

## Fosmon FOSMON-TSA-COMBO-4PACK

# Fosmon Premium TSA Travel Padlocks

Model: FOSMON-TSA-COMBO-4PACK

## INTRODUCTION

Thank you for choosing Fosmon Premium TSA Travel Padlocks. This 4-pack of durable, 3-digit combination locks is designed to provide security for your luggage, bags, and other personal items while ensuring compliance with Travel Sentry (TSA) regulations. These locks allow TSA agents to inspect your baggage without damaging the lock, providing peace of mind during your travels.

## SETUP: SETTING YOUR COMBINATION

Your Fosmon TSA Travel Padlock comes with a preset combination of **0-0-0**. To set your personal combination, follow these steps:

1. Turn the dials to the original combination (0-0-0).
2. Locate the reset button. This is typically a small, recessed button on the side or bottom of the lock.
3. Using a pen or a pointed object, push down the reset button until you hear a click or feel it engage. Keep it pressed down.
4. While holding the reset button, set your new 3-digit combination by rotating the dials to your desired numbers.
5. Release the reset button. The lock is now set to your new combination.
6. **Important:** Scramble the dials immediately after setting your combination to ensure it is locked and to prevent accidental changes. Remember your new combination!

## OPERATING THE PADLOCK

### Opening and Closing

To open the padlock, align the dials to your set 3-digit combination. Once aligned, press the release button (usually located on the side) to pop open the shackle. To close, simply push the shackle back into the lock body until it clicks, then scramble the dials to secure it.

## TSA Acceptance

These padlocks are Travel Sentry Approved (TSA). This means that the Transportation Security Administration (TSA) can open your luggage for inspection using a special master key without damaging your lock. After inspection, the TSA agent will re-lock your bag. The Travel Sentry symbol (red diamond logo) on the lock indicates its TSA acceptance.

