3. PRODUCT FEATURES

The Lollipop Baby Monitor offers a range of features designed for comprehensive baby monitoring:

- **Live View & Sharing Video:** Access 1080p Full HD live feed from your tablet or smartphone. Share access with family members.
- **True Crying Detection:** Advanced AI distinguishes between ambient noises and actual crying, sending alerts to your phone.
- **Crossing Detection:** Define a border within the camera view to track movements. Receive notifications if the baby moves outside this area.
- **Audio Mode:** Continuous audio monitoring even when your phone screen is off.
- **Lullaby and Nature Sounds:** Access to 12 familiar nature sounds and calming music.
- **Data History:** Track patterns and events over time to understand your baby's behavior.
- **Push to Talk:** Two-way audio communication to soothe your baby remotely.
- **Account Sharing:** Securely share access to the monitor with loved ones via AWS cloud service.
- **Contactless Breathing Monitoring and Sleep Track (Subscription Plan):** Utilizes AI technology to monitor respiratory rate and sleeping position without wearable sensors. View historical data.
- **Downloadable Triggered-Event Video (Forever-Free Plan):** 30-second video clips of triggered events, preserved for 2 days.

4. SETUP GUIDE

Follow these steps to set up your Lollipop Baby Monitor:

1. **Unpack the Monitor:** Carefully remove all components from the packaging.
2. **Download the App:** Search for the 'Lollipop Baby Camera' app on your smartphone's app store (iOS or Android) and install it.
3. **Create an Account:** Open the app and follow the on-screen instructions to create a new user account or log in if you already have one.
4. **Power On the Camera:** Connect the 3-meter power cable to the camera and then to the power adapter. Plug the adapter into a wall outlet. The camera will power on.
5. **Connect to Wi-Fi:** Follow the in-app instructions to connect your camera to your home Wi-Fi network. Ensure your Wi-Fi signal is strong in the baby's room.

6. **Position the Camera:** Utilize the flexible silicone stem to position the camera for an optimal view of your baby. It can be wrapped around crib rails, attached to a wall using the provided accessory, or placed on a flat surface.

True Crying Detection

Free yourself from frustrating false baby crying notifications! Lollipop recognizes baby crying from other noises with a minimum of 96% accuracy rate.

5. OPERATING INSTRUCTIONS

Once set up, operate your Lollipop Baby Monitor using the mobile app:

- **Live View:** Open the app to see a real-time 1080p HD video feed of your baby.
- **Two-Way Talk:** Use the microphone icon in the app to speak to your baby.
- **Sound & Motion Alerts:** Customize alert sensitivity for crying, noise, and movement within the app settings.
- **Night Vision:** The camera automatically switches to infrared night vision in low-light conditions.
- **Lullabies & Sounds:** Select and play soothing sounds or lullabies directly from the app.

6. ADVANCED FEATURES

Breathing Monitoring (Lollipop Care Subscription)

This feature uses AI to monitor your baby's breathing patterns without physical contact. Access real-time BPM (Breaths Per Minute) and historical data on respiratory rate and sleeping position. An app alert is triggered if

abnormal breathing is detected. A subscription to Lollipop Care is required for this feature.

