3. SETUP

Proper setup ensures the longevity and safety of your Intex Watermelon Pool.

3.1 Site Selection

- Choose a flat, level surface free from sharp objects, rocks, or debris.
- Ensure the area is large enough to accommodate the pool's dimensions (66 inches diameter).
- Avoid setting up the pool on concrete or asphalt without adequate padding underneath to prevent damage to the vinyl.

3.2 Inflation

The pool features three separate air chambers for inflation.

1. Unfold the pool and lay it flat on your chosen surface.
2. Locate the three inflation valves, one for each ring.
3. Using an air pump (not included), inflate each chamber until it is firm to the touch but not overinflated. Overinflation can cause damage.
4. Securely close all inflation valves.

3.3 Filling with Water

1. Once inflated, begin filling the pool with water using a garden hose.
2. Fill the pool to the recommended water level, which is approximately 11.5 inches from the bottom. Do not overfill.
3. Ensure the pool maintains its round shape as it fills. Adjust if necessary.

4. OPERATING THE POOL

The Intex Watermelon Pool provides a safe and fun environment for young children.

4.1 Water Play

- Always ensure adult supervision when children are in or near the pool.
- The pool is designed for wading and splashing. Discourage jumping or diving.
- The 66-inch diameter provides ample space for multiple young children to play comfortably.

5. MAINTENANCE

Regular maintenance will extend the life of your Intex Watermelon Pool.

5.1 Cleaning

- Drain the pool regularly to prevent algae growth and maintain water hygiene.
- Clean the interior and exterior surfaces with mild soap and water. Avoid abrasive cleaners.
- Rinse thoroughly with clean water and allow to air dry completely before storage.

5.2 Draining and Storage

1. To drain, locate the drain plug on the bottom of the pool.
2. Open the plug to allow water to empty. You may need to gently press down on the sides to assist drainage.

3. Once drained, open the inflation valves to deflate the air chambers.
4. Fold the pool neatly for compact storage in a cool, dry place away from direct sunlight and extreme temperatures.

6. TROUBLESHOOTING

Here are solutions to common issues you might encounter:

6.1 Leaks

- If the pool is losing air, check all inflation valves to ensure they are securely closed.
- Inspect the vinyl surface for small punctures or tears. You can use soapy water to locate leaks by looking for bubbles.
- Use the included repair patch kit (if applicable) to fix small holes. Clean the area around the hole, apply the patch firmly, and allow it to cure completely before re-inflating.
