## SAFETY INSTRUCTIONS

---

- Ensure the appliance is disconnected from the power supply before cleaning or maintenance.
- Do not damage the refrigerant circuit. If damaged, avoid open flames and ventilate the room.
- This appliance is intended for household use only.
- Keep ventilation openings clear of obstruction.
- Do not use mechanical devices or other means to accelerate the defrosting process, other than those recommended by the manufacturer.
- Do not store explosive substances such as aerosol cans with a flammable propellant in this appliance.
- Children should be supervised to ensure they do not play with the appliance.

## SETUP AND INSTALLATION

---

### 1. Unpacking

Carefully remove all packaging materials. Inspect the appliance for any transport damage. Report any damage to your retailer immediately.

## 2. Placement

Place the refrigerator-freezer on a firm, level surface. Ensure adequate ventilation around the appliance. Maintain a minimum distance of 10 cm from walls and other furniture to allow for proper air circulation and heat dissipation. Avoid direct sunlight and heat sources.

- **Dimensions (L x W x H):** 55 x 61.5 x 183 cm
- **Weight:** 53 kg

## 3. Initial Cleaning

Before first use, clean the interior and all accessories with lukewarm water and a mild detergent. Dry thoroughly.

## 4. Power Connection

Connect the appliance to a properly grounded electrical outlet. Allow the appliance to stand upright for at least 2-4 hours before plugging it in to allow the refrigerant to settle.

## OPERATING INSTRUCTIONS

---

Figure 2: Interior view of the SEVERIN Retro RKG 8922, showing the refrigerator compartment with adjustable shelves and the freezer compartment with drawers.

## 1. Temperature Control

The temperature inside the refrigerator is controlled by a thermostat located within the appliance. Adjust the dial to your desired setting. A lower number indicates a warmer temperature, and a higher number indicates a colder temperature. The LED interior lighting illuminates the refrigerator compartment.

## 2. Refrigerator Compartment (181 Liters)

- **Adjustable Shelves:** The four safety glass shelves can be adjusted to different heights to accommodate various food items.
- **Fresh Food Compartment:** A spacious drawer is provided at the bottom for storing fruits and vegetables, helping to maintain their freshness.
- **Door Bins:** Two universal compartments and a bottle rack (for bottles up to 1.5 liters) are located on the door for organized storage of smaller items and beverages.

## 3. Freezer Compartment (63 Liters)

The 4-star freezer compartment is located at the bottom of the appliance and features three transparent drawers for easy organization of frozen goods.

- **Freezing Capacity:** Capable of freezing up to 3 kg of fresh food per 24 hours.
- **Storage Time during Power Failure:** Food can remain safely stored for up to 15 hours in the event of a power outage.

## MAINTENANCE AND CLEANING

---

### 1. Cleaning the Interior

Regularly clean the interior of the refrigerator-freezer. Unplug the appliance before cleaning. Use a soft cloth and a solution of lukewarm water with a mild, non-abrasive detergent. Avoid harsh chemicals or abrasive cleaners. Rinse with clean water and dry thoroughly.

### 2. Defrosting

This appliance features a manual defrost system. When the ice layer in the freezer compartment reaches a thickness of about 3-5 mm, it should be defrosted. To defrost:

1. Unplug the appliance.
2. Remove all food items and store them in a cool place.
3. Leave the freezer door open to allow ice to melt naturally. You can place towels at the bottom to absorb water.
4. Once defrosted, clean and dry the interior thoroughly before plugging the appliance back in and returning food.

### 3. Exterior Cleaning

Clean the exterior surfaces with a soft, damp cloth. For stubborn marks, use a mild detergent. Wipe dry with a clean cloth. Regularly clean the condenser coils at the back of the appliance with a soft brush or vacuum cleaner to maintain efficiency.

## TROUBLESHOOTING

---

Before contacting service, please check the following common issues:

Problem	Possible Cause	Solution
Appliance does not operate.	No power supply; thermostat set to '0' or too warm.	Check power plug and fuse; adjust thermostat setting.
Temperature is not cold enough.	Door not closed properly; frequent door opening; large amount of warm food inserted; poor ventilation; thermostat setting too warm.	Check door seal and close firmly; avoid frequent opening; allow food to cool before placing inside; ensure adequate ventilation; adjust thermostat to a colder setting.

Problem	Possible Cause	Solution
Excessive noise.	Appliance not level; contact with wall/furniture; normal operating sounds.	Adjust leveling feet; ensure clearance; some sounds (e.g., gurgling, humming) are normal.
Water accumulation inside.	Drain hole blocked; door left open too long.	Clear the drain hole (usually at the back of the fridge compartment); ensure door is closed properly.

If the problem persists after checking these points, please contact authorized service personnel.
