allows for decimal input.
- **Enter Key:** Functions as a standard Enter key.
- **Num Lock:** The "Num Lock" key toggles the numeric function of the keys. When Num Lock is active (indicated by the LED), the keys function as numbers. When Num Lock is off, some keys may perform alternative functions like Home, End, PgUp, PgDn, or arrow navigation, depending on the application.
- **Back Space:** Deletes the character to the left of the cursor.
- **Del (Delete):** Deletes the character to the right of the cursor or selected text.
- **000 Key:** Provides quick input for three zeros.

MAINTENANCE

To ensure the longevity and optimal performance of your numeric keypad, follow these simple maintenance guidelines:

- **Cleaning:** Use a soft, dry, lint-free cloth to clean the surface of the keypad. For stubborn dirt, slightly dampen the cloth with water or a mild, non-abrasive cleaner. Avoid spraying liquids directly onto the keypad.
- **Storage:** When not in use, store the keypad in a clean, dry environment away from direct sunlight and extreme temperatures.
- **Handling:** Avoid dropping the keypad or subjecting it to strong impacts, which can damage internal components.

TROUBLESHOOTING

If you encounter issues with your Insignia NS-PNKNUM19 Wired Numeric Keypad, refer to the following common solutions:

Problem	Solution
Keypad is not recognized by the computer.	<ul style="list-style-type: none"> • Ensure the USB cable is securely plugged into both the keypad and the computer's USB port. • Try plugging the keypad into a different USB port on your computer. • Restart your computer. • If using a USB hub, try connecting the keypad directly to the computer.
Keys are not responding or typing incorrect characters.	<ul style="list-style-type: none"> • Check the Num Lock status. Press the "Num Lock" key to toggle it on or off. The LED indicator should reflect its status. • Ensure no other programs are interfering with keyboard input. • Disconnect and reconnect the keypad.
LED indicator is off.	<ul style="list-style-type: none"> • Verify the keypad is properly connected to a powered USB port. • The LED typically indicates Num Lock status. If it's off, press the "Num Lock" key. If it remains off, refer to the "Keypad is not recognized" solutions.