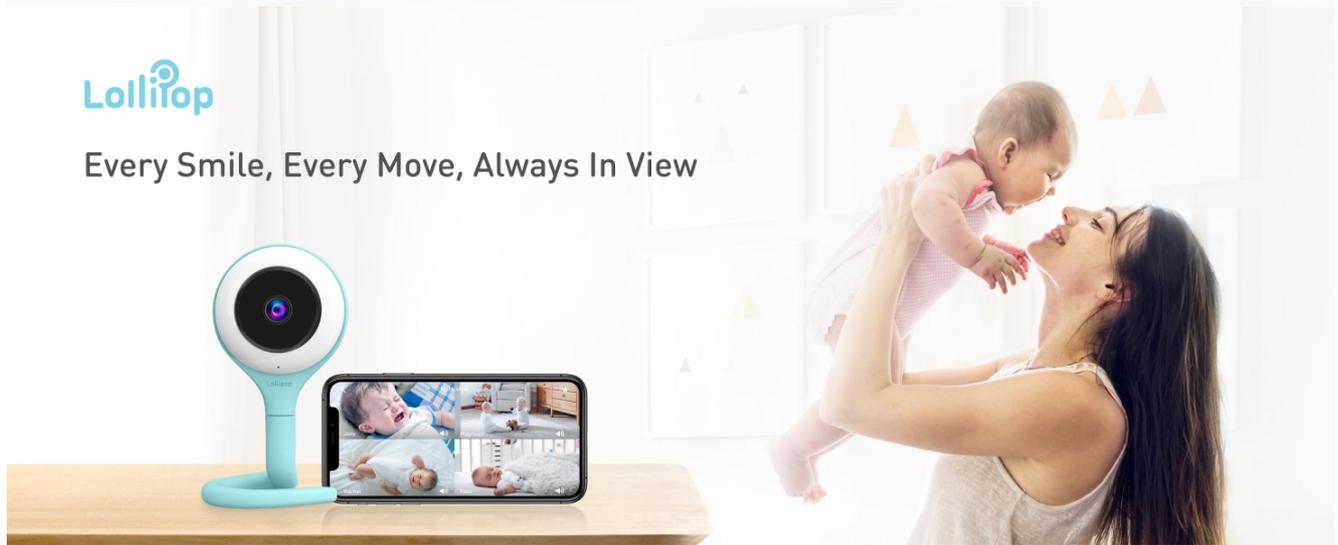

Image: Visual representation of the breathing monitoring feature.

Sleep Tracking (Lollipop Care Subscription)

Track your baby's sleep cycles and patterns. The app provides insights into awake, asleep, and away periods, helping you understand and improve your baby's sleep habits. This feature also requires a Lollipop Care subscription.

Image: Illustration of the sleep tracking feature on the app.

True Crying Detection

The monitor's AI is trained to differentiate between a baby's cry and other ambient sounds, minimizing false alarms. You will receive an alert on your phone when your baby cries.

Noise Detection

If there are loud environmental noises around your baby, you'll receive an alert from Lollipop app.

Image: The True Crying Detection feature in action.

Crossing Detection

Set a virtual boundary within the camera's field of view. If your baby crosses this boundary, for example, if a leg gets stuck, you will be notified immediately.

Audio Mode

Need a moment away from your baby? Hear your baby while you cook in the kitchen, do the laundry or clean the living room with the audio mode!

Image: How crossing detection works with a virtual boundary.

Noise Detection

Receive alerts if loud environmental noises are detected in your baby's room, ensuring you are aware of significant sound changes.

30-second Event Videos

Video with 10 seconds Pre-recording.
7-day free storage to download for peace of mind.

Image: Noise detection feature alerting to sounds.

Audio Mode

Listen to your baby continuously through the app's audio mode, even when your phone screen is off or you are using other applications.

Image: Audio mode allows continuous listening.

7. MAINTENANCE

To ensure optimal performance and longevity of your Lollipop Baby Monitor:

- **Cleaning:** Gently wipe the camera lens and body with a soft, dry cloth. Do not use harsh chemicals or abrasive cleaners.
- **Cable Management:** Use the provided cable holders to secure the power cable away from your baby's reach to prevent entanglement hazards.
- **Software Updates:** Regularly check the Lollipop Baby Camera app for software updates to ensure you have the latest features and security enhancements.
- **Environmental Conditions:** Operate the camera within recommended temperature and humidity ranges as specified in the product specifications.

8. TROUBLESHOOTING

If you encounter issues with your Lollipop Baby Monitor, refer to the following common solutions:

- **No Video Feed/Offline:**
 - Ensure the camera is powered on and the power adapter is securely plugged in.

- Check your Wi-Fi connection. The camera requires a stable internet connection.
- Restart the camera by unplugging it for 10 seconds and plugging it back in.
- Verify that the Lollipop app is updated to the latest version.

- **Poor Video Quality:**

- Ensure the camera lens is clean and free from dust or smudges.
- Check your Wi-Fi signal strength. A weak signal can affect video quality.
- Ensure there are no obstructions blocking the camera's view.

- **No Audio/Two-Way Talk Issues:**

- Check the volume settings on your smartphone and within the app.
- Ensure your phone's microphone permissions are granted to the Lollipop app.
- Verify network stability for real-time audio transmission.

- **False Crying/Noise Alerts:**

- Adjust the sensitivity settings for crying and noise detection in the app.
- Ensure the camera is not positioned near sources of consistent background noise (e.g., fans, air conditioners).

9. SPECIFICATIONS

Attribute	Value
Brand	Lollipop
