## Setup and Installation

Professional installation is recommended. Ensure you have all necessary tools and materials before starting.

1. **Prepare the Wall:** Ensure the wall opening for the rough-in valve is correctly sized and positioned according to the product diagram.
2. **Install Rough-in Valve:** Secure the brass rough-in valve to the wall studs. Connect the hot and cold water supply lines to the appropriate inlets on the valve.
3. **Test Connections:** Before closing the wall, turn on the water supply to check for leaks.
4. **Install Trim:** Once the wall is finished, install the decorative escutcheons, spout, and handle assembly.
5. **Final Check:** Turn on the water supply and test the faucet for proper operation and any leaks.

## Operating Instructions

Your Sumerain wall mount faucet features a single lever handle for controlling both water flow and temperature.

- **Turn On/Off:** Lift the lever handle to turn on the water. Push it down to turn off the water.
- **Adjust Temperature:** Swivel the lever handle left for hot water and right for cold water. The further you move it in either direction, the hotter or colder the water will become.
- **Adjust Flow:** The height to which you lift the lever controls the water flow rate. Lift higher for more flow, lower for less.

## Maintenance

Regular cleaning and maintenance will preserve the finish and functionality of your faucet.

- **Cleaning the Finish:** Clean the faucet regularly with a soft cloth and mild soap. Avoid abrasive cleaners, harsh chemicals, or polishes that could damage the brushed gold finish.
- **Aerator Maintenance:** If water flow decreases, the aerator may be clogged. Unscrew the aerator from the spout, clean any debris, and rinse thoroughly before reattaching.
- **Ceramic Disc Cartridge:** The high-quality ceramic disc cartridge is designed for maintenance-free use and tested to be drip-free after 600,000 uses. If issues arise, consult the troubleshooting section or contact support.

## Troubleshooting

Before contacting customer service, please refer to the following common issues and solutions:

| Problem | Possible Cause | Solution |
|---|---|---|
| Low Water Flow | Clogged aerator; partially closed shut-off valves. | Clean the aerator. Ensure shut-off valves are fully open. |
| Leaking from Spout | Worn cartridge; debris in cartridge. | Replace or clean the ceramic disc cartridge. Contact support if issue persists. |
| Water Temperature Issues | Incorrect hot/cold connections; water heater settings. | Verify hot and cold lines are correctly connected. Check water heater settings. |