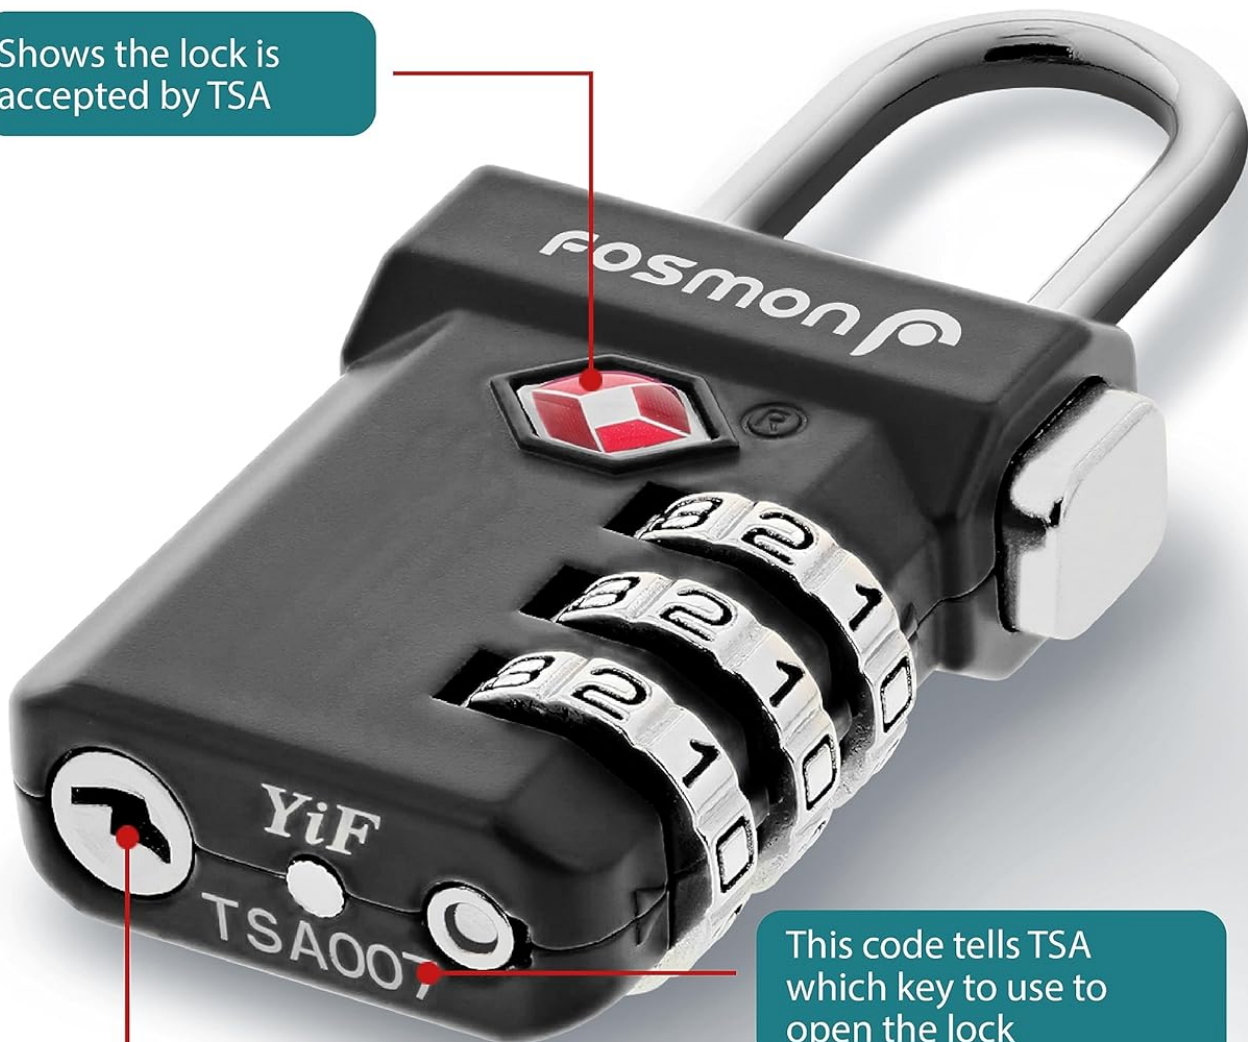

# TSA Accepted

Travel Sentry Symbol ensures that TSA will use a master key to unlock and relock your baggage

Shows the lock is accepted by TSA

This code tells TSA which key to use to open the lock

The keyhole for TSA's master key

## Open Alert Indicator

Some Fosmon TSA padlocks are equipped with an 'Open Alert Indicator'. This small red button or pop-up mechanism will appear if your luggage has been opened by a TSA agent. This feature provides a visual confirmation that your bag was inspected, allowing you to check its contents upon retrieval.

# Easy to Reset

**1** Turn the Dials to your original combination.

**2** Push down the reset button.

**3** Set your new combination.

**4** Release the reset button to the default position.

## MAINTENANCE

Fosmon TSA Travel Padlocks are constructed from durable zinc alloy and hardened steel, designed to withstand the rigors of travel. To ensure longevity and smooth operation:

- Keep the lock clean and free from dirt or debris.
- Avoid exposing the lock to extreme temperatures or harsh chemicals.
- If the dials become stiff, a small amount of graphite lubricant can be applied, but this is rarely necessary.

- Store in a dry place when not in use.

# Sturdy and Durable

Zinc Alloy body and hardened steel shackle are light, robust, and great for anyone who travels a lot.

## TROUBLESHOOTING

### Forgotten Combination

If you forget your combination, there is no master key provided to the user, nor is there a universal reset code. The only way to open the lock is to try all possible combinations (000-999). This process can be time-consuming but is the only method if the combination is lost. It is highly recommended to write down your combination and store it in a secure, memorable place, separate from your luggage.

## Lock Not Opening with Correct Combination

- Ensure the dials are perfectly aligned with your combination. Sometimes a slight misalignment can prevent opening.
- Verify that you are using the correct combination. Double-check any notes you may have made.
- Check if the reset button was accidentally pressed or if the combination was inadvertently changed. If so, try the reset procedure again with your known combination.

## SPECIFICATIONS

Feature	Detail
Brand	Fosmon
Model Number	FOSMON-TSA-COMBO-4PACK
Product Dimensions (L x W x H)	7.14 x 2.87 x 1.17 cm (approx. 2.81 x 1.13 x 0.46 inches)
