Hyper Tough 116-Piece Home Repair Tool Set User Manual

Model: UJ5388TA

INTRODUCTION

This user manual provides essential information for the safe and effective use of your Hyper Tough 116-Piece Home Repair Tool Set. This comprehensive kit is designed for various do-it-yourself projects around your home, offering a wide array of basic tools for common repair tasks. Please read this manual thoroughly before using the tools to ensure proper handling and maintenance.

PRODUCT OVERVIEW AND COMPONENTS

The Hyper Tough 116-Piece Home Repair Tool Set includes a diverse collection of hand tools and accessories, neatly organized within a durable carrying case for easy storage and portability. The set is designed to meet your fundamental repair needs.

Included Components:

- **Wood Handle 7 oz. Hammer:** For driving and pulling nails.
- **Needle Nosed Pliers:** Ideal for gripping small objects, bending wire, and reaching into tight spaces.
- **4 Precision Screwdrivers:** For delicate tasks and small screws.
- **10 ft. Tape Measure:** Essential for accurate measurements.
- **28 Piece Socket Set with Ratchet Handle, Speed Dial, and 3 inch Extension:** For tightening and loosening nuts and bolts.
- **22 Piece SAE and Metric Hex Key Set:** For hexagonal socket screws.
- **44 Piece Assorted Screwdriver Bits:** A wide variety of bits for different screw types.
- **6 inch Adjustable Wrench:** A versatile tool for various nut and bolt sizes.
- **Assorted Fasteners:** A selection of common hardware for immediate use.
- **6 Bit and Wrench Holder/Organizers:** To keep bits and hex keys tidy.
- **Handy Carrying Case:** For organized storage and transport of all tools.

SETUP

The Hyper Tough 116-Piece Home Repair Tool Set comes pre-organized within its carrying case. No assembly is required for the tools themselves. Upon receiving the set, simply open the latches on the carrying case to access the tools. Familiarize yourself with the location of each tool within the case for efficient retrieval during tasks.

1. **Unpacking:** Carefully remove the tool set from its packaging.

2. **Inspection:** Inspect all tools for any signs of damage that may have occurred during shipping. If any tools are damaged, contact customer support.
3. **Organization:** Note the designated slots for each tool within the case. This organization is crucial for maintaining the integrity of the set and quickly locating specific tools.

OPERATING INSTRUCTIONS

This tool set provides a range of tools for common household repairs. Always select the correct tool for the job to ensure safety and effectiveness. Below are general guidelines for using some of the key tools:

Using the Ratchet and Socket Set:

1. Select the appropriate socket size (SAE or Metric) that fits the nut or bolt.
2. Attach the chosen socket to the ratchet handle. Use the 3-inch extension if additional reach is needed.
3. Place the socket firmly onto the fastener.
4. Adjust the direction switch on the ratchet handle for tightening (clockwise) or loosening (counter-clockwise).
5. Apply steady pressure and rotate the handle to turn the fastener.

Figure 3: Demonstrates the application of the ratchet from the Hyper Tough set. A hand is shown using the ratchet to tighten a bolt on a metal frame, illustrating its practical use in assembly or repair tasks.

Using Screwdrivers and Bits:

1. Identify the correct screwdriver type (Phillips, flathead, Torx, etc.) and size for the screw.
2. For precision screwdrivers, align the tip with the screw head and turn.
3. For the bit driver, insert the desired bit into the magnetic tip.
4. Place the bit firmly into the screw head and apply downward pressure while turning clockwise to tighten or counter-clockwise to loosen.

Figure 4: Illustrates the use of a screwdriver from the Hyper Tough set. A hand is shown actively using the screwdriver to assemble a piece of furniture, highlighting the tool's utility in common household tasks.

General Safety Precautions:

- Always wear appropriate personal protective equipment (PPE), such as safety glasses, when using tools.
- Ensure your work area is well-lit and clear of obstructions.
- Never force a tool. If a tool is not working, re-evaluate the task or the tool selection.
- Keep tools clean and dry to prevent rust and maintain grip.
- Store tools securely in their case when not in use, away from children and pets.

MAINTENANCE

Proper maintenance extends the life of your tools and ensures their optimal performance. Follow these guidelines for caring for your Hyper Tough tool set:

- **Cleaning:** After each use, wipe down tools with a clean, dry cloth to remove dirt, grease, and moisture. For stubborn grime, a mild degreaser can be used, followed by thorough drying.

- **Rust Prevention:** Tools made of metal are susceptible to rust. Store tools in a dry environment. For long-term storage, a light coat of machine oil can be applied to metal surfaces to prevent corrosion.
- **Storage:** Always return tools to their designated slots in the carrying case. This prevents damage, loss, and keeps them organized. Ensure the case latches are securely closed.
- **Inspection:** Periodically inspect tools for wear, damage, or loose parts. Replace or repair damaged tools immediately to prevent injury or further damage.

TROUBLESHOOTING

While the Hyper Tough tool set is designed for durability and reliability, minor issues may arise. Here are some common concerns and their solutions:

Problem	Possible Cause	Solution
Tools are rusting.	Exposure to moisture; improper storage.	Ensure tools are dry before storing. Store in a dry environment. Apply a thin layer of oil to metal surfaces.
Socket slips on fastener.	Incorrect socket size; worn fastener or socket.	Verify correct socket size (SAE/Metric). Replace worn fasteners or sockets if necessary.
Screwdriver cam-out (slips from screw head).	Incorrect bit/screwdriver size; insufficient downward pressure; worn screw head.	Use the correct size and type of bit/screwdriver. Apply firm downward pressure. Replace damaged screws.
Tools are difficult to remove from case.	Tight fit for secure storage.	Apply gentle, firm pressure to lift tools. Over time, the fit may loosen slightly with use.

SPECIFICATIONS

Attribute	Detail
Product Dimensions	4 x 13 x 4 inches
Item Weight	5.75 pounds
Model Number	UJ5388TA
Manufacturer	Hyper Tough
Date First Available	December 4, 2018
