## Sekonda 2506

# Sekonda Editions 2506 Women's Watch User Manual

Model: 2506

## INTRODUCTION

This manual provides instructions for the proper setup, operation, and maintenance of your Sekonda Editions 2506 women's watch. Please read this guide thoroughly to ensure optimal performance and longevity of your timepiece.

*Image: Front view of the Sekonda Editions 2506 watch, featuring a round silver-tone case, a clean white dial with silver-tone hour markers, and a light pink faux leather strap. The Sekonda logo is visible below the 12 o'clock position.*

## SETUP

---

### Setting the Time

- 1. Pull out the crown:** Locate the small knob (crown) on the right side of the watch case. Gently pull it outwards until you feel a click.
- 2. Adjust the time:** Rotate the crown clockwise or counter-clockwise to move the hour and minute hands to the desired time.

3. **Push in the crown:** Once the correct time is set, push the crown back into its original position against the watch case. This will start the watch movement.

## Wearing the Watch

Place the watch on your wrist and adjust the strap to a comfortable fit. The strap should be snug enough to prevent the watch from sliding freely, but not so tight as to restrict circulation.

## OPERATING INSTRUCTIONS

### Daily Use

Your Sekonda watch is designed for everyday wear. Avoid exposing it to extreme temperatures, strong magnetic fields, or harsh chemicals. While the watch has basic splash resistance, it is not suitable for swimming or showering unless explicitly stated otherwise in the specifications.

## MAINTENANCE

### Cleaning

- **Case:** Wipe the watch case with a soft, dry cloth to remove dust and fingerprints. For stubborn dirt, a slightly damp cloth can be used, followed by immediate drying.
- **Strap:** For the faux leather strap, wipe it with a dry or very slightly damp cloth. Avoid excessive moisture, as this can damage the material. Allow the strap to air dry completely if it becomes damp.

### Battery Replacement

The watch is powered by a quartz movement requiring a battery. When the watch stops running, it indicates that the battery needs replacement. Battery replacement should be performed by a qualified watch technician to ensure proper sealing and function. Attempting to replace the battery yourself may void the warranty and damage the watch.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Watch is not running	<ul style="list-style-type: none"><li>• Crown is pulled out</li><li>• Battery is depleted</li></ul>	<ul style="list-style-type: none"><li>• Push the crown fully back into the case.</li><li>• Have the battery replaced by a professional watch technician.</li></ul>
Strap feels stiff or uncomfortable	New strap material	The faux leather strap may require a period of wear to soften and conform to your wrist.
