**Kotobukiya RZ-041 Liger Zero Schneider Marking Plus Ver.**

# Kotobukiya ZOIDS RZ-041 Liger Zero Schneider Marking Plus Ver.

1/72 SCALE PLASTIC MODEL INSTRUCTION MANUAL

*Image: The fully assembled Kotobukiya ZOIDS RZ-041 Liger Zero Schneider Marking Plus Ver. plastic model.*

## Introduction

This manual provides comprehensive instructions for assembling and maintaining your Kotobukiya ZOIDS RZ-041 Liger Zero Schneider Marking Plus Ver. 1/72 Scale Plastic Model. The Liger Zero Schneider is a specialized combat form featuring the unique "Changing Armor System." This kit allows you to recreate its distinctive appearance with vibrant orange armor and numerous blades.

**Recommended Age:** This model kit is recommended for individuals aged 15 years and above due to the complexity of assembly and small parts.

## Parts List and Inspection

---

Before beginning assembly, carefully unpack all components and verify that all parts are present and undamaged. This product includes the Liger Zero (Sotai Body) and the Schneider Unit components.

*Image: All components of the Liger Zero Schneider Marking Plus Ver. kit, including the Liger Zero base body and the orange Schneider armor parts, laid out for inspection prior to assembly.*

Familiarize yourself with the various runners and individual pieces. Refer to the included parts diagram for detailed identification.

## Assembly (Setup)

---

Follow the step-by-step instructions provided in the manufacturer's booklet for precise assembly. The kit is molded in multiple colors, reducing the need for painting, but careful assembly is crucial for a clean finish.

- **Base Body Assembly:** Begin by assembling the core Liger Zero (Sotai Body). Ensure all joints are securely fitted.
- **Schneider Unit Attachment:** Attach the orange Schneider armor parts to the Liger Zero base. Pay close attention to the orientation of each piece.
- **Laser Blades:** The laser blades on various parts of the aircraft are designed to be movable. Assemble them carefully to retain their articulation.
- **E-Shield Generator:** The E-Shield Generator on the head can be expanded. Ensure its mechanism is assembled correctly for proper function.
- **Booster Blades:** The blades on the side of the aircraft interact with the expansion to release the booster. Assemble these components to allow for this feature.
- **Pilot Figure:** A standard pilot figure is included and can be placed in the cockpit.
- **Decals:** Apply the included emblems and caution marks as desired to enhance the model's detail.

**Note on Adhesion:** Some smaller armor parts may benefit from the application of plastic model cement to ensure a secure and lasting connection. Test fit parts before applying adhesive.

## Display and Posing (Operating)

Once assembled, your Liger Zero Schneider model offers various posing options due to its articulation. Carefully adjust the joints to achieve dynamic stances.

- **Articulation:** The model features articulated joints in its legs, body, and weapon systems, allowing for a wide range of poses.
- **E-Shield Generator:** The head's E-Shield Generator can be expanded to replicate combat readiness.
- **Booster Deployment:** The side blades can be adjusted to simulate booster deployment.
- **Flying Base Compatibility:** For more dynamic aerial poses, the model is compatible with Kotobukiya Flying Base and Neo stands (sold separately). Attach the model to the stand according to the stand's instructions.

*Image: A dynamic, low-angle pose of the Liger Zero Schneider, emphasizing its predatory design and sharp features.*

## Maintenance

---

To preserve the appearance and integrity of your model, follow these maintenance guidelines:

- **Cleaning:** Dust the model regularly with a soft brush or a can of compressed air. Avoid using harsh chemicals or abrasive materials.
- **Storage:** Store the model away from direct sunlight, extreme temperatures, and high humidity to prevent material degradation and color fading.
- **Handling:** Handle the model carefully, especially when adjusting articulated parts, to avoid breakage.

## Troubleshooting

If you encounter issues during assembly or with the finished model, consider the following:

- **Loose Parts:** If parts do not fit snugly, a small amount of plastic model cement can be used to secure them.
- **Tight Fits:** For parts that are too tight, gently sand or trim the connecting pegs slightly. Do not force parts together, as this can cause breakage.
- **Missing or Damaged Parts:** Refer to the manufacturer's contact information for assistance with missing or damaged components.

For further assistance, consult the official Kotobukiya support resources.

## Specifications

<b>Brand:</b>	Kotobukiya
<b>Model Number:</b>	ZD123 (RZ-041 Liger Zero Schneider Marking Plus Ver.)
<b>Scale:</b>	1/72 Scale
<b>Total Length:</b>	Approx. 12.6 inches (320 mm)
<b>Dimensions (L x W x H):</b>	16 x 14 x 6 inches
<b>Material:</b>	Plastic
<b>Item Weight:</b>	3.01 pounds (1.37 Kilograms)
<b>Number of Pieces:</b>	1 (refers to the kit as a single product, not individual parts)
<b>Recommended Age:</b>	15 years and up
