SETUP AND ASSEMBLY INSTRUCTIONS

Assembly is designed to be straightforward and typically takes about 20 minutes with the included tools. It is recommended that two people assemble the table for ease and safety.

1. **Unpack and Identify Parts:** Carefully remove all components from the packaging. Lay them out on a clean, soft surface. Refer to the parts list to ensure everything is accounted for.
2. **Attach X-Frame Supports to Legs:** Secure the X-frame side supports to the table legs using the provided screws and Allen wrench. Ensure the X-frames are oriented correctly.
3. **Connect Legs to Bottom Shelf:** Attach the assembled leg and X-frame units to the bottom shelf. Do not fully tighten screws yet to allow for adjustments.
4. **Attach Tabletop:** Carefully place the tabletop onto the assembled frame. Align the pre-drilled holes with the leg and frame connections.
5. **Secure All Connections:** Insert and hand-tighten all remaining screws. Once all screws are in place, gradually tighten them with the Allen wrench, ensuring the table is stable and level. Avoid over-tightening.
6. **Final Check:** Gently shake the table to confirm stability. If any wobbling occurs, re-check all screw connections.

TROUBLESHOOTING

If you encounter any issues during assembly or use, refer to the following common solutions:

- **Table is Wobbly:** Ensure all screws are fully tightened. Loosen all screws slightly, adjust the table to be level, then re-tighten them firmly. Check that all parts are correctly aligned according to the instructions.
- **Difficulty with Screw Insertion:** If screws are hard to insert into plastic inserts, try twisting the screw into the insert a few times before assembly to 'open it up'. Ensure the Allen wrench is properly seated in the screw head.
- **Missing Parts:** Double-check the packaging and compare with the 'Package Contents' list. If parts are genuinely missing, contact GreenForest customer support for assistance.
- **Scratches or Damage:** For minor scratches, wood repair markers or furniture polish may help. For significant damage, contact customer support.
