3. SETUP

3.1 Unpacking

- Carefully remove the washing machine from its packaging.
- Remove all packing materials, including any internal supports or protective films.
- It is normal for a small amount of residual water to be present inside the tub or hoses due to factory testing. This does not indicate a used or faulty product.

3.2 Placement

- Place the washing machine on a firm, level surface. Adjust the leveling feet if necessary to ensure stability.
- Ensure there is adequate space around the machine for ventilation and operation.

- Avoid direct sunlight or areas with high humidity.

3.3 Water and Drain Connections

- Connect the water inlet hose to a cold water tap. Ensure the connection is tight to prevent leaks.
- Position the drain hose into a sink or drain pipe. Ensure the drain hose is secured and at an appropriate height to allow for proper drainage.

3.4 Power Connection

- Plug the power cord into a dedicated, grounded electrical outlet.
- Do not share the outlet with other high-power appliances.

4. OPERATING INSTRUCTIONS

4.1 Control Panel Overview

The control panel features an LED display and various buttons for program selection, water level, and operation control.

4.2 Loading Clothes

- Open the top lid.
- Place clothes loosely into the tub, ensuring not to overload. The maximum capacity is approximately 11 lbs.
- Close the lid securely.

4.3 Adding Detergent

- Add the appropriate amount of detergent directly into the tub with the clothes.
- Refer to your detergent's instructions for recommended quantities based on load size and water hardness.

4.4 Selecting Programs and Water Levels

- Press the **Power** button to turn on the machine.
- Use the **Water Level/Program** button to select one of the 3 washing programs (e.g., Normal, Standard, Quick Wash, Delicates, Wool, Tub Clean). The LED display will show the selected program.
- Adjust the water level using the **Water Level/Program** button if needed. There are 5 water level selections available.
- The machine also features indicators for Soak, Wash, Spin, Rinse, and Air Dry stages.

4.5 Starting and Pausing

- Press the **Start/Pause** button to begin the selected wash cycle.
- To pause the cycle, press the **Start/Pause** button again. Press it once more to resume.

5. MAINTENANCE

5.1 Cleaning the Tub

- Regularly clean the stainless steel inner tub to prevent residue buildup and odors.
- Use a soft cloth and mild detergent. Do not use abrasive cleaners.
- The machine may have a 'Tub Clean' program for automated cleaning. Refer to the control panel for this option.

5.2 Cleaning the Filter

- Locate the lint filter, typically inside the tub.
- Remove the filter and clean out any accumulated lint or debris.
- Rinse the filter under running water and reinsert it securely.

5.3 General Care

- Wipe down the exterior of the machine with a soft, damp cloth.
- Ensure the machine is dry after use to prevent mold or mildew.
- Check hoses periodically for any signs of wear or damage.

6. TROUBLESHOOTING

If you encounter issues with your washing machine, please refer to the following common troubleshooting steps:

- **Machine not starting:** Ensure the power cord is securely plugged in and the power button is pressed. Check if the lid is fully closed.
- **No water filling:** Check if the water tap is open and the water inlet hose is properly connected and not kinked.
- **Water not draining:** Ensure the drain hose is not kinked or blocked. Check if the drain pump filter (if accessible) is clear of debris.
- **Excessive vibration/noise:** Verify the machine is on a level surface and the leveling feet are properly adjusted. Ensure the load is balanced inside the tub.
- **Error codes:** If an error code appears on the LED display, consult the specific error code section in your full printed manual (if available) or contact customer support.

If the problem persists after attempting these steps, please contact KUPPET customer support for assistance.
