OPERATING INSTRUCTIONS

1. Power On/Off

To turn the timer on or off, use the dedicated ON/OFF switch located on the side of the device. Turning it off helps conserve battery life.

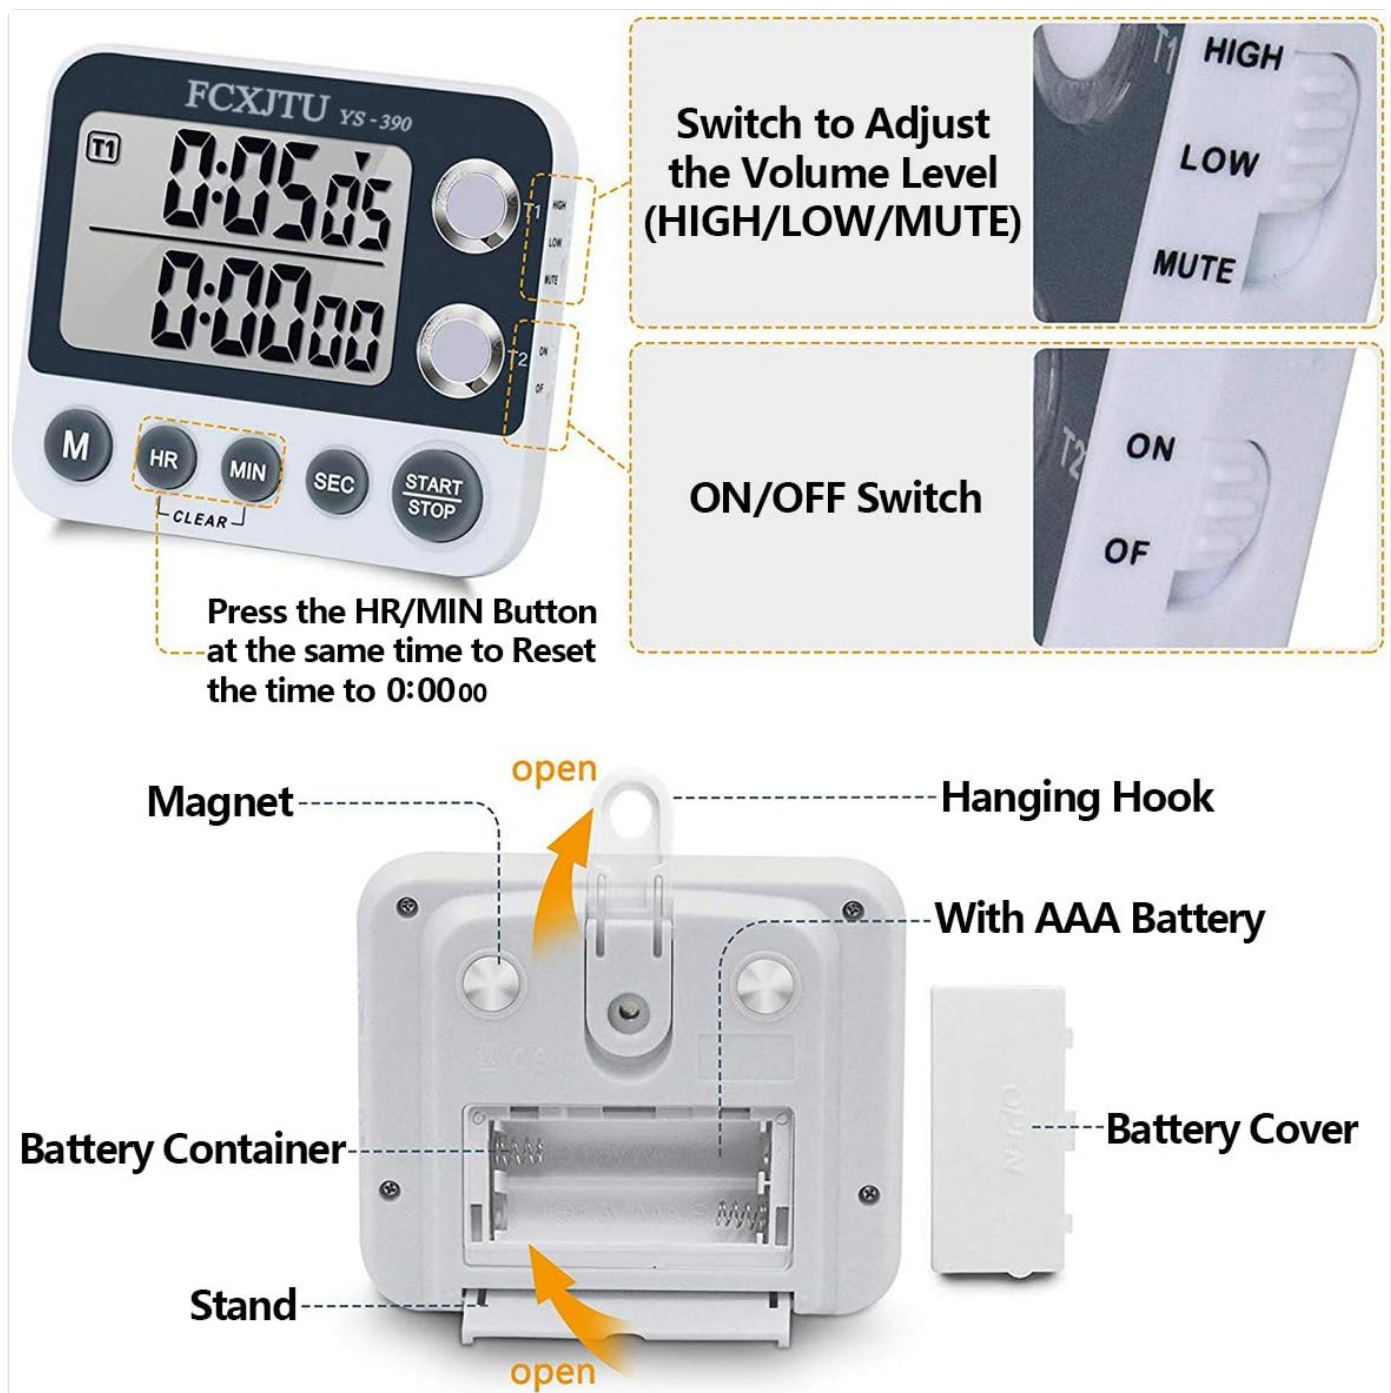

Figure 4: Location of the ON/OFF switch.

2. Setting the Timer (Countdown/Count-up)

The timer features two independent timers (T1 and T2) that can operate simultaneously. It supports both countdown and count-up functions, up to 99 hours, 59 minutes, and 59 seconds.

1. **Select Timer:** Press the T1 or T2 button on the right side of the display to select which timer you wish to set or activate.
2. **Set Time:** Use the **HR** (Hour), **MIN** (Minute), and **SEC** (Second) buttons to set the desired time. Press and hold these buttons for rapid adjustment.
3. **Start/Stop:** Press the **START/STOP** button to begin or pause the selected timer.
4. **Clear:** To clear a set time, press the **HR** and **MIN** buttons simultaneously while the timer is paused.

3. Memory Function

The memory function allows you to quickly recall a previously set time.

1. **Save Memory:** After setting a desired time, ensure the timer is paused. The timer will automatically remember the last set time.
2. **Recall Memory:** When the timer is paused, press the **M** (Memory) button to instantly recall the saved time.

4. Adjustable Volume and LED Alert

The timer features an adjustable alarm volume and a visual LED alert.

- **Volume Adjustment:** Use the switch on the side of the timer to select between HIGH, LOW, or MUTE alarm volumes.
- **LED Alert:** When a countdown finishes, the timer will sound an alarm and flash a red LED light to provide a clear visual alert.

MAINTENANCE

1. Cleaning

To clean your timer, wipe it with a soft, damp cloth. Do not use abrasive cleaners or immerse the device in water.

2. Battery Replacement

When the display dims or the timer functions become erratic, it's time to replace the batteries. Follow the battery

installation steps in the "Setup" section.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Timer not turning on or display is dim.	Low or dead batteries.	Replace with new AAA batteries. Ensure correct polarity.
Alarm is too quiet or too loud.	Volume setting is incorrect.	Adjust the volume switch on the side of the timer to HIGH, LOW, or MUTE as desired.
Timer does not respond to button presses.	Temporary software glitch or low battery.	Remove and reinsert batteries to reset the device. If issue persists, replace batteries.
Magnetic back does not hold securely.	Surface is not sufficiently magnetic or too smooth.	Ensure the surface is flat and metallic. Consider using the retractable stand or hanging hook if magnetic attachment is insufficient.

SPECIFICATIONS
