

BLACK+DECKER 90567075

BLACK+DECKER OEM 90567075 String Trimmer Lever Assembly

Official Instruction Manual

1. INTRODUCTION

This instruction manual provides essential information for the proper installation and maintenance of the BLACK+DECKER OEM 90567075 String Trimmer Lever Assembly. This genuine replacement part is designed to restore the functionality of your compatible BLACK+DECKER string trimmer.

2. COMPATIBILITY

The 90567075 Lever Assembly is compatible with the following BLACK+DECKER string trimmer models:

- LST201 Type 1
- LST201 Type 2

Always verify your trimmer's model number before purchasing or installing replacement parts to ensure proper fit and function.

3. SAFETY INFORMATION

Before attempting any installation or maintenance, always ensure the string trimmer is:

- **Turned OFF** and unplugged from its power source (battery removed for cordless models).
- Allowed to cool down if it has been recently operated.

Wear appropriate personal protective equipment (PPE), such as gloves and eye protection, during installation. Handle small parts carefully to avoid loss or damage.

4. INSTALLATION INSTRUCTIONS

The 90567075 Lever Assembly is designed for easy installation. Follow these general steps. Specific disassembly and reassembly procedures may vary slightly by trimmer model. Refer to your trimmer's original user manual for detailed instructions on accessing the lever assembly.

1. **Prepare the Trimmer:** Ensure the trimmer is powered off and disconnected from its power source. Place it on a clean, stable surface.
2. **Access the Lever Assembly:** Depending on your model, you may need to remove the spool cap, spool, and potentially other components to expose the existing lever assembly within the trimmer head.
3. **Remove the Old Lever:** Carefully identify and remove the broken or worn lever. Note its orientation for correct installation of the new part.
4. **Install the New Lever:** Position the new BLACK+DECKER OEM 90567075 Lever Assembly into its designated slot. Ensure it seats properly and moves freely as intended.
5. **Reassemble:** Reinstall any components removed in step 2, such as the spool and spool cap, ensuring all parts are securely fastened.
6. **Test Functionality:** Reconnect power to the trimmer and perform a brief test to ensure the line feeding mechanism operates correctly.

Figure 1: The BLACK+DECKER OEM 90567075 String Trimmer Lever Assembly. This image shows the black plastic lever with a brass-colored pivot point, designed to engage with the string trimmer's feeding mechanism.

5. MAINTENANCE

The 90567075 Lever Assembly is a durable component, but regular inspection can prolong its lifespan and ensure optimal trimmer performance.

- **Cleanliness:** Periodically clean the area around the lever assembly to prevent buildup of grass, dirt, and debris, which can impede its movement.
- **Inspection:** Before each use, or during spool replacement, visually inspect the lever for signs of wear, cracks, or damage. Replace the lever if any significant wear or damage is observed.
- **Lubrication:** No specific lubrication is typically required for this plastic component. Avoid applying lubricants that may attract dirt or degrade the plastic.

6. TROUBLESHOOTING

If your string trimmer is experiencing issues with line feeding after replacing the lever, consider the following:

- **Line Not Advancing:** Ensure the new lever is correctly seated and moves freely. Check for any obstructions (e.g., tangled line, debris) within the spool housing. Verify that the string itself is not tangled or improperly wound on the spool.
- **Incorrect Lever Orientation:** Double-check that the lever was installed in the correct orientation as per the original part or your trimmer's manual.
- **Other Component Issues:** If the problem persists, the issue might lie with other components of the trimmer head, such as the spring, spool, or motor.

If you are unable to resolve the issue, contact BLACK+DECKER customer support or a qualified service technician.

7. SPECIFICATIONS

Attribute	Detail
Part Number	90567075
Brand	BLACK+DECKER
Material	Plastic
Color	Black
Dimensions (L x W)	1.5" x 0.75"
Item Weight	0.16 ounces
Special Feature	Easy to Install

8. WARRANTY AND SUPPORT

As an OEM replacement part, the 90567075 Lever Assembly is covered by BLACK+DECKER's standard warranty for genuine parts. For specific warranty details or technical support, please refer to the warranty information provided with your original BLACK+DECKER string trimmer or visit the official BLACK+DECKER website:

www.blackanddecker.com

When contacting support, have your trimmer's model number and the part number (90567075) ready.
