

Puig 9873H

Puig 9873H Naked New Generation Sport Windscreen User Manual

Model: 9873H | Brand: Puig

1. PRODUCT OVERVIEW

The Puig 9873H Naked New Generation Sport Windscreen is designed to enhance the aerodynamics and aesthetics of your motorcycle. Constructed from durable 3mm methacrylate, it offers high resistance to impacts and effective wind deflection. This windscreen is part of Puig's New Generation Sport line, developed to integrate seamlessly with various motorcycle styles while providing optimal performance.

2. COMPATIBILITY

This Puig 9873H windscreen model is specifically compatible with the following Suzuki GSX-S125 motorcycle models:

- Suzuki GSX-S125 (2017)
- Suzuki GSX-S125 (2018)
- Suzuki GSX-S125 (2019)
- Suzuki GSX-S125 (2020)

Always verify the compatibility with your specific motorcycle model and year before installation.

3. FEATURES

- **High-Quality Material:** Manufactured from 3mm methacrylate, ensuring high resistance to potential impacts and excellent aerodynamic capability against the wind.
- **Aerodynamic Performance:** The product has undergone rigorous wind tunnel testing, yielding optimal results for improved airflow and reduced wind pressure on the rider. Puig provides detailed studies to support these findings.
- **Motorcycle Specific Design:** Puig has considered the diversity of motorcycle styles and offers a model for each of the most common motorcycles, ensuring a precise fit and integrated aesthetic.

- **Color Variety:** Available in a range of colors, including Light Smoke (Fumée Claire), to complement the aesthetic line of your motorcycle.

4. SETUP AND INSTALLATION

This section provides general guidelines for installing the Puig 9873H windscreen. Specific instructions may vary slightly depending on your motorcycle model. Always refer to any included manufacturer-specific mounting instructions or consult a qualified mechanic if unsure.

1. **Gather Tools:** Ensure you have the necessary tools, which typically include Allen wrenches, screwdrivers, and possibly a torque wrench.
2. **Prepare Motorcycle:** Park your motorcycle on a stable, level surface. Turn off the engine and ensure it is cool.
3. **Remove Existing Components (if applicable):** If replacing an existing windscreen or fairing, carefully remove the old components, keeping track of all screws and mounting hardware.
4. **Position the Windscreen:** Align the Puig 9873H windscreen with the mounting points on your motorcycle's front fairing or headlight assembly.
5. **Attach Mounting Hardware:** Secure the windscreen using the provided mounting hardware. Start by hand-tightening all screws to ensure proper alignment.
6. **Final Tightening:** Once aligned, progressively tighten all screws. Avoid over-tightening, which can damage the methacrylate or mounting points. If a torque wrench is available, follow the manufacturer's recommended torque specifications.
7. **Inspect Installation:** After installation, gently check the windscreen for stability. Ensure it is securely mounted and does not wobble.

Note: Professional installation is recommended if you are unfamiliar with motorcycle component installation.

5. USAGE AND BENEFITS

The Puig 9873H windscreen is designed to improve your riding experience by:

- **Reducing Wind Pressure:** Diverts airflow over and around the rider, significantly reducing wind blast on the chest and helmet, especially at higher speeds.
- **Enhancing Aerodynamics:** Contributes to a more stable ride by optimizing the motorcycle's aerodynamic profile.

- **Improving Comfort:** Less wind fatigue allows for longer and more comfortable rides.
- **Aesthetic Upgrade:** The "Naked New Generation Sport" design adds a sleek and modern look to your motorcycle.

6. MAINTENANCE AND CARE

To ensure the longevity and clarity of your Puig 9873H methacrylate windscreen, follow these care instructions:

- **Cleaning:** Use only mild soap and water with a soft, non-abrasive cloth or sponge. Avoid harsh chemicals, ammonia-based cleaners (like window cleaner), or abrasive materials, as these can scratch or damage the methacrylate.
- **Drying:** Gently dry the windscreen with a clean, soft microfiber cloth to prevent water spots.
- **Scratch Prevention:** Avoid wiping the windscreen when dry or dusty, as this can cause scratches. Always rinse off loose dirt first.
- **Storage:** When not in use for extended periods, store the motorcycle in a shaded area or cover the windscreen to protect it from prolonged exposure to direct sunlight and extreme temperatures.

7. TROUBLESHOOTING

If you encounter any issues with your Puig 9873H windscreen, consider the following:

- **Windscreen Wobbling:**
 - Check all mounting screws to ensure they are securely tightened.
 - Verify that all mounting hardware is correctly installed according to the instructions.
- **Excessive Wind Noise/Buffering:**
 - While the windscreen is designed to reduce wind, individual rider height and helmet type can influence airflow.
 - Ensure the windscreen is installed at the correct angle (if adjustable).
- **Reduced Visibility (Scratches/Haze):**
 - Clean the windscreen thoroughly using only recommended methods (mild soap and water, soft cloth).
 - Avoid using abrasive cleaners or cloths that can cause permanent damage.
 - For deep scratches, professional repair or replacement may be necessary.

If problems persist, contact Puig customer support or your authorized dealer.

8. SPECIFICATIONS

| Specification | Detail |
|---------------|--------|
| Model Number | 9873H |
| Brand | Puig |

| | |
|---|----------------------------|
| Material | 3mm Methacrylate |
| Color | Light Smoke (Fumée Claire) |
| Item Weight | 780 g |
| Product Dimensions (L x W x H) | 31 x 33.5 x 17.5 cm |
| Vehicle Service Type | Motorcycle |
| ASIN | B07L1R1MLY |
| International Article Number (EAN/UPC) | 08436571718129 |
