

STANLEY FATMAX FMHT77586-1

STANLEY FATMAX FMHT77586-1 Green Beam Cross Line Laser Level User Manual

Model: FMHT77586-1

1. INTRODUCTION

Thank you for choosing the STANLEY FATMAX FMHT77586-1 Green Beam Cross Line Laser Level. This precision instrument is designed to project bright, clear green laser lines for various leveling and alignment tasks. This manual provides essential information for safe operation, proper setup, and effective use of your laser level. Please read it thoroughly before first use and keep it for future reference.

2. SAFETY INFORMATION

WARNING: This is a Class 2 laser product. Avoid direct eye exposure to the laser beam. Do not stare into the beam. Do not intentionally direct the laser beam at other people or reflective surfaces.

- Always operate the laser level in a safe manner, following all instructions in this manual.
- Do not attempt to modify or disassemble the laser level. This can cause serious injury and will void the warranty.
- Keep the laser level out of reach of children and untrained personnel.
- Ensure the work area is free from obstructions and potential hazards.
- Use only the specified battery type (AA alkaline batteries) and ensure correct polarity.
- Remove batteries if the device will not be used for an extended period to prevent leakage.
- Protect the device from extreme temperatures, moisture, and direct sunlight.

3. PACKAGE CONTENTS

Upon unpacking, please verify that all items listed below are present and undamaged:

- STANLEY FATMAX FMHT77586-1 Green Beam Cross Line Laser Level
- Soft Carrying Pouch
- L-Bracket (Magnetic Mounting Bracket)
- 4 x AA Alkaline Batteries
- Laser Target Plate (if included, often a small white plate)
- User Manual (this document)

Figure 1: Contents of the STANLEY FATMAX FMHT77586-1 package, including the laser level, carrying pouch, L-bracket, and batteries.

4. PRODUCT OVERVIEW

The STANLEY FATMAX FMHT77586-1 is a robust and accurate cross line laser level designed for professional and DIY

applications. Key features include:

- **Green Laser Diode:** Utilizes a 510-530 Nm Class 2 green laser for enhanced visibility.
- **Wide Cross Line Projection:** Projects a 150° wide cross line, offering extensive surface coverage.
- **Self-Leveling System:** Automatically levels within a 4° range in approximately 5 seconds.
- **Pendulum Lock:** Secures the pendulum during transport to prevent damage and allows for manual mode operation for angled lines.
- **Magnetic Base:** Features a magnetic base for direct attachment to metal structures.
- **Receiver Mode:** A dedicated button activates receiver mode, extending the working range up to 50 meters with an optional laser receiver.
- **Durable Construction:** Rubber-coated housing provides IP54 protection against dust and splashing water.
- **Mounting Options:** Equipped with 1/4" and 5/8" tripod threads for versatile mounting.

Figure 2: Side profile of the laser level, showcasing its durable design.

5. SETUP

5.1 Battery Installation

1. Locate the battery compartment cover on the back or bottom of the laser level.
2. Open the cover by sliding or unlatching it.
3. Insert 4 AA alkaline batteries, ensuring correct polarity (+/-) as indicated inside the compartment.
4. Close the battery compartment cover securely.

5.2 Mounting the Laser Level

The FMHT77586-1 offers several mounting options:

- **Flat Surface:** Place the laser level directly on a stable, flat surface.
- **Tripod Mounting:** Attach the laser level to a tripod using the 1/4" or 5/8" thread on the bottom of the unit.
- **Magnetic Mounting:** Use the included L-bracket to attach the laser level to metal surfaces. The L-bracket has strong magnets for secure attachment.

Figure 3: Laser level mounted using an L-bracket, projecting a horizontal line for alignment.

