Package Contents

Your Supershieldz Tempered Glass Screen Protector package includes:

- 2 x Supershieldz Tempered Glass Screen Protectors for TCL LX (A502DL)
- Cleaning Cloth
- Dust Removal Sticker
- Alcohol Wipe

Installation Guide

Follow these steps carefully for a bubble-free installation. Perform installation in a clean, dust-free environment.

1. **Clean the Screen:** Use the included alcohol wipe to thoroughly clean your phone's screen. Ensure all smudges, dirt, and oils are removed.
2. **Dry the Screen:** Use the cleaning cloth to dry the screen completely. Ensure no lint or moisture remains.
3. **Remove Dust:** Use the dust removal sticker to dab the screen and pick up any remaining dust particles. Inspect the screen carefully under good lighting to ensure it is perfectly clean.

4. **Align the Protector:** Carefully peel off the protective film from the adhesive side of the tempered glass screen protector. Hold the protector by its edges and align it precisely with your phone's screen, paying attention to cutouts for the speaker, camera, and home button (if applicable).
5. **Apply the Protector:** Once aligned, gently lower the screen protector onto the phone's screen. The adhesive will begin to spread automatically.
6. **Remove Bubbles:** If any small bubbles appear, gently push them towards the edges of the screen using the cleaning cloth or a soft card. Most bubbles should disappear on their own within 24-48 hours.

Note: *For best results, avoid touching the adhesive side of the screen protector during installation.*

Usage and Care

Once installed, your Supershieldz Tempered Glass Screen Protector requires minimal special care. It is designed to protect your device during normal use.

- Avoid placing your phone with sharp objects (keys, coins) in pockets or bags to prevent potential damage to the screen protector or phone.
- While the protector is highly durable, extreme impacts can still cause damage.

Maintenance

To clean your screen protector, gently wipe it with a soft, lint-free cloth. For stubborn smudges or fingerprints, a slightly damp cloth or a screen cleaning solution designed for electronics can be used. Avoid harsh chemicals or abrasive materials.

Troubleshooting

Bubbles After Installation:

- **Small Bubbles:** Many small bubbles will dissipate naturally within 24-48 hours. You can gently push them towards the edges with a soft cloth.
- **Large Bubbles/Dust:** If a large bubble persists or you see a dust particle, carefully lift the nearest corner of the screen protector slightly (using a thin card or fingernail) and use a dust removal sticker to lift the dust. Re-apply the protector slowly.

Screen Protector Not Sticking Properly:

- Ensure the screen was thoroughly cleaned and free of oil, dirt, or moisture before application.
- Check for any bends or damage to the screen protector itself.

Specifications

Feature	Detail
