EverNice Needle Plate Instruction Manual for Pegasus W664-01, W562-01 Coverstitch Machines

1. INTRODUCTION

This manual provides essential instructions for the installation, operation, and maintenance of the EverNice Needle Plate, part number 257018B64. This component is designed for specific Pegasus industrial coverstitch sewing machines to ensure optimal stitching performance. Please read these instructions carefully before installation and use.

2. PRODUCT OVERVIEW

The needle plate is a critical component of a coverstitch sewing machine, providing a flat surface for fabric movement and guiding the needles and loopers during the stitching process. The EverNice Needle Plate 257018B64 is a precision-engineered replacement part, manufactured to meet the specifications of compatible Pegasus machines. It features specific slots and openings that facilitate the formation of 3-needle, 6.4mm gauge coverstitches.

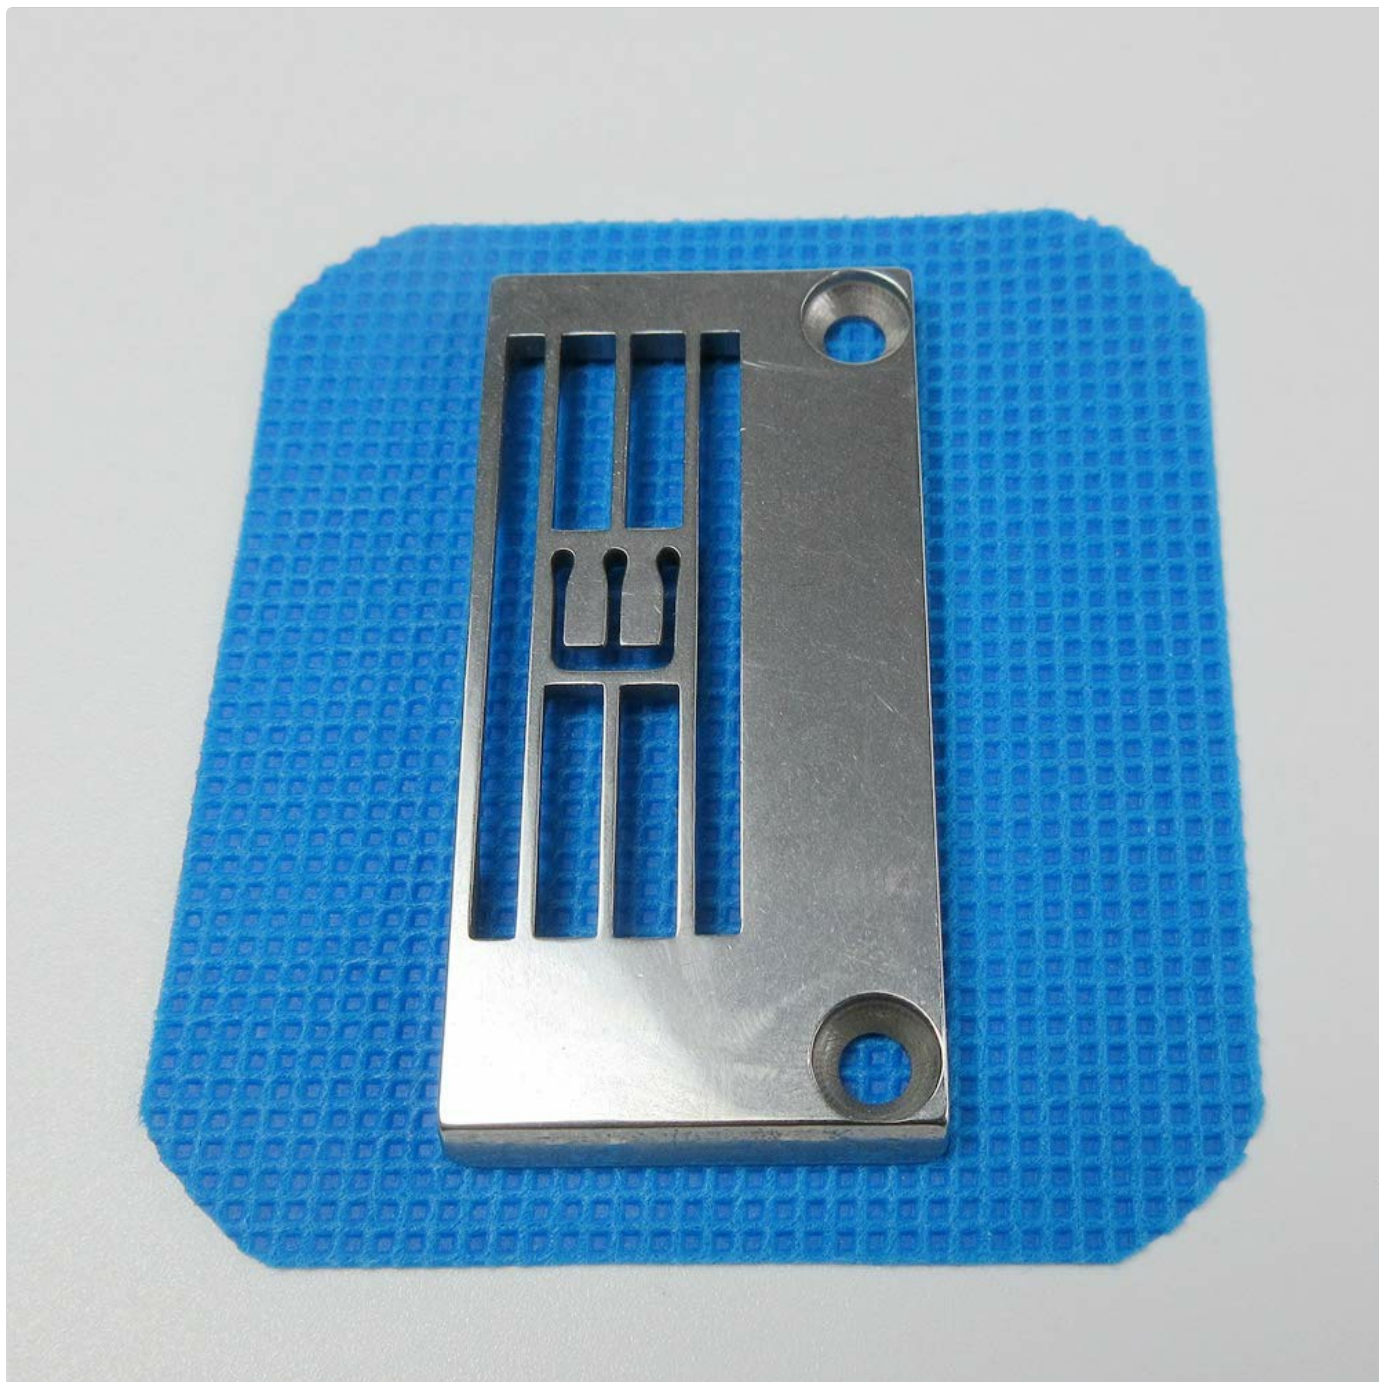

Figure 1: EverNice Needle Plate 257018B64. This image displays the EverNice Needle Plate, a metal component designed for industrial coverstitch sewing machines. The plate features multiple slots for needles and feed dogs, and the part number '257018B64' is clearly visible on its surface. It is shown resting on a blue textured mat.

3. COMPATIBILITY

This EverNice Needle Plate (Part #257018B64 or 257018-B64) is specifically designed for 3-needle, 6.4mm gauge industrial coverstitch machines. It is compatible with the following Pegasus models:

- Pegasus W664-01
- Pegasus W561
- Pegasus W562-01

Ensure your machine model matches one of the listed compatible models before attempting installation.

4. SETUP AND INSTALLATION

Proper installation of the needle plate is crucial for machine performance and stitch quality. Follow these steps carefully:

1. **Safety First:** Before beginning any installation or maintenance, always turn off the sewing machine and unplug it from the power source to prevent accidental operation or injury.
2. **Clear the Area:** Remove any fabric, threads, or accessories from the needle plate area.
3. **Remove Old Needle Plate:** Locate the screws holding the existing needle plate in place. Typically, there are two screws. Use an appropriate screwdriver to loosen and remove these screws. Carefully lift and remove the old needle plate.
4. **Clean the Area:** Use a brush or compressed air to clean any lint, dust, or debris from the feed dog area and around the needle bar.
5. **Position New Needle Plate:** Place the new EverNice Needle Plate 257018B64 onto the machine, aligning the screw holes with those on the machine bed. Ensure the plate sits flush and correctly over the feed dogs.
6. **Secure the Plate:** Insert the screws and gently tighten them by hand first to ensure proper alignment. Then, use the screwdriver to fully tighten the screws. Do not overtighten, as this can damage the plate or the machine.
