OPERATING INSTRUCTIONS

Volume Control

The in-line audio control unit on the detachable braided cable allows you to adjust the headset's volume. Slide the volume wheel up or down to increase or decrease the audio output.

Microphone Mute

To mute or unmute the microphone, use the switch located on the in-line audio control unit. Slide the switch to the 'microphone off' position to mute your voice, and slide it back to the 'microphone on' position to unmute.

Wearing the Headset

Adjust the headband to ensure a comfortable and secure fit. The earcups should fully enclose your ears. Position the flexible microphone boom approximately two fingers' width from your mouth for optimal voice pickup.

MAINTENANCE AND CARE

- **Cleaning:** Use a soft, dry cloth to wipe down the earcups and headband. For deeper cleaning, a slightly damp cloth can be used, but ensure no moisture enters the speaker grilles or microphone.
- **Storage:** When not in use, store the headset in the provided travel bag to protect it from dust and scratches. Avoid storing in extreme temperatures.
- **Cable Care:** Avoid sharp bends or excessive pulling on the cables to prevent internal damage.
- **Microphone Care:** Handle the detachable microphone gently when attaching or detaching.

TROUBLESHOOTING

Issue	Possible Solution
No audio from headset	Ensure the 3.5mm cable is fully inserted into both the headset and the device. Check the in-line volume control and ensure it is not at minimum. Verify device audio settings (e.g., default playback device on PC). Test the headset with another device to rule out device-specific issues.
Microphone not working	Ensure the microphone is fully attached to the headset. Check the in-line microphone mute switch and ensure it is not muted. Verify device microphone settings (e.g., default recording device on PC, microphone permissions). If using the Y-splitter on PC, ensure both green (headphone) and pink (microphone) jacks are correctly connected.
Sound quality is poor or distorted	Ensure the cable connections are secure. Try adjusting the volume on both the headset and the device. Test with another audio source to determine if the issue is with the headset or the source device.
