

Aexit modle

Aexit 6V AA Battery Holder Case Instruction Manual

Model: modle

INTRODUCTION

This manual provides essential information for the safe and effective use of the Aexit 6V AA Battery Holder Case. This product is designed to hold four 1.5V AA batteries to provide a 6V power output for various electronic applications and small hobby projects. Please read these instructions carefully before use.

SETUP INSTRUCTIONS

- Insert Batteries:** Open the battery holder. Insert four 1.5V AA batteries into the designated slots, ensuring correct polarity (+ and -) as indicated inside the holder.
- Secure Batteries:** Close the battery holder securely.
- Connect Wires:** The battery holder comes with pre-attached red and black wire leads. The red wire is typically for positive (+) connection, and the black wire for negative (-) connection. Connect these wires to your electronic device or project as required.

for AA Batteries

Important Safety Notes:

- This battery box is for **output use only** and is not designed for charging batteries.
- Do not connect the positive and negative wires directly together. This can cause a short circuit, leading to overheating of the wires and potential damage or fire.
- Ensure all connections are secure and insulated to prevent accidental short circuits.

OPERATING INSTRUCTIONS

Once the batteries are correctly installed and the wires are connected to your device, the battery holder will supply 6V DC power. The operation is passive; it simply provides power from the installed batteries. There are no switches or controls

on the battery holder itself.

- **Verify** that your device requires a 6V power supply to ensure compatibility.
- **Monitor** your device for proper function after connecting the battery holder.

MAINTENANCE

To ensure the longevity and proper function of your battery holder, follow these simple maintenance guidelines:

- **Cleaning:** Keep the battery holder clean and free from dust and debris. Use a dry, soft cloth for cleaning.
- **Storage:** Store the battery holder in a cool, dry place away from direct sunlight and moisture when not in use. Remove batteries if storing for extended periods to prevent leakage.
- **Inspection:** Periodically inspect the wires and battery contacts for any signs of corrosion or damage. Replace the unit if significant damage is observed.

TROUBLESHOOTING

No Power Output:

- **Check Batteries:** Ensure all four AA batteries are inserted correctly with the right polarity and are not depleted. Replace with fresh batteries if necessary.
- **Check Connections:** Verify that the red and black wires are securely connected to your device and that there are no loose connections or breaks in the wiring.
- **Inspect for Damage:** Look for any visible damage to the battery holder or wires.

Wires Overheating:

- Immediately disconnect the power source.
- This indicates a short circuit. Re-check all connections to ensure the positive and negative wires are not touching each other or any conductive material.
- Ensure the device you are powering is not drawing excessive current, which could also lead to overheating.

SPECIFICATIONS

Product Name	Battery Case Holder
Battery Type	4 x 1.5V AA Battery (not included)
Output Voltage	6V DC (nominal)
Total Size (L*W*H)	56.7mm x 36.5mm x 30mm / 2.23inch x 1.44inch x 1.18inch
Cable Length (Each)	15cm / 5.9 inch
Material	Impact resistant material
Package Content	10 Pcs x Battery Case Holder
