Lxcom Lighting B07KT1ZC63

Lxcom Lighting 280 LED Fairy String Lights User Manual

Model: B07KT1ZC63

INTRODUCTION

Thank you for choosing Lxcom Lighting Fairy String Lights. This product features 14 strands of ultra-thin copper wire, each 6.56 feet (2 meters) long, with a total of 280 warm white LEDs. Designed for both indoor and outdoor decorative lighting, these lights offer flexibility for various applications. This manual provides essential information for safe installation, operation, and maintenance.

Image: Lxcom Lighting Fairy String Lights draped over a decorative branch, showcasing the warm white illumination. Note that the decorative branch is not included with the product.

SAFETY INFORMATION

- **Power Source:** Use only with the provided corded electric power source. Ensure the voltage matches your local power supply.
- **Water Resistance:** The lights are rated IP44 waterproof, suitable for outdoor use and resistant to splashing water. However, the power adapter should be protected from direct water exposure. Do not submerge the lights or adapter in water.
- **Installation:** Do not install near heat sources or in areas with flammable materials. Avoid sharp objects that could damage the copper wire.
- **Children and Pets:** Keep out of reach of small children and pets to prevent entanglement or ingestion of small parts.
- **Damage:** If the product or power cord is damaged, discontinue use immediately and contact customer support. Do not attempt to repair.

PACKAGE CONTENTS

Verify that all components are present in your package:

- 14 Strands of Lxcom Lighting Fairy Lights (280 LEDs total)
- 1 Power Adapter (Corded Electric)

Note: Decorative items such as tree branches are not included.

SETUP INSTRUCTIONS

1. **Unpack:** Carefully remove the fairy lights and power adapter from the packaging.
2. **Uncoil:** Gently uncoil the 14 strands of copper wire. To prevent tangling, it is recommended to hold all ends together and gently pull one strand at a time.
3. **Placement:** Position the lights in your desired location. The flexible copper wire allows for easy bending and shaping around objects like branches, railings, or within decorative arrangements.
4. **Connect Power:** Connect the fairy lights to the power adapter. Ensure the connection is secure.
5. **Plug In:** Plug the power adapter into a standard electrical outlet. For outdoor use, ensure the outlet is weather-protected or use a suitable outdoor extension cord with a protected connection.

OPERATING INSTRUCTIONS

Once plugged in, the lights will illuminate. This model features a simple plug-and-play operation. If a remote control was included (check your specific package), refer to its instructions for changing modes or setting timers. The product specifications mention a "Remote Control" as a controller type, but no remote is explicitly listed in "Included Components" or shown in package images. If a remote is present, it typically allows for:

- **Power On/Off:** To turn the lights on or off.
- **Mode Selection:** To cycle through various lighting effects (e.g., steady on, twinkle, fade).
- **Timer Function:** To set the lights to automatically turn on and off at specific intervals.

If no remote is included, the lights will typically operate in a single, steady-on mode when plugged in.

MAINTENANCE

- **Cleaning:** Disconnect from power before cleaning. Wipe the lights and wires gently with a soft, dry cloth. Do not use harsh chemicals or abrasive cleaners.
- **Storage:** When not in use, carefully coil the lights to prevent tangling and store them in a cool, dry place away from direct sunlight and moisture.
- **Inspection:** Periodically inspect the wires and LEDs for any signs of damage.

TROUBLESHOOTING

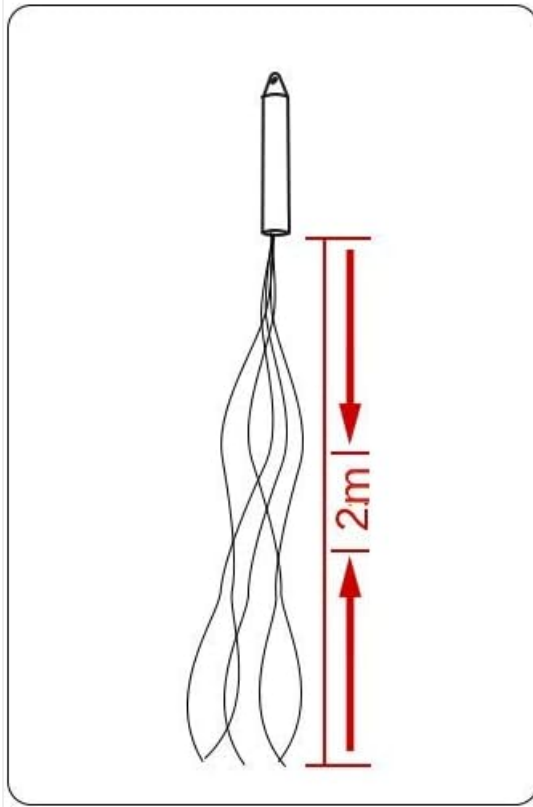

- **Lights Not Turning On:**
 - Ensure the power adapter is securely plugged into a working electrical outlet.
 - Check if the connection between the lights and the adapter is firm.
 - Verify that the power outlet is functional by testing it with another device.
- **Some LEDs Not Lighting Up:**
 - Due to the design, individual LEDs are not replaceable. If a small number of LEDs fail, the rest of the string should continue to function. Significant failure may indicate a defect; contact support.
- **Lights Flickering:**
 - Check for loose connections at the power adapter or outlet.
 - Ensure the power supply is stable.
