

## Fiskars 1027104

# Fiskars Watering Hose 13mm (1/2") 20M Q4

## INSTRUCTION MANUAL

### Introduction

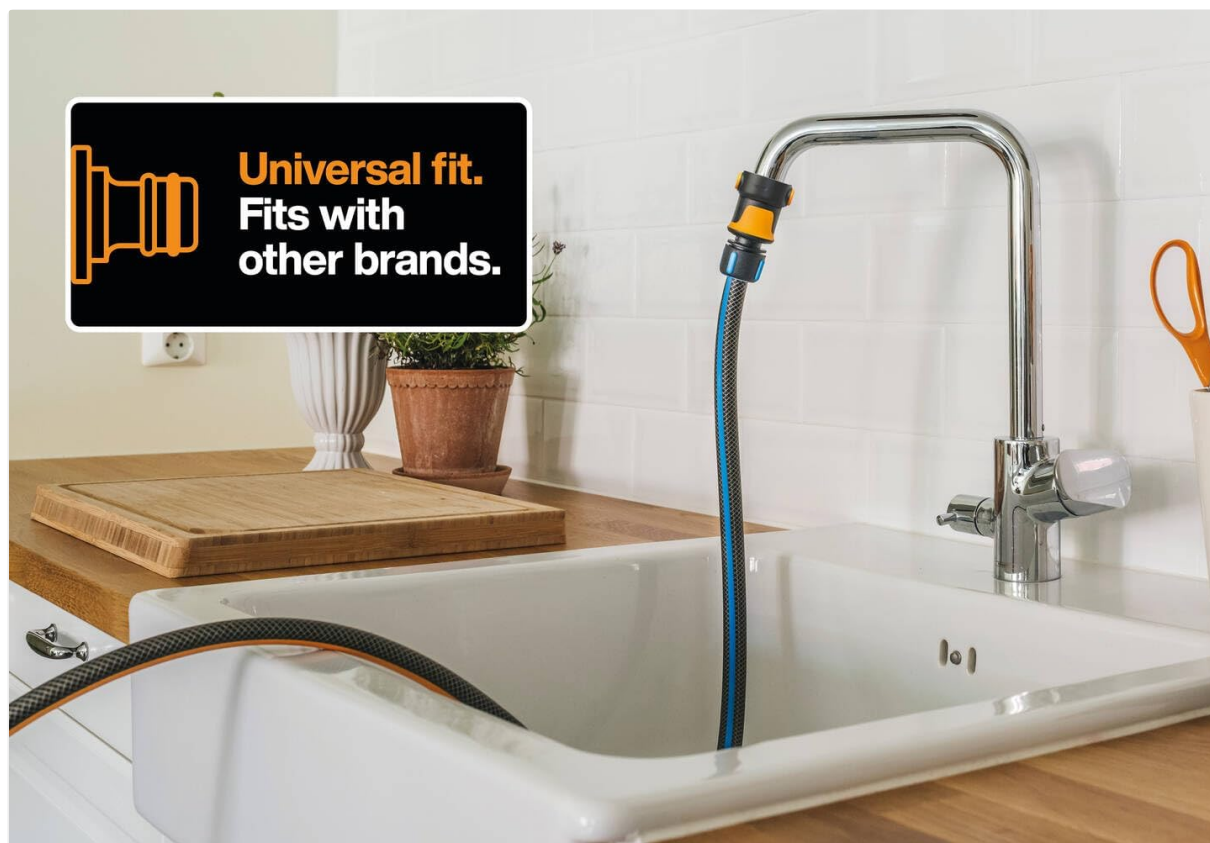

This manual provides essential information for the proper setup, operation, and maintenance of your Fiskars Watering Hose 13mm (1/2") 20M Q4. Please read these instructions carefully before use to ensure safe and efficient performance of the product.

### Safety Information

- Always turn off the water supply before connecting or disconnecting the hose or accessories.
- Do not drink water from the hose unless it is specifically rated for potable water. This hose is intended for irrigation purposes.
- Avoid leaving the hose under high pressure for extended periods when not in use.
- Store the hose away from direct sunlight and extreme temperatures to prolong its lifespan.
- Keep out of reach of children when not supervised.

