Maintenance and Care

To ensure the longevity and appearance of your YAMAZAKI Home Tower Expandable Support Rack, follow these care instructions:

- **Cleaning:** Wipe the rack clean with a soft, damp cloth. For stubborn marks, a mild soap or detergent can be used.
- **Drying:** After cleaning, immediately wipe the rack dry with a clean, soft cloth to prevent water spots and maintain the powder-coated finish.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, scouring pads, or harsh chemical detergents, as these can damage the finish.
- **Weight Distribution:** Distribute weight evenly on the shelf to prevent stress on the frame. Do not exceed the maximum weight capacity of 22 pounds for the shelf and 250g per hook.

Troubleshooting

If you encounter any issues with your expandable support rack, consider the following:

- **Instability/Wobbling:** Ensure all assembly screws are securely tightened. Check that the rack is placed on a flat, even surface. Uneven weight distribution can also cause instability; redistribute items if necessary.

- **Difficulty Expanding/Contracting:** Ensure no debris is obstructing the sliding mechanism. If the rack feels stiff, gently clean the sliding parts. Avoid forcing the mechanism.
- **Damaged Finish:** The powder-coated finish is durable, but scratches can occur from sharp objects. Handle with care during assembly and use.
