## RamPro 3807

# Ram-Pro Large Dog Training Pinch Collar Instruction Manual

Model: 3807 | Brand: RamPro

## INTRODUCTION

---

The Ram-Pro Dog Training Pinch Collar is designed to enhance communication between you and your dog during training. This collar provides gentle control, effectively addressing issues like leash pulling. Its linked design allows for easy adjustment to achieve a perfect fit. Made from a high-strength polymer, the collar features gentle, rounded prongs that provide effective feedback without causing harm. It is suitable for various dog breeds and sizes, particularly effective for dogs that pull on the leash.

## PRODUCT OVERVIEW

---

The Ram-Pro Pinch Collar is constructed from durable, high-strength polymer. Its unique linked design allows for customization of length by adding or removing individual links, ensuring a snug and effective fit for your dog. The prongs are designed with rounded tips to provide a gentle, yet clear, corrective signal to your dog, mimicking a natural correction from another dog or handler. The collar also features a quick-snap design for easy application and removal, along with a sturdy D-ring for leash attachment.

## SAFETY INFORMATION

---

- **Proper Fit:** Ensure the collar fits snugly high on your dog's neck, just behind the ears. It should be tight enough that you can only fit one or two fingers comfortably between the collar and your dog's neck.
- **Supervision:** Never leave your dog unattended while wearing the pinch collar. It is a training tool and should only be used during supervised training sessions or walks.
- **Not for Tie-Out:** Do not use this collar for tying out your dog.
- **Inspect Regularly:** Before each use, inspect the collar for any signs of wear or damage. Discontinue use if any part is broken or compromised.
- **Gentle Use:** The collar is designed for gentle corrections. Avoid harsh or continuous pulling, as this can cause discomfort or injury to your dog.

## SETUP

---

### Adjusting Collar Size

The Ram-Pro Pinch Collar is adjustable by adding or removing individual links. To adjust:

1. Identify the interlocking links.
2. Gently pull apart two links to separate them. You may need to apply slight pressure to disengage the connection.
3. To shorten the collar, remove one or more links. To lengthen, add additional links (sold separately if needed).
4. Reconnect the collar by aligning the links and pressing them firmly together until they snap into place.

## Placing the Collar on Your Dog

1. Open the collar by detaching one of the quick-snap links.
2. Position the collar high on your dog's neck, directly behind the ears. The D-ring for leash attachment should be at the top of the neck, centered.
3. Close the quick-snap link, ensuring it is securely fastened.
4. Check the fit: The collar should be snug enough that it does not slide down the neck, but not so tight that it restricts breathing or causes discomfort. You should be able to fit one or two fingers between the collar and your dog's neck.

## Attaching the Leash

Attach your leash to the D-ring located on the collar. Ensure the leash clip is securely fastened to prevent accidental detachment.

## OPERATING INSTRUCTIONS

---

The Ram-Pro Pinch Collar works by providing a gentle, momentary pressure around your dog's neck when they pull on the leash. This pressure is a signal, not a punishment, designed to redirect their attention and encourage them to walk calmly by your side.

## Effective Training Techniques

- **Short, Quick Corrections:** When your dog begins to pull, give a quick, firm tug on the leash and immediately release the tension. The goal is a quick snap and release, not continuous pulling.
- **Verbal Cues:** Pair the correction with a verbal cue like "Heel" or "Walk."
- **Reward Good Behavior:** As soon as your dog responds by loosening the leash or walking beside you, praise them and offer a treat. Positive reinforcement is key.
- **Consistency:** Be consistent with your commands and corrections. All family members involved in walking the dog should use the same techniques.

## MAINTENANCE

---

- **Cleaning:** The collar can be easily cleaned with mild soap and water. Rinse thoroughly and allow to air dry completely before next use.
- **Inspection:** Regularly check all links and the D-ring for any signs of wear, cracks, or damage. Ensure all connections are secure.
- **Storage:** Store the collar in a clean, dry place away from direct sunlight when not in use.

## TROUBLESHOOTING

---

## Dog Still Pulls

- **Check Fit:** Ensure the collar is fitted correctly, high on the neck and snug. A loose collar will not provide effective feedback.
- **Correction Technique:** Review your correction technique. Are your tugs quick and firm, followed by immediate release? Are you rewarding good behavior?
- **Consistency:** Ensure all handlers are using consistent commands and techniques.

## Collar Appears Uncomfortable

- **Check Fit:** The collar might be too tight or too loose. Adjust links as necessary.
- **Prong Orientation:** Ensure the prongs are facing inwards towards the dog's neck.
- **Dog's Reaction:** Some dogs may take time to adjust. If discomfort persists, consult with a professional dog trainer or veterinarian.

## SPECIFICATIONS

---

Feature	Detail
Model Number	3807
Size	Large
Material	High-strength Polymer (Metal, Rubber components for leash attachment)
Color	Black
Item Weight	0.5 ounces
Closure Type	Button, Pull On, Snap
Breed Recommendation	All Breed Sizes