### Setup

1. **Uncoiling the Hose:** Carefully uncoil the entire length of the hose before use to prevent kinks and ensure even water flow.
2. **Connecting to Water Source:** Attach one end of the hose to a standard outdoor faucet. Ensure the connection is tight to prevent leaks. Hand-tightening is usually sufficient.
3. **Attaching Accessories:** Connect your desired watering accessory (e.g., nozzle, sprinkler) to the other end of the hose. The Fiskars hose features universal fittings compatible with most standard watering tools.

## Operating

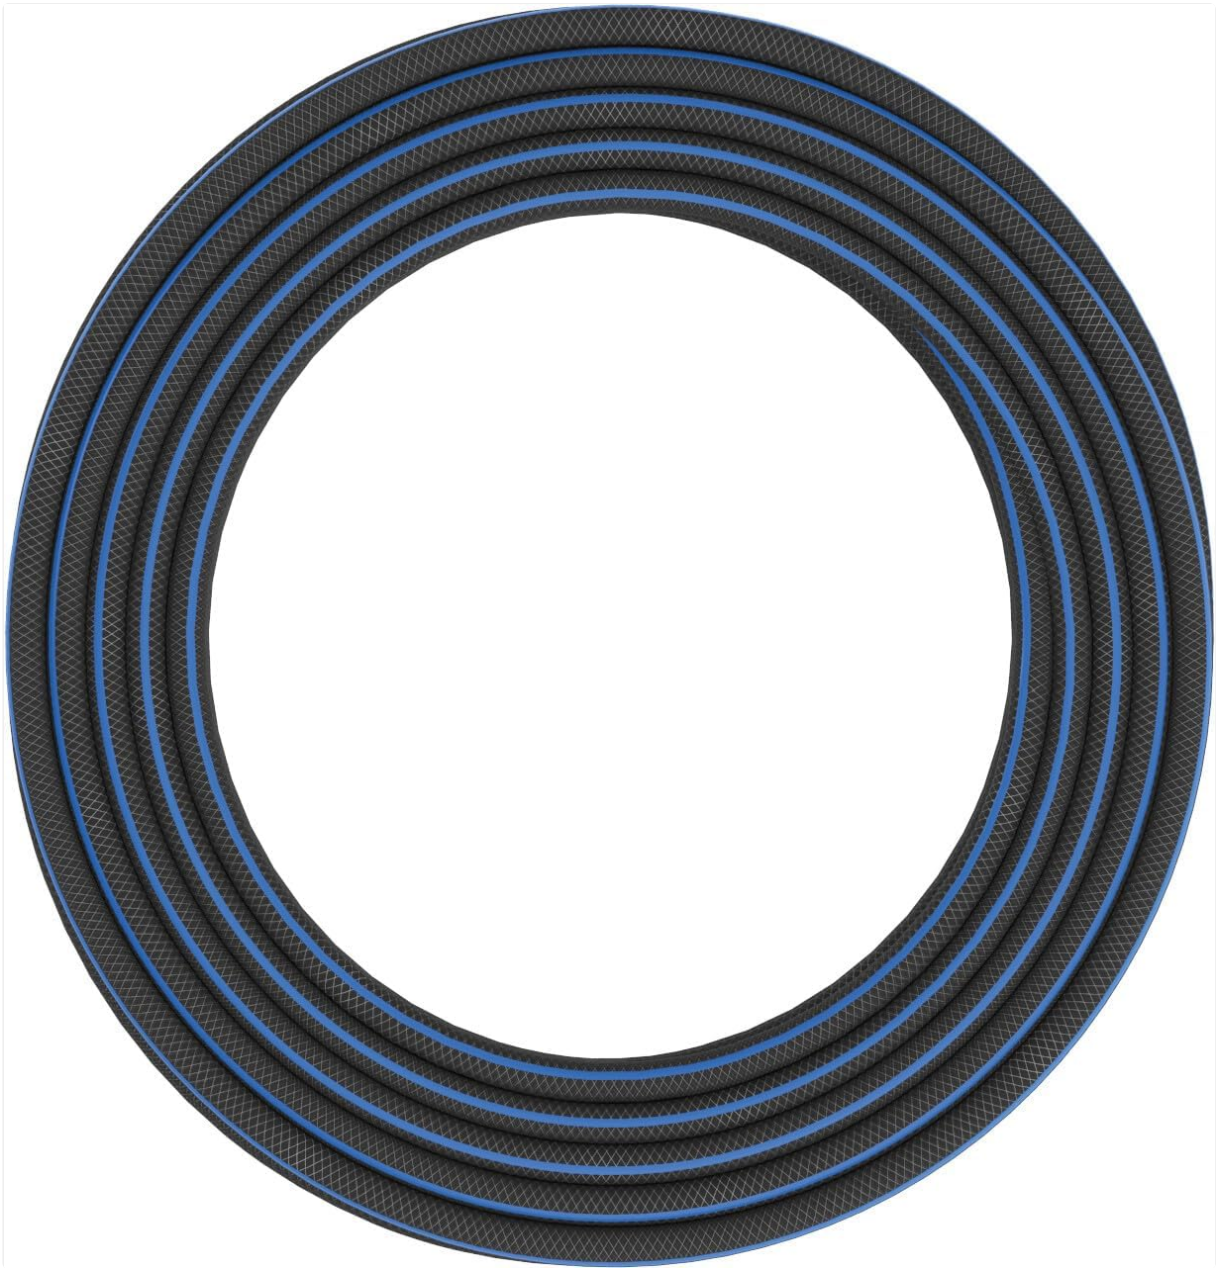

---

- **Turning On Water:** Slowly turn on the water supply at the faucet. This prevents sudden pressure surges that could damage the hose or fittings.
- **Watering:** Direct the water flow as needed for your gardening tasks. Adjust the nozzle or sprinkler settings for desired spray patterns.
- **Turning Off Water:** After use, turn off the water supply at the faucet.
- **Relieving Pressure:** Disconnect any attached accessories and allow residual water to drain from the hose to relieve pressure.

## Maintenance

---

- **Cleaning:** Periodically rinse the hose with clean water to remove dirt, mud, or debris.
- **Storage:** For optimal longevity, store the hose coiled in a cool, dry place away from direct sunlight. The hose is UV-protected and frost-protected, but proper storage further extends its life.
- **Winterization:** Before freezing temperatures, ensure all water is drained from the hose and store it indoors to prevent ice damage.
- **Inspecting for Damage:** Regularly inspect the hose for any cuts, punctures, or wear. Replace if significant damage is found to prevent leaks.

The Fiskars Watering Hose, coiled for storage or transport.

## Troubleshooting

- **Low Water Pressure:** Check if the faucet is fully open. Ensure there are no kinks in the hose. Verify that any attached accessories are not clogged.
- **Leaks at Connections:** Tighten all connections by hand. If leaks persist, check the rubber washers inside the fittings for damage or proper seating. Replace washers if necessary.
- **Hose Kinks:** Uncoil the hose completely before use. Avoid sharp bends during operation. The Fiskars hose is designed for twist resistance, but extreme bending can still cause kinks.