6. OPERATING INSTRUCTIONS

6.1 Powering On and Self-Leveling Mode

1. Unlock the pendulum by sliding the lock switch to the unlocked position.
2. Press the power button (usually marked with a power symbol) to turn on the laser level.
3. The laser level will automatically begin self-leveling. This typically takes about 5 seconds.
4. Once leveled, the laser lines will emit a steady green light. If the device is outside its 4° self-leveling range, the laser lines may flash or an indicator light may illuminate, signaling that the device needs to be repositioned.

6.2 Switching Laser Modes

Press the mode button (often marked with a laser symbol or 'M') to cycle through different laser line configurations:

- Horizontal Line Only
- Vertical Line Only
- Cross Line (Horizontal and Vertical)

Figure 4: Interacting with the control panel to select laser modes.

6.3 Manual Mode (Locked Pendulum)

To project angled lines, keep the pendulum locked. When the pendulum is locked, the self-leveling function is deactivated, and the laser lines can be projected at any angle. The laser lines may flash to indicate that it is in manual mode and not self-leveling.

6.4 Receiver Mode

For outdoor use or in bright conditions, activate receiver mode by pressing the dedicated receiver button (often marked with a signal icon). This increases the pulse rate of the laser, allowing it to be detected by an optional laser receiver for extended range (up to 50m). An indicator light will typically confirm receiver mode is active.

Figure 5: Laser level in operation, projecting precise green cross lines for measurement.

6.5 Powering Off

To turn off the laser level, press the power button again. Always engage the pendulum lock before storing or transporting the device to protect the internal mechanism.

7. MAINTENANCE

- **Cleaning:** Wipe the laser level with a soft, damp cloth. Do not use harsh chemicals or abrasive cleaners. Ensure the laser apertures are clean for optimal beam clarity.
- **Storage:** Store the device in its carrying pouch in a dry, cool place, away from direct sunlight. Always engage the pendulum lock before storage.
- **Battery Care:** Remove batteries if the device will not be used for an extended period to prevent corrosion from battery leakage.
- **Calibration Check:** Periodically check the calibration of your laser level. Refer to the full product manual or STANLEY FATMAX support for detailed calibration procedures if needed.

8. TROUBLESHOOTING

Problem	Possible Cause	Solution
Laser lines are dim or not visible.	Low batteries; dirty laser aperture; too much ambient light.	Replace batteries; clean laser aperture; use in lower light conditions or activate receiver mode with an optional receiver.
Laser lines are flashing.	Device is outside its self-leveling range; pendulum is locked (manual mode).	Reposition the device on a more level surface; unlock the pendulum for self-leveling mode.
Device does not power on.	Batteries are dead or incorrectly installed; pendulum lock is engaged.	Replace batteries and check polarity; ensure pendulum is unlocked (for self-leveling mode).
Inaccurate measurements.	Device is not level; calibration issue; unstable surface.	Ensure the device is within its self-leveling range; check calibration; place on a stable surface.

9. SPECIFICATIONS

Feature	Detail
Model Number	FMHT77586-1
Laser Type	Green Diode Laser (510 - 530 Nm)
Laser Class	Class 2
Working Range	30 m (50 m with receiver)
Accuracy	±3 mm at 10 m
Self-Leveling Range	±4°
Self-Leveling Time	5 seconds
Power Source	4 x AA Alkaline Batteries
Battery Life	Approx. 5 hours (single line operation)

Feature	Detail
Ingress Protection	IP54 (Dust and splash water protected)
Mounting Thread	1/4" and 5/8"
Dimensions (L x W x H)	20 x 16 x 16 cm (approximate)
Weight	1 kg (approximate)
Operating Mode	Automatic (Self-leveling)
Material	Rubber, Magnetic

10. WARRANTY AND SUPPORT

STANLEY FATMAX products are manufactured to high-quality standards. For information regarding warranty coverage, technical support, or service, please refer to the warranty card included with your product or visit the official STANLEY FATMAX website. Keep your purchase receipt as proof of purchase.

For further assistance, please contact STANLEY FATMAX customer service.