7. **Verify Installation:** Manually turn the handwheel a few times to ensure that the needles move freely through the plate's openings without obstruction. Check that the feed dogs are operating correctly.

5. OPERATING INSTRUCTIONS

Once the EverNice Needle Plate is correctly installed, your Pegasus coverstitch machine should operate as intended. No special operating procedures are required for the needle plate itself. Ensure you are using the correct needles and thread types for your specific coverstitch application. Always refer to your Pegasus machine's primary instruction manual for detailed operating procedures, threading guides, and tension adjustments.

6. MAINTENANCE

Regular maintenance of the needle plate helps prolong its lifespan and ensures consistent stitch quality.

- **Cleaning:** Periodically remove the needle plate (following the installation steps in reverse) and clean any accumulated lint or thread fragments from underneath and around the feed dogs. Use a small brush or vacuum cleaner.
- **Inspection:** Regularly inspect the needle plate for signs of wear, burrs, scratches, or damage, especially around the needle holes and feed dog slots. A damaged needle plate can cause skipped stitches, thread breakage, or fabric damage.
- **Replacement:** If the needle plate shows significant wear or damage, replace it with a new EverNice Needle Plate 257018B64 to maintain optimal machine performance.

7. TROUBLESHOOTING

If you experience issues after installing the new needle plate, consider the following:

- **Skipped Stitches or Thread Breakage:**
 - Ensure the needle plate is installed correctly and securely.
 - Check for any burrs or rough edges on the needle plate that could snag thread.
 - Verify that the needles are correctly inserted and are not bent or dull.
 - Confirm the correct needle type and size for your fabric.
- **Fabric Not Feeding Properly:**
 - Ensure the feed dogs are clean and free of lint.
 - Check that the needle plate is not obstructing the feed dog movement.

For persistent issues, consult your Pegasus machine's comprehensive service manual or contact a qualified sewing machine technician.

8. SPECIFICATIONS

Part Number:	257018B64 (also known as 257018-B64)
Brand:	EverNice
Gauge:	6.4mm
Needle Configuration:	3-needle
Compatible Models:	Pegasus W664-01, W561, W562-01
Material:	Metal (typically steel)

9. WARRANTY AND SUPPORT

For information regarding warranty coverage or technical support for your EverNice Needle Plate, please refer to the purchase documentation or contact the seller directly. Keep your proof of purchase for any warranty claims. For operational issues related to your Pegasus sewing machine, consult the machine's original manufacturer manual or contact a certified service technician.
