2. SAFETY INFORMATION

WARNING: Ensure proper installation and avoid overloading with heavy items. Failure to do so may result in damage to the product or personal injury.

- Always use appropriate tools and follow all steps in the assembly and installation guide.
- Verify that the mounting surface is strong enough to support the weight of the shelf and its contents.
- Do not exceed the recommended weight capacity for each shelf.
- Keep small parts away from children during assembly to prevent choking hazards.

3. PACKAGE CONTENTS

Please check that all components are present before beginning assembly:

5. INSTALLATION

The Sorbus 3-Tier Floating Shelf is designed for wall mounting. It can be hung vertically or horizontally to suit your space and aesthetic preferences. Mounting hardware is included.

1. **Choose Location:** Select a suitable wall location. Consider the overall dimensions of the shelf (approximately 23.62" L x 6" W x 23.62" H) and ensure there is enough clear space.
2. **Mark Drilling Points:** Use a level and a pencil to accurately mark the drilling points for the mounting

hardware on the wall. Refer to the dimensions image for precise measurements.

3. **Drill Holes:** Drill pilot holes at the marked points. Use appropriate drill bits for your wall type (e.g., drywall, stud, concrete). If drilling into drywall without a stud, use the provided wall anchors.
4. **Insert Anchors (if needed):** Gently tap wall anchors into the pilot holes until flush with the wall surface.
5. **Install Screws:** Drive the mounting screws into the anchors or studs, leaving a small portion of the screw head exposed to hang the shelf.
6. **Mount Shelf:** Carefully align the keyhole slots on the back of the shelf with the exposed screw heads. Slide the shelf down to secure it firmly against the wall. Ensure the shelf is level and stable.
