SETUP AND ASSEMBLY

The Kamen Rider Zi-O Figure-Rise Standard Model Kit requires assembly. All parts are designed for snap-fit construction, eliminating the need for adhesive. The kit utilizes a unique runner technology that provides multiple colors on a single runner, simplifying color recreation.

- **No Glue Required:** All components are designed to fit together securely without the use of glue.
- **Easy Color Recreation:** Parts are molded in appropriate colors, reducing the need for painting.
- **Assembly Time:** Approximately 3 hours are recommended for complete assembly.

Assembly Steps Overview

1. Carefully detach parts from the runners using a hobby nipper or cutter. Avoid twisting or pulling to prevent damage.
2. Identify corresponding parts using the included instruction booklet.
3. Assemble sections following the numerical order provided in the manual. Pay close attention to part orientation.
4. Ensure all connections are firm and secure.

OPERATING AND POSING

Once assembled, the Kamen Rider Zi-O Figure-Rise Standard model offers a wide range of articulation for dynamic posing. Handle the figure with care to avoid stressing joints or detaching parts.

- **Articulation:** The figure features multiple points of articulation in the limbs, torso, and head, allowing for various action poses.
- **Ziku Driver:** The Ziku Driver on the waist is designed to rotate, replicating the show's transformation sequence.
- **Accessories:** The kit includes the Jikan Girade weapon, which can be configured into two modes: Gun Mode and Sword Mode.

MAINTENANCE

Proper maintenance ensures the longevity and appearance of your model kit.

- **Cleaning:** Use a soft, dry cloth or a soft brush to gently remove dust. Avoid abrasive cleaners or solvents, as they may damage the plastic or painted surfaces.
- **Storage:** Store the model in a cool, dry place away from direct sunlight and extreme temperatures to prevent discoloration or warping.
- **Handling:** When moving or posing the figure, hold it by the main body rather than by delicate parts or accessories to prevent breakage.

TROUBLESHOOTING

If you encounter issues during assembly or with the finished model, refer to these common solutions.

- **Loose Parts:** If a part feels loose, gently press it firmly into place. For persistent looseness, a small amount of clear hobby cement (not included) can be applied to the inner surface of the joint, allowing it to dry completely before reassembly.
- **Parts Not Fitting:** Ensure you are using the correct parts for the section you are assembling. Refer

to the instruction manual's diagrams. Sometimes, a small amount of plastic flash may prevent a perfect fit; carefully trim it with a hobby knife.

- **Broken Parts:** If a part breaks, attempt to reattach it using plastic cement designed for model kits. For significant damage or missing parts, contact Bandai Spirits customer support.
