Polti Forzaspira Lecologico Hose Connection Manual

Brand: Polti | **Models:** Forzaspira Lecologico AS805, AS850, AS890

1. PRODUCT OVERVIEW

This document provides instructions for the Polti original replacement hose connection, designed for specific Polti Forzaspira Lecologico steam generator and vacuum cleaner models. This component is a female filling opening hose connection, typically located on the side of the main appliance, facilitating the connection of the hose for steam generation or vacuuming functions.

It is essential to verify the compatibility of this part with your specific appliance model before installation. Product data, including model information, can usually be found on an information plate located on the underside of your household appliance.

2. COMPATIBILITY

This hose connection is compatible with various Polti Forzaspira Lecologico models. Please refer to the list below to ensure compatibility with your appliance:

- Polti Forzaspira Lecologico AS805 (PBEU0038, PBEU0047)
- Polti Forzaspira Lecologico AS806 Special Pets (PBEU0044)
- Polti Forzaspira Lecologico AS807 (PBEU0045)
- Polti Forzaspira Lecologico AS850 (PBEU000064)
- Polti Forzaspira Lecologico AS870 Parquet (PBEU0065, PBEU0070)
- Polti Forzaspira Lecologico AS890 (PBEU0066, PBEU0071)
- Polti Forzaspira Lecologico Special Parquet (PBEU052)
- Polti Forzaspira Lecologico Allergy (PBEU0091)
- Polti Forzaspira Lecologic Allergy Parquet (PBEU0092)
- Polti Forzaspira Lecologic Allergy Turbo (PBEU0093)

Always cross-reference the model number on your appliance's information plate with the compatible models listed above.

3. INSTALLATION (SETUP)

This section outlines the general procedure for replacing the hose connection. Always ensure the appliance is unplugged and cooled down before beginning any installation or maintenance.

1. **Safety First:** Disconnect the Polti appliance from the main power supply and allow it to cool completely if it has been in use. Ensure there is no residual pressure in steam generator models.
2. **Locate the Existing Connection:** Identify the current hose connection on the side of your Polti Forzaspira Lecologico unit.
3. **Remove the Old Part:** Carefully unscrew or unclip the old hose connection. Depending on the model, this may require a screwdriver or simply twisting the part counter-clockwise. Note how the old part is attached to ensure correct reassembly.
4. **Inspect the Area:** Clean any debris or residue from the connection port on the appliance. Ensure the area is clear and free from obstructions.
5. **Install the New Part:** Align the new Polti hose connection with the port on the appliance. Gently push and/or twist the new part clockwise until it is securely fastened. Ensure it sits flush against the appliance body. Do not overtighten if screwing.
6. **Verify Connection:** Once installed, gently tug on the connection to ensure it is firm and does not wobble.
7. **Test Functionality:** Reconnect the appliance to the power supply. Attach the hose and perform a brief test run to check for proper sealing and functionality (e.g., no steam leaks, secure hose attachment).

4. OPERATING CONSIDERATIONS

This hose connection is a passive component that enables the functionality of your Polti Forzaspira Lecologico appliance. Once correctly installed, it allows for the secure attachment of the appliance's hose, facilitating the flow of steam or air for cleaning operations.

- Ensure the hose is fully inserted and locked into the connection before operating the appliance to prevent leaks or loss of suction/steam pressure.
- Avoid forcing the hose into the connection; it should fit smoothly.
- Do not operate the appliance if the connection feels loose or if there are visible signs of damage.

5. MAINTENANCE

Proper maintenance of the hose connection ensures its longevity and optimal performance of your Polti appliance.

- **Regular Cleaning:** Periodically inspect the connection for any dirt, dust, or residue buildup. Wipe it

clean with a soft, damp cloth. Do not use abrasive cleaners or solvents.

- **Check for Wear:** Over time, the connection may show signs of wear, such as cracks or deformation. If any damage is observed, the part should be replaced to maintain appliance efficiency and safety.
- **Storage:** When the appliance is not in use, ensure the hose is detached and stored properly to avoid putting undue stress on the connection point.

6. TROUBLESHOOTING

If you encounter issues related to the hose connection, consider the following:

- **Hose Not Attaching Securely:**
 - Ensure the hose end is clean and free of debris.
 - Verify that the hose is compatible with this connection type.
 - Check for any physical damage or deformation on the connection part or the hose end.
- **Steam/Air Leakage at Connection:**
 - Confirm the hose is fully inserted and locked into place.
 - Inspect the rubber seals or O-rings within the connection for wear or damage. If damaged, the part may need replacement.
 - Ensure the connection itself is tightly secured to the appliance body.
- **Difficulty Removing/Inserting Hose:**
 - Ensure the release mechanism (if any) on the hose or connection is properly engaged/disengaged.
 - Clean the connection to remove any sticky residue.

If problems persist after troubleshooting, contact Polti customer support or a qualified service technician.