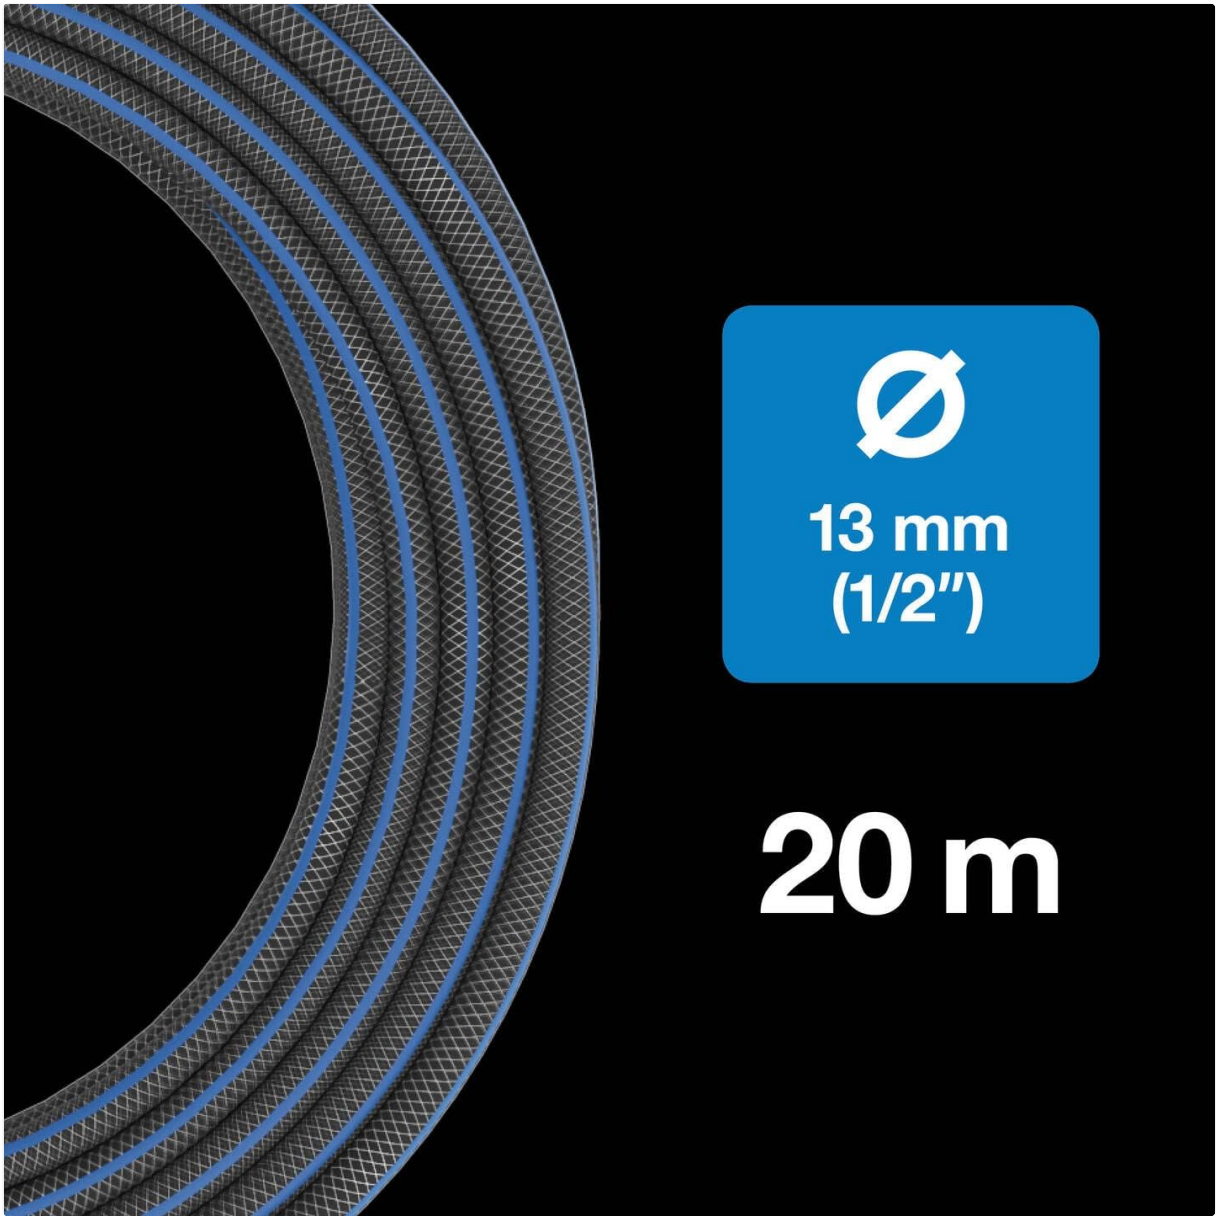

## Specifications

Feature	Specification
Brand	Fiskars
Model Number	1027104

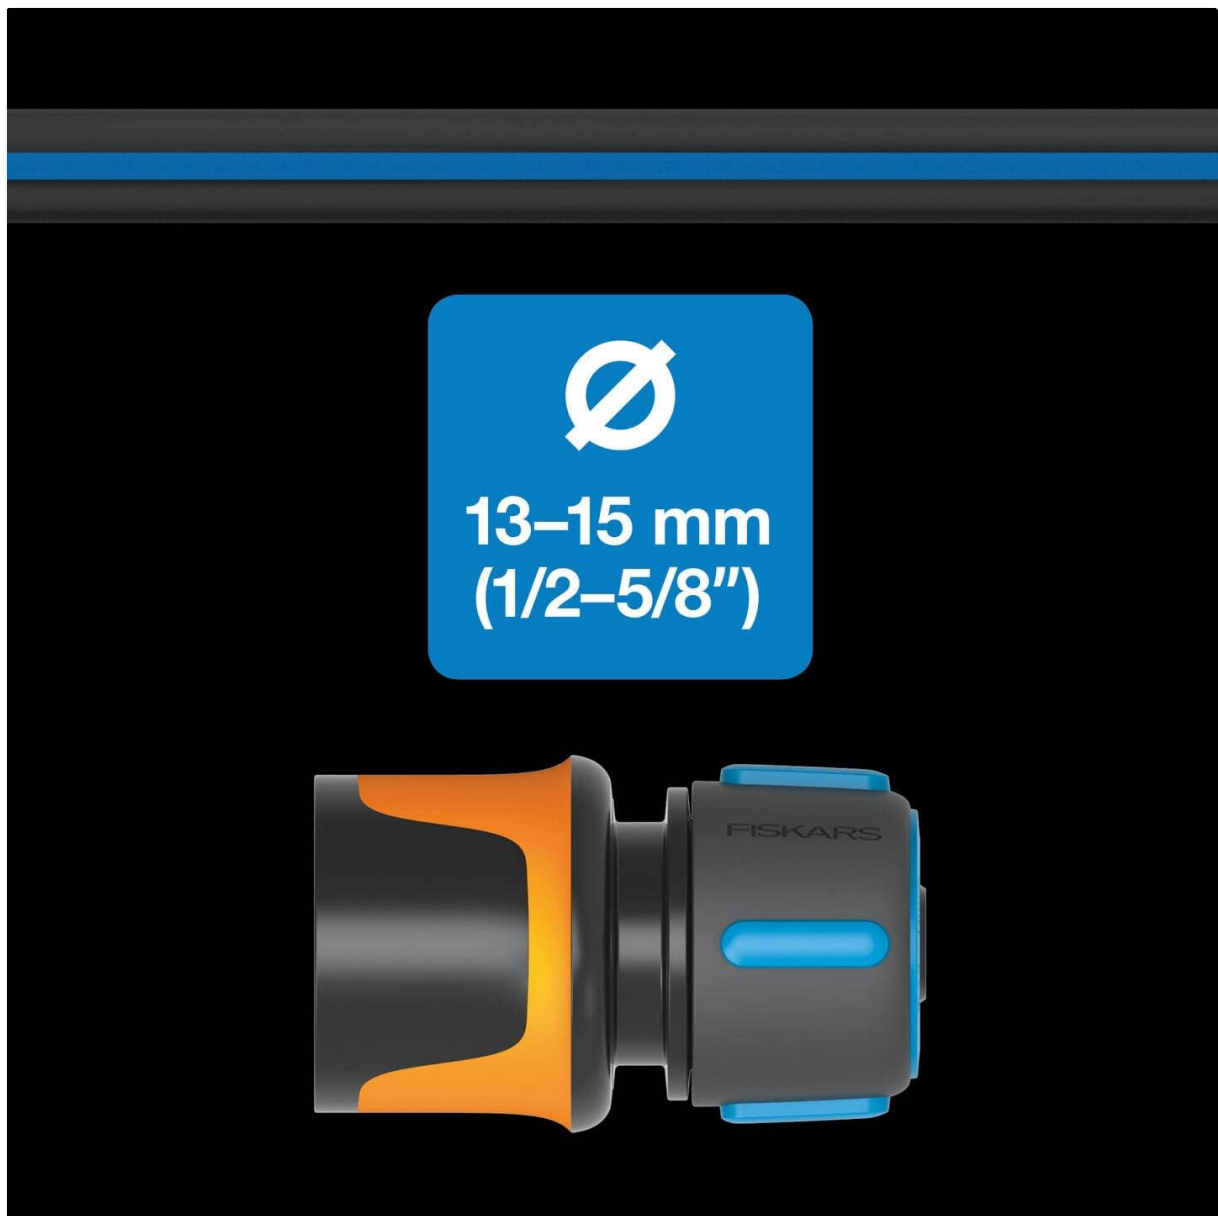

Feature	Specification
---------	---------------

Material	Plastic
Color	Standard (Black/Blue)
Item Weight	2.8 Kilograms (6.16 pounds)
Nominal Wall Thickness	13 millimeters
Outside Diameter	13 Millimeters (1/2 inch)
Item Length	20 Meters
