Beldray BEL0770N-GRY

Beldray BEL0770N-GRY 2-in-1 Upright Stick Vacuum Cleaner User Manual

Model: BEL0770N-GRY | Brand: Beldray

PRODUCT OVERVIEW

The Beldray BEL0770N-GRY is a versatile 2-in-1 vacuum cleaner designed for efficient cleaning of various surfaces. It functions as both a traditional upright stick vacuum and a portable handheld unit, making it suitable for a wide range of cleaning tasks from floors to upholstery and tight spaces.

Image: The Beldray 2-in-1 vacuum cleaner shown in its upright configuration, alongside the detachable handheld unit and included accessories (crevice tool and brush tool).

Key Features:

- **2-in-1 Functionality:** Easily converts from an upright stick vacuum to a handheld vacuum.
- **Powerful Motor:** Equipped with a 600W motor for effective dirt and dust pickup.
- **Bagless Design:** Features a 1-litre dust tank, eliminating the need for disposable bags.
- **Washable HEPA Filter:** Designed to capture fine dust particles, beneficial for allergy sufferers.
- **Included Tools:** Comes with a crevice tool and a brush tool for specialized cleaning.
- **Extended Reach:** Features a 5-meter power cord for wider cleaning coverage.

SETUP AND ASSEMBLY

The Beldray 2-in-1 vacuum cleaner is designed for straightforward assembly. Follow these steps to prepare your vacuum for use.

- 1. Unpack Components:** Carefully remove all parts from the packaging. You should have the main handheld unit, the extension tube (stick), the floor head, the crevice tool, and the brush tool.
- 2. Attach Floor Head:** Align the connection point of the floor head with the bottom of the extension tube. Push firmly until it clicks into place.
- 3. Attach Handheld Unit:** Connect the top of the extension tube to the main handheld vacuum unit. Ensure it is securely fastened.
- 4. Power Connection:** Unwind the power cord and plug it into a suitable mains power outlet.

Your vacuum cleaner is now assembled and ready for operation in either upright or handheld mode.

OPERATING INSTRUCTIONS

Using as an Upright Vacuum:

For general floor cleaning, use the vacuum in its upright configuration.

- Ensure the floor head and extension tube are securely attached to the handheld unit.
- Plug the power cord into a wall socket.
- Press the power button located on the handheld unit to turn the vacuum on.
- Guide the vacuum across your floors. The vacuum head is suitable for both hard flooring and carpets.
- When finished, press the power button again to turn off the vacuum and unplug it from the wall.

Image: The Beldray vacuum cleaner in upright mode, demonstrating its ability to clean under furniture with its low-profile vacuum head.

Using as a Handheld Vacuum:

For quick clean-ups, stairs, upholstery, or car interiors, convert the vacuum to handheld mode.

- To convert, detach the extension tube and floor head from the main handheld unit.
- You can use the handheld unit directly or attach one of the specialized tools.
- Plug the power cord into a wall socket.
- Press the power button to turn on.
- Direct the nozzle or attached tool to the area you wish to clean.
- Turn off and unplug when done.

HANDHELD UNIT
For quick clean-ups

Image: The Beldray handheld vacuum in use, effectively cleaning up crumbs from a kitchen counter, illustrating its suitability for quick clean-ups.

Using Attachments:

The vacuum comes with two useful attachments:

- **Crevice Tool:** Ideal for reaching into narrow gaps, corners, and along edges. Simply attach it to the nozzle of the

handheld unit.

- **Brush Tool:** Perfect for cleaning upholstery, curtains, and delicate surfaces. Attach it to the nozzle of the handheld unit.

MAINTENANCE

Regular maintenance ensures optimal performance and extends the lifespan of your vacuum cleaner.

Emptying the Dust Tank:

The 1-litre dust tank should be emptied regularly, ideally after each use or when the MAX fill line is reached, to maintain suction power.

1. Ensure the vacuum is turned off and unplugged from the power outlet.
2. Locate the dust tank release button or latch on the handheld unit.
3. Press the release and carefully detach the dust tank from the main unit.
4. Position the dust tank over a waste bin and open the bottom flap to empty the contents.
5. Close the flap and reattach the dust tank to the handheld unit, ensuring it clicks securely into place.

1 L DUST CONTAINER

Easy-to-empty bagless design

Image: A hand emptying the contents of the 1-liter dust container into a waste bin, demonstrating the easy-to-empty bagless design.

Cleaning the HEPA Filter:

The washable HEPA filter should be cleaned periodically to prevent clogging and maintain suction efficiency. The frequency depends on usage, but generally, clean it every 3-4 uses or when you notice reduced suction.

1. With the dust tank detached, carefully remove the HEPA filter. It is typically located inside the dust tank.
2. Tap the filter gently over a bin to remove loose dust and debris.
3. Rinse the filter under cool, running water until the water runs clear. Do not use detergents or hot water.
4. Allow the filter to air dry completely for at least 24 hours before reinserting it into the dust tank. Do not use heat to dry it.
5. Once completely dry, place the filter back into the dust tank and reattach the tank to the vacuum.

Important: Never operate the vacuum cleaner without the filter properly installed and completely dry.

General Cleaning:

- Wipe the exterior of the vacuum cleaner with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- Check the floor head for any tangled hair or debris and remove them as necessary.

TROUBLESHOOTING

If you encounter issues with your Beldray vacuum cleaner, refer to the following common problems and their solutions:

Problem	Possible Cause	Solution
Vacuum does not turn on.	Not plugged in correctly. No power from outlet. Power button not pressed.	Ensure the power cord is securely plugged into a working electrical outlet. Check the circuit breaker or try another outlet. Press the power button firmly.
Reduced suction power.	Dust tank is full. Filter is clogged. Hose/nozzle/floor head is blocked.	Empty the dust tank. Clean the HEPA filter as per maintenance instructions. Ensure it is completely dry before reinserting. Check for and remove any blockages in the floor head, extension tube, or handheld unit's nozzle.
Unusual noise during operation.	Blockage in the air path. Motor issue (less common).	Turn off and unplug the vacuum. Check for and remove any obstructions in the floor head, extension tube, or dust tank area. If the noise persists after checking for blockages, discontinue use and contact customer support.
Dust escaping from the vacuum.	Dust tank not properly sealed. Filter not correctly installed or damaged.	Ensure the dust tank is securely attached and its lid/flap is properly closed. Check that the HEPA filter is correctly seated and not damaged. Replace if necessary.

If the problem persists after attempting these solutions, please refer to the warranty and support information.

SPECIFICATIONS

Brand	Beldray
Model Number	BEL0770N-GRY
Colour	Grey
Product Dimensions	4.13 x 9.84 x 43.31 cm
Item Weight	2 kg
